ASP Portal Update

24 May 2023

We're listening to you

Our customers and ASPs have told us they want greater transparency and easier access to information that matters to them. We are very pleased to announce, after a review of access to information, we have decided to remove the login page for the ASP Portal, so that our technical bulletins, standards and forms can now be accessed without the need to login.

This is another small step towards delivering a better experience for our stakeholders.

You can continue to access the ASP Portal through the same location on our website.

Kind regards,

Customer Network Solutions
