GIS System Upgrade – Update

26 June 2024

As previously communicated on the 17th April, Endeavour Energy is embarking on a long-term strategy aimed at implementing a modern Geographic Information System (GIS) to enhance efficiency, safety, and customer service, while phasing out obsolete technologies.

What you need to do:

If you have existing outages or need to schedule outages between **Friday 16th August and Sunday 1st September**, please ensure your request is confirmed with your designated Construction Coordinator before the close of business on **Friday 19th July**. Requests not confirmed by this date will not be actioned during this period.

Kind regards,

Customer Network Solutions
