**12/2025**

### Changes to the way you register batteries on our network

9 April 2025

From today, you no longer need to use Endeavour Energy's battery installation form to register your battery. Instead, you can now register it directly with [AEMO's Distributed Energy Resource \(DER\) platform](#).

The process for getting a Permission to Connect (PTC) hasn't changed – you still need to apply for this through our [Connections Portal](#). Once you have your PTC and the battery is installed, you can go ahead and register it with AEMO.

To learn more about the battery incentive scheme, visit: [Install a battery | NSW Climate and Energy Action](#)

More information about this change is available on our [website](#).

#### **IMPORTANT**

This update is applicable for all PTC issued from 3 February 2025 onwards.

If your PTC was issued before 3 February 2025 and you haven't yet registered your battery using our previous battery installation form, you will receive separate instructions. If you don't hear from us, please contact us at [cwadmin@endeavourenergy.com.au](mailto:cwadmin@endeavourenergy.com.au) or call 02 9853 7977.

Kind regards,

**Customer Network Solutions**
