### **An update on EIA tool registration**

21 August 2025

On 8 August, we shared information about our new digital Environmental Impact Assessment (EIA) tool, designed to streamline and improve the EIA process.

We have received a large response from ASP3s and would like to thank you for your strong interest in this initiative. We are currently working through the registrations, however it may take a little longer to get everyone set up.

We anticipate that all registrations will be complete by 30 August. If you do not receive an email regarding your aXcelerate access prior to this date, please contact us so we can assist.

Thank you for your patience and support as we roll out this important improvement. If you have any further questions, please don't hesitate to reach out to us at [cwadmin@endeavourenergy.com.au](mailto:cwadmin@endeavourenergy.com.au).

Kind regards,

**Customer Network Solutions**
