SDI 120 Standard Reminder & Commissioning Improvements

10 October 2025

Just a quick reminder that our SDI 120 Substation Design Instruction was updated in November 2024, so please ensure you are using the latest version. To make things simpler and ensure there's only one true copy, you'll now only find it in the ASP Portal under: *Standards > SDI Substation Design Instruction*

In line with this, we're also excited to share that we are kicking off a new project this month to streamline our commissioning process. We'll be taking a fresh look at how commissioning is managed, with the goal of reducing duplication, improving efficiency, and making the process easier for everyone involved.

We'll keep you updated as the project progresses and look forward to sharing improvements with you soon.

Kind regards,

Customer Network Solutions
