1. About Equity Trustees Limited

The Responsible Entity

Equity Trustees' responsibilities and obligations as the Fund's responsible entity are governed by the Fund's constitution ("Constitution"), the Corporations Act and general trust law. Equity Trustees has appointed ARGA Investment Management LP as the investment manager of the Fund. Equity Trustees has appointed a custodian to hold the assets of the Fund. The custodian has no supervisory role in relation to the operation of the Fund and is not responsible for protecting your interests.

The Investment Manager

ARGA is an employee-owned investment management firm focused on global, non-US, and emerging markets equities. ARGAs a classic value manager and seeks to invest in companies which it considers to be undervalued using a disciplined, valuation-based investment approach based on fundamental research and a present value methodology.

ARGA was founded in 2010 by Chief Investment Officer, A. Rama Krishna, who has over 35 years' experience in managing global equities, previously at other well-established investment managers. The firm has grown to over 150 employees in four global locations, managing assets of over USD 18 billion as at January 2025.

2. How the ARGA Global Equity Australia Fund works

The Fund is a registered managed investment scheme governed by the Constitution. The Fund comprises assets which are acquired in accordance with the Fund's investment strategy. Direct investors receive class A units (the "Class") when they invest. In general, each unit represents an equal interest in the assets of the Fund subject to liabilities; however, it does not give investors an interest in any particular asset of the Fund. The constitution allows the Responsible Entity to issue more than one class of units and each separate class may have different rights attached to the units.

If you invest in the Fund through an IDPS you will not become an investor in the Fund. The operator or custodian of the IDPS will be the investor entered in the Fund's register and will be the only person who is able to exercise the rights and receive the benefits of a direct investor. Your investment in the Fund through the IDPS will be governed by the terms of your IDPS. Please direct any queries and requests relating to your investment to your IDPS Operator. Unless otherwise stated, the information in the PDS applies to direct investors.

Applying for units

You can acquire units by completing the Application Form that accompanies this PDS. The minimum initial investment amount for the Class is \$25,000. We may vary or waive the minimum initial investment amount at our discretion and without notice.

Completed Application Forms should be sent along with your identification documents (if applicable) to:

Apex Fund Services Pty Limited
Unit Registry Services
GPO Box 4968
Sydney NSW 2001

Please note that cash and cheques cannot be accepted.

We reserve the right to accept or reject applications in whole or in part at our discretion. We have the discretion to delay processing applications where we believe this to be in the best interest of the Fund's investors.

The price at which units are acquired is determined in accordance with the Constitution ("Application Price"). The Application Price on a Business Day is, in general terms, equal to the Net Asset Value ("NAV") of the Class, divided by the number of units on issue for that class and adjusted for transaction costs ("Buy Spread"). At the date of this PDS, the Buy Spread is 0.20%.

The Application Price will vary as the market value of assets in the Class rises or falls.

No interest is earned on application monies. Fractions of units may be issued by Equity Trustees in accordance with the provisions of the Constitution.

Making additional investments

You can make additional investments into the Class at any time by sending us your additional investment amount together with a completed Application Form. The minimum additional investment into the Fund is \$1,000. We may vary or waive the minimum additional investment amount at our discretion and without notice. You can also increase your units by reinvesting any distributions (see below).

Distributions

An investor's share of any distributable income is calculated in accordance with the Constitution and is generally based on the number of units held by the investor at the end of the distribution period.

The Class is an accumulating Class and does not intend to distribute on a regular basis. Any distributions will be made on an annual basis. Distributions are calculated effective the last day of the distribution period and are normally paid to investors as soon as practicable after the distribution calculation date.

Investors in the Fund can indicate a preference to have their distribution:

- reinvested back into the Fund; or
- directly credited to their AUD Australian domiciled bank account.

Investors who do not indicate a preference will have their distributions automatically reinvested. Applications for reinvestment will be taken to be received immediately prior to the next Business Day after the relevant distribution period. There is no Buy Spread on distributions that are reinvested.

In some circumstances, the Constitution may allow for an investor's withdrawal proceeds to be taken to include a component of distributable income.

Indirect Investors should review their IDPS Guide for information on how and when they receive any income distribution.

Access to your money

Investors in the Fund can generally withdraw their investment by completing a written request to withdraw from the Fund and mailing it to:

Apex Fund Services Pty Limited
Unit Registry Services
GPO Box 4968
Sydney NSW 2001

Or sending it by fax to +61 2 9251 3525

The minimum withdrawal amount is \$1,000. We may vary or waive the minimum withdrawal amount at our discretion and without notice. Once we receive and accept your withdrawal request, we may act on your instruction without further enquiry if the instruction bears your account number or investor details and your (apparent) signature(s), or your authorised signatory's (apparent) signature(s).

Equity Trustees will generally pay withdrawal proceeds within 7 days of acceptance of a withdrawal request by transferring the withdrawal proceeds to such investor's nominated AUD denominated Australian domiciled bank account. However, Equity Trustees is allowed to reject withdrawal requests, and also to make payment up to 21 days after acceptance of a request (which may be extended in certain circumstances) as outlined in the Constitution and Reference Guide.

We reserve the right to accept or reject withdrawal requests in whole or in part at our discretion.

The price at which units are withdrawn is determined in accordance with the Constitution ("Withdrawal Price"). The Withdrawal Price on a Business Day is, in general terms, equal to the NAV of the Class, divided by the number of units on issue in the Class and adjusted for transaction costs ("Sell Spread"). At the date of this PDS, the Sell Spread is 0.15%.

The Withdrawal Price will vary as the market value of assets in the Fund rises or falls.

Equity Trustees reserves the right to fully redeem your investment if your investment balance in the Class falls below \$25,000 as a result of processing your withdrawal request. In certain circumstances, for example, when there is a freeze on withdrawals, where accepting a withdrawal is not in the best interests of investors in the Fund including due to one or more circumstances outside our control or where the Fund is not liquid (as defined in the Corporations Act), Equity Trustees can deny or suspend a withdrawal request and you may not be able to withdraw your funds in the usual processing times or at all. When the Fund is not liquid, an investor can only withdraw when Equity Trustees makes a withdrawal offer to investors in accordance with the Corporations Act. Equity Trustees is not obliged to make such offers.

If you are an Indirect Investor, you need to provide your withdrawal request directly to your IDPS Operator. The time to process a withdrawal request will depend on the particular IDPS Operator and the terms of the IDPS.

Unit pricing discretions policy

Equity Trustees has developed a formal written policy in relation to the guidelines and relevant factors taken into account when exercising any discretion in calculating unit prices (including determining the value of the assets and liabilities). A copy of the policy and, where applicable and to the extent required, any other relevant documents in relation to the policy will be made available free of charge on request.

Additional information

If and when the Fund has 100 or more direct investors, it will be classified by the Corporations Act as a 'disclosing entity'. As a disclosing entity, the Fund will be subject to regular reporting and disclosure obligations. Investors would then have a right to obtain a copy, free of charge, of any of the following documents:

- the most recent annual financial report lodged with ASIC ("Annual Report");
- any subsequent half yearly financial report lodged with ASIC after the lodgement of the Annual Report; and
- any continuous disclosure notices lodged with ASIC after the Annual Report but before the date of this PDS.

Equity Trustees will comply with any continuous disclosure obligation by lodging documents with ASIC as and when required.

Copies of these documents lodged with ASIC in relation to the Fund may be obtained from ASIC through ASIC's website or inspected at an ASIC office.

3. Benefits of investing in the ARGA Global Equity Australia Fund Class A

Significant features

The investment objective of the Fund is to generate long-term returns by investing in listed global equities and equity linked securities of mid- to large-cap global companies that are assessed by the Investment Manager as trading at a discount to their perceived intrinsic value. The Fund's portfolio will generally consist of 45 to 90 companies.

The Investment Manager has a team of experienced professionals with a long track record of investing in global equities. The extensive experience of the team is invaluable in identifying and assessing investment opportunities for the Fund.

Significant benefits

ARGA uses a disciplined, repeatable investment process designed to minimise biases in all investment decisions. The Fund's investable universe is defined by applying a quantitative screen to identify the relevant companies. The Investment Manager then ranks this group on certain key value metrics and those companies within the top 20% of the ranking are prioritised for further research. Detailed industry and company models are used to evaluate a company's long term earning power and the company's intrinsic value.

Members of the investment team are allocated responsibility for certain global sectors, with each member typically covering two sectors concurrently, and each sector is typically covered by more than one investment professional. By assigning members from multiple office locations (United States, UK, and India) to each global sector, both developed and emerging market perspectives are incorporated into the investment process. The Investment Manager believes that this global perspective is key when analysing any company.

To facilitate consistency in the Investment Manager's global research efforts, the Investment Manager uses global industry models to understand and evaluate companies. These provide a uniform set of assumptions to use in undertaking any company specific analyses. Additionally, these models provide the necessary framework to quickly evaluate any new companies, which begin to screen cheap (i.e. appear to have an attractive valuation based on the Investment Manager's criteria) in an industry we have already modelled and leverage research – across geographies, industries, companies and strategies.

4. Risks of managed investment schemes

All investments carry risks. Different investment strategies may carry different levels of risk, depending on the assets acquired under the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk. The significant risks below should be considered in light of your risk profile when deciding whether to invest in the Fund. Your risk profile will vary depending on a range of factors, including your age, the investment time frame (how long you wish to invest for), your other investments or assets and your risk tolerance.

The Responsible Entity and the Investment Manager do not guarantee the liquidity of the Fund's investments, repayment of capital or any rate of return or the Fund's investment performance. The value of the Fund's investments will vary. Returns are not guaranteed, and you may lose money by investing in the Fund. The level of returns will vary and future returns may differ from past returns. Laws affecting managed investment schemes may change in the future. The structure and administration of the Fund is also subject to change.

In addition, we do not offer advice that takes into account your personal financial situation, including advice about whether the Fund is suitable for your circumstances. If you require personal financial or taxation advice, you should contact a licensed financial adviser and/or taxation adviser.

Equity Risks

The Fund will invest primarily in equity and equity linked securities. The value of these securities generally will vary with the performance of the issuer and movements in the equity markets. As is true of any investment, there is a risk that an investment in the Fund will be lost entirely or in part. The Fund should represent only a portion of an investor's portfolio.

Value Investment Risks

The Investment Manager focuses the Fund's investment strategy on issuers that it believes are undervalued or inexpensive versus other securities or investments. These stocks present risks that are in addition to general equity risks outlined above. When estimating the value of an issuer, the Investment Manager makes assumptions about the fundamentals of the issuer which may be subject to errors in estimation or may be simply proven wrong. Value stocks may also be out of favour for significant periods of time during which time may lead to significant underperformance of the Fund versus certain equity market indices or other investments or strategies.

Risk of Investment in Event Driven Situations

The Fund may invest into companies in financial distress or undergoing a turnaround or issuers that are undervalued because of discrete extraordinary events. Investing in these situations will typically involve a higher degree of risk than investments in other issuers.

Concentration Risk

The Fund's portfolio at times be concentrated. Although concentration may increase the possibility of achieving significant investment returns, concentration of investments in a limited number of issuers, industries or sectors is generally regarded as increasing both relative investment risk and potential portfolio volatility.

General Economic and Market Risk

The success of the Fund's activities will be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws (including laws relating to taxation of the Fund's investments), and national and international political circumstances (including wars, terrorist acts or security operations). These factors may affect the level and volatility of securities prices and the liquidity of the Fund's investments.

Fund Risk

Risks particular to the Fund include that it could terminate, the fees and expenses could change and the service providers of the Fund could change. Investing in the Fund may give different results than investing directly in the underlying assets of the Fund due to income or capital gains treatment or due to the actions of third parties such as other investors.

Investment Manager Risk

There are risks associated with the operational and financial performance of the Investment Manager. In addition, key professionals could change affecting how the Fund is managed.

Currency Risk

The Fund will hold securities denominated in a currency other than Australian Dollars. Any change in the value of these currencies relative to the Australian dollar can impact (positively or negatively) on investment returns. The Investment Manager does not generally hedge the currency exposure in any way.

Counterparty and Third Party Risk

Returns may be affected if counterparties or third parties experience financial difficulty, fail to perform their services or meet their obligations in the manner anticipated by the Fund. Also any failing by a service provider to the Fund could impact on the value of the Fund or ability of an investor to access their investment.

Emerging and Frontier Market Risk

Securities located or doing business in emerging market or frontier countries may involve greater risk of loss and price fluctuation. The market for securities in emerging or frontier markets may be less liquid and more volatile than securities of more mature economies. This means the Fund could have greater difficulty buying or selling a security located or doing business in one of these jurisdictions.

Regulatory and Legal Risk

Governments or regulators may pass laws, create policy, or implement regulation that affects the Fund or its underlying investments or the Investment Manager's ability to execute its investment strategy, for example changes relating to securities transactions or exchange controls. These changes could impact on the value of the Fund's investments.

Cyber Security Risk

The Responsible Entity and Investment Manager as well as other service providers make extensive use of electronic systems. These apply at an investor level, to the Fund's investments and to the operational practices of those involved with the Fund and its investments. While each provider and those with which they do business have safeguards in place, there remains a risk of financial loss, disruption or damage from either internal or external, accidental or malicious conduct targeting of these electronic systems.

Pandemic and other unforeseen event risk

Health crises, such as pandemic and epidemic diseases, as well as other catastrophes that interrupt the expected course of events, such as natural disasters, war or civil disturbance, acts of terrorism, power outages and other unforeseeable and external events, and the public response to or fear of such diseases or events, have and may in the future have an adverse effect on the economies and financial markets either in specific countries or worldwide and consequently on the value of the Fund's investments. Further, under such circumstances the operations, including functions such as trading and valuation, of the Investment Manager, Fund Manager and other service providers could be reduced, delayed, suspended or otherwise disrupted.

Multiple unit class risk

The Fund offers separate classes of units for investment. The classes are not separate legal entities and the assets of each class will not be segregated. All of the assets of the Fund are available to meet all of its liabilities, regardless of the class to which such assets or liabilities are attributable. In practice, cross-class liability will usually only arise where any separate class becomes insolvent and is unable to meet all of its liabilities. In this case, all of the assets of the Fund attributable to other separate classes may be applied to cover the liabilities of the insolvent classes. If losses or liabilities are sustained by a class in excess of the assets attributable to such class, such excess may be apportioned to the other classes.

5. How we invest your money

Warning: When choosing to invest in the Fund or an option of the Fund, you should consider the likely investment returns, the risks of investing and your investment time frame.

Investment objective

The investment objective of the Fund is to generate long-term returns by investing in listed global equities and equity linked securities of mid- to large-cap global companies that are assessed by the Investment Manager as trading at a discount to their perceived intrinsic value.¹

¹Note the investment return objective is not intended to be a forecast. It is merely an indication of what Class A aims to achieve over the medium to long term on the assumption that equity markets remain relatively stable throughout the investment term. The Fund may not be successful in meeting this objective. Returns, capital and income are not guaranteed.

Benchmark

MSCI All Country World Index (Net) USD

Minimum suggested time frame

3 to 7 years

Risk level

The risk level of the Fund is high to extremely high.

Investor suitability

The Fund is generally suited for investors seeking capital appreciation in the medium to long term through exposure to global equities, including emerging market equities. The Fund does not intend to pay out any distributions on a regular basis. Any distributions will be made on an annual basis.

You should speak with your financial adviser before investing in the Fund.

Investment style and approach

The Fund invests in shares of mid- to large-cap global companies. The Fund's portfolio will generally consist of 45 to 90 companies identified using a disciplined, bottom-up, valuation-based investment approach based on fundamental research and a present value methodology. The Investment Manager utilises an initial quantitative screen to first filter the global universe to identify companies with a market capitalisation generally over USD \$1 billion and whose issued securities have a historical 6 month average daily traded value of at least USD\$25million. The Investment Manager then ranks this filtered group on key value metrics including, but not limited to: price to consensus forecast earnings, price to book value, dividend yield, normalised earnings yield (adjusted for return on invested capital). Companies within the top 20% of our screen rankings are prioritised for research by the Investment Manager's investment team. The Investment Manager builds detailed industry and company models to evaluate each company's long-term earnings power. This information is used in the Investment Manager's proprietary modelling to assess a company's intrinsic value and degree of undervaluation for both base case and in a stressed scenario. The Investment Manager will limit risk through undertaking regular stress tests and aiming to have the Fund diversified across industries, geographies and currencies. The Investment Manager assesses quality, ESG and economic conditions that could magnify risk. Portfolio construction is based on research conclusions from the valuation process.

Asset allocation

The Fund will invest in a portfolio of listed equities and equity linked securities which will typically amount to around 95% of the NAV of the Fund, the remainder will be in cash. The securities will be traded on equity markets across the globe, which may include the US, Australia and New Zealand as well as other developed and developing markets. There are no geographical exposure limits but the Fund will not typically invest more than 20% of its assets of the Fund (at the time of purchase) into a single industry and the Investment Manager will reduce positions if the concentration in an industry grows to 30% of the NAV of the Fund. The Fund may invest up to 35% of its assets in emerging markets. The Fund's asset allocation will generally be:

- Listed Equities – 95 to 100%
- Cash – up to 5%

Changing the investment strategy

The investment strategy and asset allocation parameters may be changed. If a change is to be made, investors in the Fund will be notified in accordance with the Corporations Act.

Labour Standards, Environmental, Social and Ethical Factors ("ESG considerations")

The Fund is not designed for investors who have specific labour standards or environmental, social or ethical (ESG) goals. The integration of ESG considerations into the investment process described below does not imply that the Fund is marketed or authorised as an ESG product in Australia.

Equity Trustees has delegated investment decisions including ESG considerations to the Investment Manager.

The Investment Manager integrates certain ESG considerations in the selection, retention and realisation of fund assets, to the extent that the Investment Manager considers those factors may have a material and quantifiable impact on the investment performance. The Investment Manager defines material ESG factors as those likely to have a significant impact on a company's long-term earnings, cost structure and/or business sustainability. The Investment Manager has developed a global ESG scoring framework which is used to identify potential ESG risks and opportunities at the initial stages of company research. Companies are scored on 13 ESG factors stemming from a larger compilation of ESG metrics using third-party data from reputable sources such as company reports, Bloomberg and CDP (Carbon Disclosure Project). Metric weightings, developed by the Investment Manager, are tailored to sectors - e.g., low emissions score is weighted more for an energy company than technology company.

The Investment Manager does not pre-define material ESG factors but consider a broad range of metrics including:

- Environmental: resource intensity, emissions intensity, waste management, environmental impact;
- Social: employee retention, diversity and safety, community impact;
- Governance: board independence and diversity, supply chain management, customer management, etc.

Where the impact of ESG factors is deemed material and quantifiable on a company's long-term earnings, the Investment Manager integrates that impact in its long-term forecasts and thereby into its portfolio decision making process. The evaluation of ESG risks and opportunities and implementation of applicable ESG-related investment restrictions rely on availability of timely, complete and accurate ESG data reported by issuers and/or third-party research providers. ESG data is often based on estimates or assumptions. To the extent relevant data is unavailable or inaccurate, Investment Manager's ability to evaluate ESG risks and opportunities and successfully implement applicable ESG-related investment restrictions may be limited. The Investment Manager's ESG Policy is reviewed and revised at least annually or more frequently if necessary. Policy revisions may reflect developments in ESG integration process or revisions in how the Investment Manager communicates its ESG process to clients. The Investment Manager monitors ESG information for portfolio companies on an ongoing basis and reflects any new material and quantifiable ESG factors, in company valuation inputs.

Where the Investment Manager believes that a company has demonstrated wilful disregard for ESG principles, it may choose to avoid or divest on a case by case basis. Where the Investment Manager chooses to divest due to ESG principles, it may do so within a timeframe it considers reasonable in all the circumstances. More information on the Investment Manager's ESG policy can be found at <https://www.argainvest.com/investing/#6>.

6. Fees and costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your investment balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower fees. Ask the Fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC) Moneysmart** website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

The information in the following Fees and Costs Summary can be used to compare costs between different simple managed investment schemes. Fees and costs can be paid directly from an investor's account or deducted from investment returns. For information on tax please see Section 7 of this PDS.

Additional Explanation of Fees and Costs

Management fees and costs

The management fees and costs include amounts payable for administering and operating the Fund, investing the assets of the Fund, expenses and reimbursements in relation to the Fund and indirect costs if applicable.

Management fees and costs do not include performance fees or transaction costs, which are disclosed separately.

The management fees component of management fees and costs of 0.80% p.a. of the NAV of the Class is payable to the Responsible Entity of the Fund for managing the assets and overseeing the operations of the Fund. The management fees component is accrued daily and paid from the Fund monthly in arrears and reflected in the unit price. As at the date of this PDS, the management fees component covers certain ordinary expenses such as Responsible Entity fees, investment management fees, custodian fees, and administration and audit fees.

The indirect costs and other expenses component of 0.00% p.a. of the NAV of the Class may include other ordinary expenses of operating the Fund, as well as management fees and costs (if any) arising from interposed vehicles in or through which the Fund may invest. The indirect costs and other expenses component is variable and reflected in the unit price of the Class as the relevant fees and costs are incurred. They are borne by investors, but they are not paid to the Responsible Entity or Investment Manager. The indirect costs and other expenses component is based on a reasonable estimate of the costs for the current financial year to date, adjusted to reflect a 12 month period.

In relation to the costs that have been estimated, they have been estimated on the basis of the expected seeding investments.

Actual indirect costs for the current and future years may differ. If in future there is an increase to indirect costs disclosed in this PDS, updates will be provided on Equity Trustees' website at www.eqt.com.au/insto where they are not otherwise required to be disclosed to investors under law.

Performance fees

No performance fees apply to the Fund.

Transaction costs

In managing the assets of the Fund, the Fund may incur transaction costs such as brokerage, buy-sell spreads in respect of the underlying investments of the Fund, settlement costs, clearing costs and applicable stamp duty when assets are bought and sold. Transaction costs also include costs incurred by interposed vehicles in which the Fund invests (if any), that would have been transaction costs if they had been incurred by the Fund itself. Transaction costs are an additional cost to the investor where they are not recovered by the Buy/Sell Spread, and are generally incurred when the assets of the Fund are changed in connection with day-to-day trading or when there are applications or withdrawals which cause net cash flows into or out of the Fund.

The Buy/Sell Spread that is disclosed in the Fees and Costs Summary is a reasonable estimate of transaction costs that the Class will incur when buying or selling assets of the Class. These costs are an additional cost to the investor but are incorporated into the unit price and arise when investing application monies and funding withdrawals from the Class and are not separately charged to the investor. The Buy Spread is paid into the Class as part of an application and the Sell Spread is left in the Class as part of a redemption and not paid to Equity Trustees or the Investment Manager. The estimated Buy/Sell Spread is 0.20% upon entry and 0.15% upon exit. The dollar value of these costs based on an application of \$25,000 is \$50 for each individual application and for a withdrawal of \$25,000 is \$37.5 for each withdrawal. The Buy/Sell Spread can be altered by the Responsible Entity at any time and www.eqt.com.au/insto will be updated as soon as practicable to reflect any change. The Responsible Entity may also waive the Buy/Sell Spread in part or in full at its discretion. The transaction costs figure in the Fees and Costs Summary is shown net of any amount recovered by the Buy/Sell Spread charged by the Responsible Entity.

Transaction costs generally arise through the day-to-day trading of the Fund's assets and are reflected in the Class's unit price as an additional cost to the investor, as and when they are incurred.

The gross transaction costs for the Class are 0.17% p.a. of the NAV of the Class, which is based on a reasonable estimate of the costs for the current financial year to date, adjusted to reflect a 12 month period.

In relation to the costs that have been estimated, they have been estimated on the basis of the expected seeding investments.

However, actual transaction costs for future years may differ.

Can the fees change?

Yes, all fees can change without investor consent, subject to the maximum fee amounts specified in the Constitution. The current maximum management fee to which Equity Trustees is entitled is 2.00% of the GAV of the Fund. However, Equity Trustees does not intend to charge that amount and will generally provide investors with at least 30 days' notice of any proposed increase to the management fees component of management fees and costs. In most circumstances, the Constitution defines the maximum level that can be charged for fees described in this PDS. Equity Trustees also has the right to recover all reasonable expenses incurred in relation to the proper performance of its duties in managing the Fund and as such these expenses may increase or decrease accordingly, without notice.

Payments to IDPS Operators

Subject to the law, annual payments may be made to some IDPS Operators because they offer the Fund on their investment menus. Product access is paid by the Investment Manager out of the fee it receives and is not an additional cost to the investor.

Differential fees

The Investment Manager may from time to time negotiate a different fee arrangement (by way of a rebate or waiver of fees) with certain investors who are Australian Wholesale Clients. Please contact the Investment Manager for further information.

Example of annual fees and costs for an investment option

This table gives an example of how the ongoing annual fees and costs in the investment option for this product can affect your investment over a 1-year period. You should use this table to compare this product with other products offered by managed investment schemes.

EXAMPLE – ARGA Global Equity Australia Fund Class A		
BALANCE OF \$50,000 WITH A CONTRIBUTION OF \$5,000 DURING THE YEAR		
Contribution Fees	Nil	For every additional \$5,000 you put in, you will be charged \$0
Plus Management fees and costs	0.80% p.a.	And , for every \$50,000 you have in the ARGA Global Equity Australia Fund Class A you will be charged or have deducted from your investment \$400 each year
Plus Performance fees	Not applicable	And , you will be charged or have deducted from your investment \$0 in performance fees each year
Plus Transaction costs	0.00% p.a.	And , you will be charged or have deducted from your investment \$0 in transaction costs
Equals Cost of ARGA Global Equity Australia Fund Class A		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees and costs of: \$400* What it costs you will depend on the investment option you choose and the fees you negotiate.

* Additional fees may apply. Please note that this example does not capture all the fees and costs that may apply to you such as the Buy/Sell Spread.

This example assumes the \$5,000 contribution occurs at the end of the first year, therefore the fees and costs are calculated using the \$50,000 balance only.

Warning: If you have consulted a financial adviser, you may pay additional fees. You should refer to the Statement of Advice or Financial Services Guide provided by your financial adviser in which details of the fees are set out.

ASIC provides a fee calculator on www.moneysmart.gov.au, which you may use to calculate the effects of fees and costs on account balances.

The indirect costs and other expenses component of management fees and costs and transaction costs may also be based on estimates. As a result, the total fees and costs that you are charged may differ from the figures shown in the table.

Further reading

You should read the important information in the Reference Guide about fees and costs under the "Additional information on fees and costs" section before making a decision. Go to the Reference Guide which is available at www.eqt.com.au/insto. The material relating to these matters may change between the time when you read this PDS and the day when you acquire the product.

7. How managed investment schemes are taxed

Warning: Investing in a registered managed investment scheme (such as the Fund) is likely to have tax consequences. You are strongly advised to seek your own professional tax advice about the applicable Australian tax (including income tax, GST and duty) consequences and, if appropriate, foreign tax consequences which may apply to you based on your particular circumstances before investing in the Fund.

The Fund is an Australian resident for tax purposes and does not generally pay tax on behalf of its investors. Australian resident investors are assessed for tax on any income and capital gains generated by the Fund to which they become presently entitled or, where the Fund has made a choice to be an Attribution Managed Investment Trust ("AMIT") and the choice is effective for the income year, are attributed to them.

Further reading

You should read the important information in the Reference Guide about Taxation under the "Other important information" section before making a decision. Go to the Reference Guide which is available at www.eqt.com.au/insto. The material relating to these matters may change between the time when you read this PDS and the day when you acquire the product.

8. How to apply

To invest please complete the Application Form accompanying this PDS, send funds (see details in the Application Form) and your completed Application Form to:

Apex Fund Services Pty Limited
Unit Registry Services
GPO Box 4968
Sydney NSW 2001

Please note that cash and cheques cannot be accepted and all applications must be made in Australian dollars.

Who can invest?

Eligible persons (as detailed in the 'About this PDS' section) can invest, however individual investors must be 18 years of age or over. Investors investing through an IDPS should use the application form provided by their IDPS Operator.

Cooling off period

No cooling off period applies to the offer made in this PDS, as the units offered under this PDS are only available to Wholesale Clients. Indirect Investors should seek advice from their IDPS Operator as to whether cooling off rights apply to an investment in the Fund by the IDPS. The right to cool off in relation to the Fund is not directly available to an Indirect Investor. This is because an Indirect Investor does not acquire the rights of a unit holder in the Fund. Rather, an Indirect Investor directs the IDPS Operator to arrange for their monies to be invested in the Fund on their behalf. The terms and conditions of the IDPS Guide or similar type document will govern an Indirect Investor's investment in relation to the Fund and any rights an Indirect Investor may have in this regard.

Once provided, your TFN will be applied automatically to any future investments in the Fund/Trust where formal application procedures are not required (e.g. distribution reinvestments), unless you indicate, at any time, that you do not wish to quote a TFN for a particular investment. Exempt investors should attach a copy of the certificate of exemption. For super funds or trusts list only the applicable ABN or TFN for the super fund or trust.
