

EQT RELEASE

25 August 2008

Equity Trustees systems upgrade

Equity Trustees Limited (ASX: EQT) with Bravura Solutions (Bravura, ASX: BVA) has successfully completed the first stage of a systems upgrade with the introduction of the Talisman system.

Talisman is an application for administering wrap platforms, master trusts, retail / wholesale unit trusts and retirement products such as superannuation plans, pensions, annuities and provident funds.

Equity Trustees' Managing Director, Peter Williams said the program is offering a further avenue for the organisation to capitalise on.

"The upgraded system is allowing us to work more efficiently and with considerable improvements across a wide range of services. This will allow us to increase service performance to our client base."

Equity Trustees' Head of Information Technology, Karen Symes said Talisman demonstrates richer features than previous systems, and is effectively assisting teams to work at a more advanced level.

Over the next 12 months Equity Trustees is working towards further integrating its business process platform.

Equity Trustees will work towards the implementation of the Sonata product which is an enterprise-wide wealth management platform. In the longer term, the company will upgrade to the Garradin system which will further integrate key services including Asset Management, Unit Registry, Fiduciary Accounting and Taxation.
