1. About Equity Trustees Limited

The Responsible Entity

Equity Trustees Limited

Equity Trustees Limited ABN 46 004 031 298 AFSL 240975, a subsidiary of EQT Holdings Limited ABN 22 607 797 615, which is a public company listed on the Australian Securities Exchange (ASX: EQT), is the Fund's responsible entity and issuer of this PDS. Established as a trustee and executorial service provider by a special Act of the Victorian Parliament in 1888, today Equity Trustees is a dynamic financial services institution which continues to grow the breadth and quality of products and services on offer.

Equity Trustees' responsibilities and obligations as the Fund's responsible entity are governed by the Fund's constitution ("Constitution"), the Corporations Act and general trust law. Equity Trustees has appointed GuardCap Asset Management Limited as the investment manager of the Fund. Equity Trustees has appointed a custodian to hold the assets of the Fund. The custodian has no supervisory role in relation to the operation of the Fund and is not responsible for protecting your interests.

The Investment Manager

GuardCap Asset Management Limited

The investment manager is GuardCap Asset Management Limited ("GuardCap" or "Investment Manager"), a specialist investment company based in London, United Kingdom. GuardCap is a wholly-owned subsidiary of Guardian Capital Group Limited, a Canadian group founded in 1962 and whose shares are quoted on the Toronto Stock Exchange. GuardCap is focused solely on managing concentrated, bottom-up, global equities strategies constructed on an 'index-agnostic' basis for investors. They are responsible for designing and managing the composition of the portfolio of the Fund in accordance with the investment strategy detailed below.

2. How the GuardCap Global Equity Fund - Hedged Class works

The Fund is a class of units in a registered managed investment scheme governed by the Constitution. The Fund comprises assets which are acquired in accordance with the Fund's investment strategy. Direct investors receive units in the Class when they invest. In general, each unit represents an equal interest in the assets of the Class subject to liabilities; however, it does not give investors an interest in any particular asset of the Class.

If you invest in the Fund through an IDPS (as defined in the Reference Guide) you will not become an investor in the Fund. The operator or custodian of the IDPS will be the investor entered in the Fund's register and will be the only person who is able to exercise the rights and receive the benefits of a direct investor. Your investment in the Fund through the IDPS will be governed by the terms of your IDPS. Please direct any queries and requests relating to your investment to your IDPS Operator. Unless otherwise stated, the information in the PDS applies to direct investors.

Applying for units

You can acquire units by completing the Application Form that accompanies this PDS. The minimum initial investment amount for the Class is \$20,000.

Completed Application Forms should be sent along with your identification documents (if applicable) to:

Apex Fund Services Pty Ltd
Client Services Registry Team
GPO Box 4968
Sydney, NSW, 2001

Please note that cash and cheques cannot be accepted.

We reserve the right to accept or reject applications in whole or in part at our discretion. We have the discretion to delay processing applications where we believe this to be in the best interest of the Fund's investors.

The price at which units are acquired is determined in accordance with the Constitution ("Application Price"). The Application Price on a Business Day is, in general terms, equal to the Net Asset Value ("NAV") of the Class, divided by the number of units on issue and adjusted for transaction costs ("Buy Spread"). At the date of this PDS, the Buy Spread is 0.25%.

The Application Price will vary as the market value of assets in the Class rises or falls.

Making additional investments

You can make additional investments into the Class at any time by sending us your additional investment amount together with a completed Application Form. The minimum additional investment into the Fund is \$10,000.

Distributions

An investor's share of any distributable income is calculated in accordance with the Constitution and is generally based on the number of units held by the investor at the end of the distribution period.

The Fund usually distributes income annually at the end of June, however, Equity Trustees may change the distribution frequency without notice. Distributions are calculated effective the last day of the distribution period and are normally paid to investors as soon as practicable after the distribution calculation date.

Investors in the Fund can indicate a preference to have their distribution:

- reinvested back into the Fund; or
- directly credited to their AUD Australian domiciled bank account.

Investors who do not indicate a preference will have their distributions automatically reinvested. Applications for reinvestment will be taken to be received immediately prior to the next Business Day after the relevant distribution period. There is no Buy Spread on distributions that are reinvested.

In some circumstances, the Constitution may allow for an investor's withdrawal proceeds to be taken to include a component of distributable income.

Indirect Investors should review their IDPS Guide for information on how and when they receive any income distribution.

Access to your money

Investors in the Fund can generally withdraw their investment by completing a written request to withdraw from the Fund and mailing it to:

Apex Fund Services Pty Ltd
Client Services Registry Team
GPO Box 4968
Sydney, NSW, 2001

Or sending it by fax to +61 2 9251 3525

The minimum withdrawal amount is \$10,000. Once we receive and accept your withdrawal request, we may act on your instruction without further enquiry if the instruction bears your account number or investor details and your (apparent) signature(s), or your authorised signatory's (apparent) signature(s).

Equity Trustees will generally allow an investor to access their investment within 5 days of acceptance of a withdrawal request by transferring the withdrawal proceeds to such investor's nominated bank account. However, Equity Trustees is allowed to reject withdrawal requests, and also to make payment up to 21 days after acceptance of a request (which may be extended in certain circumstances) as outlined in the Constitution and Reference Guide.

We reserve the right to accept or reject withdrawal requests in whole or in part at our discretion.

The price at which units are withdrawn is determined in accordance with the Constitution ("Withdrawal Price"). The Withdrawal Price on a Business Day is, in general terms, equal to the NAV of the Class, divided by the number of units on issue and adjusted for transaction costs ("Sell Spread"). At the date of this PDS, the Sell Spread is 0.25%.

The Withdrawal Price will vary as the market value of assets in the Class rises or falls.

Equity Trustees reserves the right to fully redeem your investment if your investment balance in the Class falls below \$10,000 as a result of processing your withdrawal request. In certain circumstances, for example, when there is a freeze on withdrawals, where accepting a withdrawal is not in the best interests of investors in the Fund including due to one or more circumstances outside its control or where the Fund is not liquid (as defined in the Corporations Act), Equity Trustees can deny or suspend a withdrawal request and you may not be able to withdraw your funds in the usual processing times or at all. When the Fund is not liquid, an investor can only withdraw when Equity Trustees makes a withdrawal offer to investors in accordance with the Corporations Act. Equity Trustees is not obliged to make such offers.

If you are an Indirect Investor, you need to provide your withdrawal request directly to your IDPS Operator. The time to process a withdrawal request will depend on the particular IDPS Operator and the terms of the IDPS.

Unit pricing discretions policy

Equity Trustees has developed a formal written policy in relation to the guidelines and relevant factors taken into account when exercising any discretion in calculating unit prices (including determining the value of the assets and liabilities). A copy of the policy and, where applicable and to the extent required, any other relevant documents in relation to the policy will be made available free of charge on request.

Additional information

If and when the Fund has 100 or more direct investors, it will be classified by the Corporations Act as a 'disclosing entity'. As a disclosing entity, the Fund will be subject to regular reporting and disclosure obligations. Investors would then have a right to obtain a copy, free of charge, of any of the following documents:

- the most recent annual financial report lodged with ASIC ("Annual Report");
- any subsequent half yearly financial report lodged with ASIC after the lodgement of the Annual Report; and
- any continuous disclosure notices lodged with ASIC after the Annual Report but before the date of this PDS.

Equity Trustees will comply with any continuous disclosure obligation by lodging documents with ASIC as and when required.

Copies of these documents lodged with ASIC in relation to the Fund may be obtained from ASIC through ASIC's website.

3. Benefits of investing in the GuardCap Global Equity Fund - Hedged Class

The main features and potential benefits of the Fund include:

- access to GuardCap's investment management expertise and experience;
- access to investment opportunities that may not otherwise be available to all investors; and
- access to global equity securities.

GuardCap's investment strategy exploits what it believes to be a pervasive, ongoing anomaly in the way equity markets work: that markets focus primarily on recent events and the short-term future. In GuardCap's view, they often do not attribute sufficient value to the longer term earnings and cash flows of sustainably growing companies.

The GuardCap investment strategy emphasises long term thinking, long term forecasting and long holding periods in order to exploit this.

The strategy involves investing in 20-25 companies, each of which is capable of generating sustained long term earnings and cash flow growth, demonstrates superior quality characteristics and is undervalued in relation to its long term earnings and cash flows.

The investment philosophy described above is applied through a research-intensive, collaborative process designed to create a concentrated portfolio of companies, each having significantly better quality and growth characteristics than the market average and each being undervalued in relation to its long-term future earnings and cash flows.

4. Risks of managed investment schemes

All investments carry risks. Different investment strategies may carry different levels of risk, depending on the assets acquired under the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk. The significant risks below should be considered in light of your risk profile when deciding whether to invest in the Fund. Your risk profile will vary depending on a range of factors, including your age, the investment time frame (how long you wish to invest for), your other investments or assets and your risk tolerance.

The Responsible Entity and the Investment Manager do not guarantee the liquidity of the Fund's investments, repayment of capital or any rate of return or the Fund's investment performance. The value of the Fund's investments will vary. Returns are not guaranteed, and you may lose money by investing in the Fund. The level of returns will vary and future returns may differ from past returns. Laws affecting managed investment schemes may change in the future. The structure and administration of the Fund is also subject to change.

In addition, we do not offer advice that takes into account your personal financial situation, including advice about whether the Fund is suitable for your circumstances. If you require personal financial or taxation advice, you should contact a licensed financial adviser and/or taxation adviser.

Market risk

This is the risk that an entire market, country or economy changes in value or becomes more volatile, including the risk that the country's credit rating is downgraded (which reduces the nation's perceived creditworthiness), the purchasing power of currency changes (either through inflation or deflation), and/or other market-wide factors, like economic growth or the unemployment rate, deteriorate (which can cause a reduction in the value of the Fund and increase its volatility). Amongst many other things, adverse changes in economic, financial, technological, political or legal conditions, as well as natural and manmade disasters, conflicts and shifts in market sentiment, may potentially cause a reduction in the value of the Fund and increase its volatility.

Interest rate risk

This is the risk that movements in interest rates will adversely affect the price of the Fund's investments and impact investment returns. Typically, the value of a security will decline due to a rise in interest rates.

Service provider risk

There is a risk that any company providing services such as the safekeeping of assets may become insolvent or cannot or will not otherwise perform in accordance with the terms of the transaction or arrangement.

Currency risk

The Fund is exposed to currencies other than the base currency and is subject to currency fluctuations which could result in losses to the Fund. The Investment Manager will hedge currency exposure in an attempt to reduce the effects of currency fluctuations in the value of the Australian dollar relative to alternative currencies. Hedging levels may vary.

Derivatives risk

The Class may use derivatives. Risks associated with using these tools might include the values of the derivatives failing to move in line with the underlying assets, potential illiquidity of the derivatives and counterparty risk which may adversely affect the value of the investments of the Class.

Emerging markets risk

Exposure to foreign markets, especially emerging markets, through issuers or currencies can involve additional risks relating to market, economic, industry, political, regulatory, geopolitical, and other conditions. These factors can make foreign investments, especially those in emerging markets, more volatile and less liquid than Australian investments. In addition, foreign markets can react differently to these conditions than the Australian market. Emerging markets can have less developed markets, greater custody and operational risk, less developed legal, regulatory, and accounting systems, and greater political, social, and economic instability than developed markets.

Legal risk

The Fund may be affected by the actions of governments and regulatory bodies. Legislation and regulations may change which may inhibit the Fund from pursuing its strategy or otherwise efficiently operating the Fund. The risk is generally higher in emerging markets.

Fund risk

As with all managed investment schemes, there are risks particular to the Fund including, the possibility that the Fund could be terminated, the fees and expenses could change, Equity Trustees could be replaced as Responsible Entity, and the Investment Manager could be replaced. There is also risk that investing in the Fund may give different results than investing directly in the underlying securities. This might occur because of income or capital gains accrued in the Fund and the consequences of redemptions by other investors. There is also a possibility of Cross Unit Risk, where, for example, if there is insufficient collateral to cover any of the FX contracts, there is a risk the counterparty can take funding from the unhedged class.

Company/Asset specific risk

This is the risk where the value of a company or asset falls because of changes to management, product, distribution or the company's business environment.

Management risk

There is no guarantee that the investment techniques and risk analyses used in making investment decisions for the Fund will produce the desired results.

International risk

International investments may be affected by movements in foreign currency exchange rates, interest rates, political and economic uncertainties, lower regulatory supervision and more volatile, less liquid markets compared with Australian investments.

Concentration risk

The Fund will generally seek to diversify portfolio investments on behalf of the Fund; however, a significant percentage of the Fund's assets may be invested from time to time in groups of issuers deriving significant revenues from the same market, region or industry. To the extent the Fund makes such investments, the exposure to credit and market risks associated with such market, region or industry will be increased.

Pandemic and other unforeseen event risk

Health crises, such as pandemic and epidemic diseases, as well as other catastrophes that interrupt the expected course of events, such as natural disasters, war or civil disturbance, acts of terrorism, power outages and other unforeseeable and external events, and the public response to or fear of such diseases or events, have and may in the future have an adverse effect on the economies and financial markets either in specific countries or worldwide and consequently on the value of the Fund's investments. Further, under such circumstances the operations, including functions such as trading and valuation, of the Investment Manager, Fund Manager and other service providers could be reduced, delayed, suspended or otherwise disrupted.

Sustainability risk

The Fund is subject to the risk that environmental, social or governance conditions or events may occur that may have a material negative impact on the value of its investments.

Investment style and approach

The central part of the investment process is the stock selection process which is based on intensive analysis of a limited universe of companies, with the Investment Managers' confidence increasing as the company passes through each analytical phase. The analysis is focused on determining whether the company meets 10 key "Confidence Criteria", and valuation criteria. In-depth due diligence with a long-term investment horizon is a hallmark of all parts of the process.

GuardCap will invest primarily in shares and related instruments of shares issued by high quality companies and listed in countries which are members of the Organisation of Economic Co-operation and Development ("OECD") and which in the opinion of GuardCap has all or most of the following "Confidence Criteria":

- proven track record of quality growth;
- secular growth business: secular growth businesses are businesses that are less exposed to general business cycles and may grow sustainably and more quickly than the average company over the long-term. Such businesses often benefit from secular growth trends, for example, the switch from the use of cheque and cash to electronic payment methodologies;
- sustainable competitive advantage of the company's products and services over its major competitors;
- high returns on invested capital in absolute terms and compared to sector peers;
- excellent management: in assessing the quality of a company's management, GuardCap will consider a variety of factors including the company's management history in relation to revenue growth, earnings per share, cash flow, progressions in return on capital, conservative use of the balance sheet, executive remuneration policies in line with shareholder objectives, and strength of corporate governance including a strong and independent board of directors;
- strong balance sheets, with net debt less than 5 years' forecast free cash flows from the business;
- well diversified sources of revenue;
- sufficient business maturity: size, stability, reliability and sustainability of revenue sources;
- strong free cash flow with good cash conversion rates; and
- good standards in all areas of environmental, social and corporate governance practices (see "Labour, environmental, social and ethical considerations" below).

GuardCap only invests in companies which meet all or most of the 10 criteria set out above and only if they are not assessed as overvalued at time of purchase, according to two valuation techniques employed simultaneously by the Investment Manager (discounted cashflow and terminal PE).

By investing in companies with these characteristics which, in the Investment Manager's view demonstrate proven quality and sustainable growth, the Investment Manager aims to generate a level of volatility below that of the benchmark.

The Fund will not invest more than 20% of its net assets in emerging markets.

Asset allocation

	Expected long term target*		
	Minimum	Maximum	target*
International Shares	90%	100%	98%
Cash	0%	10%	2%

*The Investment Manager does not target a particular strategic asset allocation. The long-term target represents the Investment Manager's indicative expected long-term average asset position.

Changing the investment strategy

The investment strategy and asset allocation parameters may be changed. If a change is to be made, investors in the Fund will be notified in accordance with the Corporations Act.

Labour, environmental, social and ethical considerations

GuardCap is a signatory of the UN Principles for Responsible Investment (UN PRI). As such, GuardCap is committed to upholding the six principles of the UN PRI: <https://www.unpri.org/pri/an-introduction-to-responsible-investment/what-are-the-principles-for-responsible-investment>.

GuardCap's investment approach offers:

- An integrated approach to environmental, social and governance (ESG) considerations – ESG factors are taken into account throughout the investment process;
- Commitment to full transparency on analysis and engagement activities;
- Commitment to the highest standards of corporate stewardship and active ownership. Team-based, case-by-case analysis before voting decisions.

ESG as part of the Investment Process

An analysis of a company's ESG issues forms a key part of every investment decision. GuardCap believes that a comprehensive analysis of a company's business and growth potential has to incorporate all material risks and opportunities, including ESG-related risks and opportunities. This analysis is at the core of GuardCap's investment process with a focus on whether and how these risks and opportunities will affect the long-term sustainability of the company's competitive positioning and capacity for sustained long-term growth.

ESG-related risks and opportunities are considered from the early stages of idea generation and throughout the research process. All companies are scored on 10 Confidence Criteria (as outlined in the "Investment style and approach" section above) and weak performance in any of these criteria could preclude investing in the company. One of the criteria is "Foundations for Sustainable Growth" (FSG), through which GuardCap explicitly considers whether any of the company's practices or risk exposures conflict with its objective of investing in companies capable of generating long-term sustainable growth - this being the key source of alpha in GuardCap's investment process.

With this in mind, GuardCap seeks companies that demonstrate good corporate governance practices in terms of management structure and remuneration processes, high quality reporting and disclosure and strong environmental and social commitments. For example, if a company under coverage is viewed to be irresponsibly polluting the environment or mistreating its employees or the communities in which it operates, GuardCap would view this as a compromise to the company's ability to sustain superior growth over the long-term and it would not be included in the portfolio.

Furthermore, GuardCap's investment approach steers it away from the most environmentally damaging and controversial sectors such as energy, mining, commodity chemicals and heavy industry, because companies in these sectors typically fail a number of GuardCap's quality and growth criteria. In particular, these sectors display high cyclicality and typically have low returns on investment capital.

GuardCap aims to go well beyond simplistic "box ticking" and considers any controversial issues on a case-by-case basis. For example, one of the companies GuardCap invests in is penalised in their score by rating agencies due to existence of double voting rights, whereby only shareholders that have been in the register for over two years are granted full voting rights. Rather than a negative, GuardCap views this as a positive action to encourage a long-term shareholder base, which in turn will allow the company to make long-term strategic decisions. GuardCap views this as a genuine attempt to avoid the short termism that plagues so much of corporate decision making. GuardCap is a long-term shareholder and wants to invest in companies that have the flexibility and long-term oriented culture to achieve strong compounding earnings growth over a long-term time horizon.

GuardCap uses data from external ESG data providers to see whether they highlight any areas of controversy in the company's ESG practices. If so, GuardCap conducts further analysis on these issues to assess the implications.

In some cases, GuardCap's assessment and conclusions might differ from that of the external providers. They serve a different purpose and have diverse users whose ESG criteria might not completely align with GuardCap's holistic "FSG" approach. GuardCap takes an absolute approach to assessing companies' capacity for sustainable long-term growth.

Engagement

GuardCap undertakes a range of engagement activities and meets with the management of companies at regular intervals as an important component of its investment process. This allows GuardCap to challenge companies on their strategy, performance and risk, capital structure and their social/environmental impact. GuardCap's investment teams would not invest in any company before having had contact with it in advance and meets with companies in the pool of investible companies as part of the team's ongoing maintenance research. Please refer to the following link for GuardCap's Engagement Policy: <https://www.guardcap.co.uk/media/1157/guardcap-engagement-policy.pdf>

Corporate Stewardship and Voting

GuardCap's Stewardship Code explicitly supports the seven principles of the UK Stewardship Code, which is overseen and published by the Financial Reporting Council. GuardCap's Stewardship Code sets out how GuardCap complies with these seven principles. GuardCap's Stewardship Code disclosure is available from the GuardCap website via the following link: <https://www.guardcap.co.uk/media/1154/guardcap-stewardship-code-2020.pdf>

GuardCap uses Institutional Shareholder Services to provide proxy voting information and provide recommendations of how to vote for each investee company's general meeting. However, voting decisions are determined by the investment management teams. All voting decisions are actively considered on a case-by-case basis. This is one of the benefits of managing concentrated portfolios and GuardCap's collaborative process where all investment management teams have a detailed understanding of the companies under consideration.

The voting process is fully documented and records of voting are placed on the website of GuardCap's parent company, Guardian Capital Group and can be accessed via this link: <https://www.guardiancapital.com/library?tab=4&sort=date>

Reporting on Our ESG Activities

GuardCap commits to keeping records of ESG analysis and engagement activities, and making them available to clients and to the PRI organisation. GuardCap is a signatory to the PRI organisation, which is an investor initiative in partnership with the United Nations Environment Programme Finance Initiative (UNEP FI) and the United Nations Global Compact. The PRI's stated aims are to achieve a sustainable global financial system by encouraging adoption of six Principles for Responsible Investing and collaboration on their implementation; by fostering good governance, integrity and accountability; and by addressing obstacles to a sustainable financial system that lie within market practices, structures and regulation.

GuardCap undertakes to provide information on holdings, upon request, to clients who wish to know about situations where GuardCap's opinion or conclusions differ from those of the external ESG rating agencies or general media.

6. Fees and costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your investment balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower fees. Ask the fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the Australian Securities and Investments Commission (ASIC) Moneysmart website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

The information in the following Fees and Costs Summary can be used to compare costs between different simple managed investment schemes. Fees and costs can be paid directly from an investor's account or deducted from investment returns. For information on tax please see Section 7 of this PDS.

Management fees and costs

The management fees and costs include amounts payable for administering and operating the Fund, investing the assets of the Fund, expenses and reimbursements in relation to the Fund and indirect costs if applicable.

Management fees and costs do not include performance fees or transaction costs, which are disclosed separately.

The management fees component of management fees and costs of 1.00% p.a. of the NAV of the Class is payable to the Responsible Entity of the Fund for managing the assets and overseeing the operations of the Fund. The management fees component is accrued daily and paid from the Class monthly in arrears and reflected in the unit price. The indirect costs and other expenses component of 0.00%p.a. of the NAV of the Class may include other ordinary expenses of operating the Fund, as well as management fees and costs (if any) arising from interposed vehicles in or through which the Fund invests. The indirect costs and other expenses component is variable and reflected in the unit price of the Class as the relevant fees and costs are incurred. They are borne by investors, but they are not paid to the Responsible Entity or Investment Manager. The indirect costs and other expenses component is based on a reasonable estimate of the costs for the current financial year to date, adjusted to reflect a 12 month period.

In relation to the costs that have been estimated, they have been estimated on the basis of relevant information for a similar product offering in the market offered by the Investment Manager.

Actual indirect costs for the current and future years may differ. If in future there is an increase to indirect costs disclosed in this PDS, updates will be provided on Equity Trustees' website at www.eqt.com.au/insto where they are not otherwise required to be disclosed to investors under law.

Transaction costs

In managing the assets of the Fund, the Fund may incur transaction costs such as brokerage, buy-sell spreads in respect of the underlying investments of the Fund, settlement costs, clearing costs and applicable stamp duty when assets are bought and sold. Transaction costs also include costs incurred by interposed vehicles in which the Fund invests (if any), that would have been transaction costs if they had been incurred by the Fund itself. Transaction costs are an additional cost to the investor where they are not recovered by the Buy/Sell Spread, and are generally incurred when the assets of the Fund are changed in connection with day-to-day trading or when there are applications or withdrawals which cause net cash flows into or out of the Fund.

The Buy/Sell Spread that is disclosed in the Fees and Costs Summary is a reasonable estimate of transaction costs that the Class will incur when buying or selling assets of the Class. These costs are an additional cost to the investor but are incorporated into the unit price and arise when investing application monies and funding withdrawals from the Class and are not separately charged to the investor. The Buy Spread is paid into the Class as part of an application and the Sell Spread is left in the Class as part of a redemption and not paid to Equity Trustees or the Investment Manager. The estimated Buy/Sell Spread is 0.25% upon entry and 0.25% upon exit. The dollar value of these costs based on an application or a withdrawal of \$20,000 is \$50 for each individual transaction. The Buy/Sell Spread can be altered by the Responsible Entity at any time and www.eqt.com.au/insto will be updated as soon as practicable to reflect any change. The Responsible Entity may also waive the Buy/Sell Spread in part or in full at its discretion. The transaction costs figure in the Fees and Costs Summary is shown net of any amount recovered by the Buy/Sell Spread charged by the Responsible Entity.

Transaction costs generally arise through the day-to-day trading of the Class's assets and are reflected in the Class's unit price as an additional cost to the investor, as and when they are incurred.

The gross transaction costs for the Class are 0.05% p.a. of the NAV of the Class, which is based on a reasonable estimate of the costs for the current financial year to date, adjusted to reflect a 12 month period.

In relation to the costs that have been estimated, they have been estimated on the basis of relevant information for a similar product offering in the market offered by the Investment Manager.

However, actual transaction costs for future years may differ.

Can the fees change?

Yes, all fees can change without investor consent, subject to the maximum fee amounts specified in the Constitution. The current maximum management fee to which Equity Trustees is entitled is 2.00% of the GAV of the Class. However, Equity Trustees does not intend to charge that amount and will generally provide investors with at least 30 days' notice of any proposed increase to the management fees component of management fees and costs. In most circumstances, the Constitution defines the maximum level that can be charged for fees described in this PDS. Equity Trustees also has the right to recover all reasonable expenses incurred in relation to the proper performance of its duties in managing the Fund and as such these expenses may increase or decrease accordingly, without notice.

Payments to IDPS Operators

Subject to the law, annual payments may be made to some IDPS Operators because they offer the Fund on their investment menus. Product access is paid by the Investment Manager out of its investment management fee and is not an additional cost to the investor.

Differential fees

The Investment Manager may from time to time negotiate a different fee arrangement (by way of a rebate or waiver of fees) with certain investors who are Australian Wholesale Clients. Please contact the Investment Manager on +44 20 7907 2400 for further information.

Example of annual fees and costs for an investment option

This table gives an example of how the ongoing annual fees and costs in the investment option for this product can affect your investment over a 1-year period. You should use this table to compare this product with other products offered by managed investment schemes.

EXAMPLE – GuardCap Global Equity Fund - Hedged Class

BALANCE OF \$50,000 WITH A CONTRIBUTION OF \$5,000 DURING THE YEAR

Contribution Fees	Nil	For every additional \$5,000 you put in, you will be charged \$0
Plus Management fees and costs	1.00% p.a.	And , for every \$50,000 you have in the GuardCap Global Equity Fund - Hedged Class you will be charged or have deducted from your investment \$500 each year
Plus Performance fees	Not applicable	And , you will be charged or have deducted from your investment \$0 in performance fees each year
Plus Transaction costs	0.00% p.a.	And , you will be charged or have deducted from your investment \$0 in transaction costs
Equals Cost of GuardCap Global Equity Fund - Hedged Class		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees and costs of: \$500* What it costs you will depend on the investment option you choose and the fees you negotiate.

* Additional fees may apply. Please note that this example does not capture all the fees and costs that may apply to you such as the Buy/Sell Spread.

This example assumes the \$5,000 contribution occurs at the end of the first year, therefore the fees and costs are calculated using the \$50,000 balance only.

Warning: If you have consulted a financial adviser, you may pay additional fees. You should refer to the Statement of Advice or Financial Services Guide provided by your financial adviser in which details of the fees are set out.

ASIC provides a fee calculator on www.moneysmart.gov.au, which you may use to calculate the effects of fees and costs on account balances.

The indirect costs and other expenses component of management fees and costs and transaction costs may also be based on estimates. As a result, the total fees and costs that you are charged may differ from the figures shown in the table.

You should read the important information in the Reference Guide about fees and costs under the "Fees and other costs" section before making a decision. 7. How managed investment schemes are taxed

Warning: Investing in a registered managed investment scheme (such as the Fund) is likely to have tax consequences. You are strongly advised to seek your own professional tax advice about the applicable Australian tax (including income tax, GST and duty) consequences and, if appropriate, foreign tax consequences which may apply to you based on your particular circumstances before investing in the Fund.

The Fund is an Australian resident for tax purposes and does not generally pay tax on behalf of its investors. Australian resident investors are assessed for tax on any income and capital gains generated by the Fund to which they become presently entitled or, where the Fund has made a choice to be an Attribution Managed Investment Trust ("AMIT") and the choice is effective for the income year, are attributed to them.

***Terms and conditions for collection of Tax File Numbers (TFN) and Australian Business Numbers (ABN)**

Collection of TFN and ABN information is authorised and its use and disclosure strictly regulated by tax laws and the Privacy Act. Once provided, your TFN will be applied automatically to any future investments in the Fund/Trust where formal application procedures are not required (e.g. distribution reinvestments), unless you indicate, at any time, that you do not wish to quote a TFN for a particular investment. Exempt investors should attach a copy of the certificate of exemption. For super funds or trusts list only the applicable ABN or TFN for the super fund or trust.
