About the Vontobel Global Equity Fund

Investment Objective

The investment objective of the Fund is long term capital appreciation over a full market cycle of between 3 to 5 years.

The Fund is benchmark unaware however for performance comparison purposes it is benchmarked against the MSCI ACWI Free Index, Net Dividends Reinvested ("Index").

Investment Strategy

The Fund will seek to achieve its objective by investing in a portfolio consisting primarily of Equity Securities. The Fund may also invest in Derivatives for the purposes of hedging the Fund's foreign currency exposure. Under normal market conditions, the Fund will invest at least 75% of its assets in Equity Securities or equity-linked securities of issuers that are located throughout the world, including the United States. There can be no assurance that the Fund will be able to meet its investment objective.

The Fund will invest its assets in issuers in countries with Developed Markets, as well as in issuers in Developing Countries or Emerging Markets. The Fund intends to diversify its investments among countries and normally to have represented in the portfolio business activities of a number of different countries.

In determining the "location" of an issuer, the Investment Manager primarily relies on three factors: country where the issuer is incorporated, the country of primary listing of the security, and the country in which the greatest percentage of company revenue is generated, where the greatest percentage of company assets are held and the country where goods or services are produced in or sales made. This evaluation is conducted so as to determine that the issuer's assets are exposed to the economic fortunes and risks of the designated country.

Included within the Fund's definition of Developing Country or Emerging Market are certain issuers that are not actually incorporated in or do not have their principal place of business in a Developing Country or Emerging Market, but that have at least 50% of their assets in, or expect to derive at least 50% of their total revenues or profits from, goods or services produced in or sales made in a Developing Country or Emerging Market.

Investment Guidelines

The Fund will keep country weights to within a 25% maximum absolute range of the country weights of the Index at the time of investment. The Investment Manager does not make conscious sector allocation decisions based on specific sector weights in a given country. The Fund's assets will generally be fully invested at all times and will be composed of approximately 30 to 70 Equity Securities. At the time of purchase, the maximum position size will be generally 7% of the Fund's assets. This range and position size may vary in proportion to (i) the degree of undervaluation; (ii) the degree of confidence the Investment Manager has in a company's ability to realise its full growth potential; and (iii) the stock's liquidity.

The Fund will primarily hold Equity Securities of companies listed on a securities exchange or quoted on an established over-the-counter market. The securities may also be listed or traded in the form of American depository receipts, global depository receipts or other types of depository receipts. The securities listed on a securities exchange or quoted on an established over-the-counter market may be either within or outside of the issuer's domicile country. The Fund will generally not invest in the shares of open or closed-ended investment companies, except for (i) closed-ended country funds and exchange-traded country funds, or (ii) where it is difficult to invest in certain Equity Securities directly.

The Fund may invest in Equity Securities of all market capitalisation ranges (such as small, middle or large capitalisation companies). The Fund may also invest in Derivatives and enter into over the counter foreign exchange contracts for the purposes of hedging the Fund's foreign currency exposure.

The Investment Manager takes into account various environmental, social, governance, and regulatory considerations to the extent they are deemed to have an economic impact on the valuation of the portfolio company. The Fund will prohibit the purchase of securities in (i) companies identified by the Investment Manager using selected social screening services, as cluster munitions manufacturers, (ii) companies that are categorised by the Benchmark as belonging to the tobacco industry, and (iii) companies categorised by the Benchmark as belonging to the integrated oil & gas, oil & gas exploration & production, oil & gas refining & marketing, and coal & consumable fuels sub-industries.

Managing risk

You should be aware that an investment in the Fund carries risk and neither the performance of the Fund nor the security of your capital is guaranteed by the Responsible Entity or the Investment Manager.

Risks may include possible delays in the payment of withdrawal proceeds, loss of income and capital and volatility of returns.

We recommend you talk to an adviser about the risks involved in investing in the Fund and how they might impact on your individual financial circumstances.

The main risk factors which may affect the returns of the Fund include, but are not limited to:

Market risk

There are inherent risks of adverse movements in the equity, bond, cash, currency and commodity markets (including asset prices, Derivatives, volatility or other market variables) and specific risks of investing in equities (changing profitability of companies and sectors, prevailing economic climate, business sentiment, government and regulatory policies, shares issued and investor demand).

The value of your investment and market price of investments owned by the Fund may be affected by changes in legal and economic policy, political events, technology failure, economic cycles, investor sentiment and social climate, which can all directly or indirectly create an environment that may influence (negatively or positively) the value of your investments in the Fund. Different factors may impact the value of individual, class or country positions at different times. An adverse move in the general level of the financial markets can have a negative influence on the performance of the Fund. Neither past nor expected performance should be taken as an indication or guarantee of future performance.

Emerging Markets risk

In Emerging Markets, the legal, judicial and regulatory infrastructure is still developing but there is much legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that an investment is suitable as part of their portfolio.

Political and/or regulatory risks

The value of the assets of the Fund may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made. Furthermore, in certain

countries in which investments may be made, the legal and securities market infrastructure (including the custodial, depository and securities settlement systems operating in such countries) and the accounting, corporate governance and reporting standards in such countries may not provide the same degree of investor protection or information to Unit holders as would generally apply in the more major securities markets. As the Fund may invest in markets having some or all of these characteristics, the assets of the Fund which are traded in such markets may be exposed to additional risk.

Derivative risk

The Fund may engage in transactions involving the use of Derivatives such as futures, options, swaps and other Derivatives for the purposes of hedging the Fund's foreign currency exposure. The use of Derivatives may involve substantial risk and leverage, which can magnify gains or losses as compared to a direct investment in the underlying assets, reference rate or index to which the Derivatives relate. In addition there is the risk that changes in the value of the Derivative held will not correlate with the underlying instruments. Derivatives also involve the risk that a loss may be sustained as a result of the failure of the counterparty to make required payments or otherwise comply with the Derivative's terms. In addition to general market risks, many Derivatives are subject to illiquidity risk, counterparty risk, credit risk and pricing risk. Some Derivatives involve economic leverage which could increase the volatility of these investments as they may fluctuate more than the underlying asset. Participation in Derivative trading normally requires deposits to be paid and also margins to be paid on demand should the positions move negatively.

Although unlikely to occur, the Fund's losses could be unlimited as a result of investing in Derivatives in the Fund's portfolio.

Liquidity risk

There may be times when securities may not be readily saleable (for example an exchange imposed limit on price fluctuations on a particular day in both falling and rising market conditions) and this may impact the investment and markets to which the Fund has exposure. If there is an interruption to regular trading in a market generally, or for a particular investment to which the Fund has exposure, there may be delays in processing withdrawal requests. Neither the Responsible Entity nor the Investment Manager guarantees the liquidity of the Fund's investments or of investments in the Fund.

Counterparty risk

Investments directly or indirectly made on behalf of the Fund will be subject to the risk that a counterparty to a contract fails to perform its contractual obligations. All transactions in listed securities are processed using approved brokers and settled (i.e. paid for) upon delivery. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation. The credit risk associated with the over-the-counter foreign currency forward contracts is managed by ongoing assessment of counterparties as to their creditworthiness, financial strength, ownership, market share and management quality with credit limits being established and subject to ongoing review.

Equity-linked instruments risk

The risk that, in addition to market risk and other risks of the referenced Equity Security, the Fund may experience a return that is different from that of the referenced Equity Security. Equity-linked instruments also subject the Fund to counterparty risk, including the risk that the issuing entity may not be able to honour its financial commitment, which could result in a loss of all or part of the Fund's investment.

Fund risk

Risks particular to the Fund include that it could terminate, the fees and expenses could change, the Investment Manager or Responsible Entity could be replaced and the investment professionals could change. Additionally, investing in the Fund may give different results than investing directly in the underlying assets of the Fund itself due to a variety of reasons including how income or capital gains may be accrued in the Fund and the consequences of investment and withdrawal by other investors.

Investment risk

The Fund invests in a number of markets which are subject to a high degree of financial risk. The Investment Manager uses an investment selection process to identify opportunities which it believes are most likely to allow the Fund to meet its investment objective over the medium to long term. Further, the investment strategy allows the Investment Manager to hold varying levels of exposure to different asset classes and countries. The Fund may therefore have a more concentrated exposure to some asset classes or countries and no exposure to others. These investments may not perform in line with the Investment Manager's expectations and as a result there is a risk that that an investor may lose some or all of its investment in the Fund.

An investment in the Fund carries risk and neither the performance of the Fund nor the security of your capital

is guaranteed by the Responsible Entity or the Investment Manager.

Investing in investment companies does not eliminate investment risk. Closed-end investment companies and Exchange Traded Funds ('ETFs') trade on securities exchanges, and the market price for which such securities trade may not correspond exactly with the net asset value of the investment company. ETFs own stocks included in a particular index and changes in the market price of ETFs (before deducting the ETFs' expenses) are generally expected to track the movement of the associated index relatively closely. However, the price movement of ETFs may not perfectly parallel the price action of the associated indices. Investments in other investment companies will cause the Fund (and indirectly, the Unit holders) to bear proportionately the costs incurred in connection with the other investment companies' operations.

Currency risk

The value of the Fund will be expressed in Australian dollars however the Fund will have exposure to securities and markets denominated in other currencies. The value of these other currencies may move in different directions to the value of the Australian dollar. Consequently, the value of the Fund will fluctuate in accordance with changes in the foreign exchange rates between the Australian dollar and the currencies to which the Fund is exposed.

International risk

The risk of investing internationally includes country and/or region specific risks such as: natural disasters; currency exchange rates; political, economic and social instability; market volatility and liquidity; less developed or efficient trading markets; settlement and clearance procedures; enforceability of laws (including tax); availability of information; and differences in auditing, accounting and other financial and legal reporting standards. These risks are generally more pronounced in Emerging Markets rather than Developed Markets.

Legal and regulatory risk

Legal risk is the risk of losses occurring as a result of legal issues, principally loss due to the non-enforcement of a contract. This non-enforcement may arise from insufficient documentation, insufficient capacity or authority of a counterparty, uncertain legality or unenforceability in bankruptcy or insolvency.

There is also risk that laws, including taxation laws, might change or become difficult to enforce. Investing in foreign markets with different legal and regulatory systems means that foreign investments, particularly in Emerging Markets, may be exposed to more risk than Australian markets.

Valuation of the Fund and application price of Units

The value of the investments of the Fund and Unit prices are determined weekly.

The value of a Unit in the Fund reflects the value of the assets of the Fund less the liabilities of the Fund and is determined in accordance with the Constitution. The application price of a Unit in the Fund is, in general terms, based on the NAV of the Fund divided by the number of Units on issue. The application price may also include an allowance for transaction costs required for buying investments; this is known as the Buy Spread. At

the date of this IM, the Buy Spread is 0.15%. Refer to 'Fees and Other Costs' for additional information on the Buy Spread.

The minimum withdrawal amount is \$1,000,000 or such other amount as the Responsible Entity determines from time to time. Refer below for 'Terms and conditions for withdrawals'.

Withdrawal price

The withdrawal price of a Unit in the Fund is based on the NAV of the Fund divided by the number of Units on issue. The withdrawal price can be reduced by the Responsible Entity to make an allowance for the transaction costs required for selling investments which is known as the Sell Spread. At the date of this IM, the Sell Spread is 0.15%. Refer to "Fees and other costs" for additional information on the Sell Spread.

For in specie transfers of assets out of the Fund, a nil or reduced Sell Spread may be applied to reflect the actual costs incurred by the Fund. The investments of in specie transfers will be valued on the date the Units are withdrawn. All costs including any applicable duties and levies, incurred as a result of the transfer will be payable by the Unit holder.

Access to funds

Withdrawal requests received by 2pm on a Wednesday (or the next Business Day where the Wednesday is not a Business Day) will be processed that week. This means the withdrawal will generally be processed on Friday of that week using a price calculated as at Wednesday (or the next Business Day). Any withdrawal request received after that time will be treated as having been received the following week. This means the withdrawal will generally be processed on the Friday of the following week using a price calculated on Wednesday of that week. Except where the Fund is not liquid, the Responsible Entity will generally allow Unit holders of the Fund to access their investment within 7 Business Days after the withdrawal request has been processed. However, the Constitution allows the Responsible Entity to make payment up to 30 days after accepting a withdrawal request (which may be extended if the Responsible Entity considers that it is in

the best interests of Unit holders to do so or in unusual circumstances such as when the Investment Manager is unable to satisfy a redemption request due to suspended trading in the market for an asset).

Fund liquidity

Where the Fund is not liquid (as defined in the Corporations Act) a Unit holder does not have a right to withdraw from the Fund and can only withdraw where the Responsible Entity makes a withdrawal offer to Unit holders in accordance with the Corporations Act. The Responsible Entity is not obliged to make such offers. The Fund will be liquid if at least 80% of its assets are liquid assets. Broadly, liquid assets are money in an account or on deposit with a financial institution, bank accepted bills, marketable securities, other prescribed property and other assets that the Responsible Entity reasonably expects can be realised for their market value within the period specified in the Constitution for satisfying redemption requests while the Fund is liquid.

Terms and conditions for withdrawals

The Responsible Entity is not required to give effect to a withdrawal request if it is for less than the minimum withdrawal amount as determined by the Responsible Entity from time to time.

Equity Trustees has the right to fully redeem a Unit holder's investment in the Fund after giving the Unit holder notice, where their holding falls below the minimum balance amount. At the time of this IM, the minimum balance is \$5,000,000. However, the Responsible Entity may alter this amount at any time.

Equity Trustees will refuse to comply with any withdrawal request if the requesting party does not satisfactorily identify themselves as the Unit holder. Withdrawal payments will not be made to third parties (including authorised nominees) and will only be paid directly to the Unit holder's bank account held in the name of the Unit holder at a branch of an Australian domiciled bank.

The Unit holder also agrees that any payment made in accordance with a withdrawal request shall be a complete satisfaction of the obligations of Equity Trustees, notwithstanding any fact or circumstance including that the payment was made without the Unit holder's knowledge or authority. The Unit holder agrees that if the payment is made in accordance with the withdrawal request, the Unit holder and any person claiming through or under them shall have no claim against Equity Trustees in relation to the payment.

Withdrawal requests received from New Zealand investors must specify:

- the withdrawal amount in Australian dollars; or
- the number of Units to be withdrawn.

We are unable to accept withdrawal amounts quoted in New Zealand dollars. Please note that the withdrawal amount paid to you will be in Australian dollars and may differ from the amount you receive in New Zealand

dollars due to foreign exchange spreads between Australian and New Zealand dollars (currency rate differs daily) and Overseas Telegraphic Transfer (“OTT”) costs.

Distributions

A Distribution comprises a Unit holder’s share of any distributable income earned by the Fund in which you have invested. A Unit holder’s share of any distributable income is generally based on the number of Units held by the Unit holder at the end of the Distribution period.

Generally, the income entitlements of Unit holders of the Fund are distributed within 15 days after the date they are determined, although the Distribution at the end of a financial year may take longer (for example, if there is a delay in completing an audit).

If you are a Unit holder in the Fund, you can:

- have your Distribution reinvested back into the Fund in which you have invested; or
- have your Distribution directly credited to your nominated bank account.

If you do not make an election, your Distribution will automatically be reinvested and will be taken to be received prior to the next valuation time after the relevant Distribution period. The Constitution provides for money payable to a Unit holder to be reinvested where the Responsible Entity attempts to pay the money by electronic transfer and the electronic transfer fails on 3 occasions.

New Zealand investors

If New Zealand investors elect to have their Distribution paid in cash, they will need to nominate a bank account held in their own name with an Australian domiciled bank. Cash Distributions will only be paid in Australian dollars to such an account. Where New Zealand investors have their Distributions reinvested into the Fund, they will be allotted Units in accordance with the terms and conditions of this IM. The reinvestment of Distributions is offered to New Zealand investors on the following basis:

- At the time the price of the Units allotted pursuant to the reinvestment of Distributions is set, the Responsible Entity will not have any information that is not publicly available that would, or would be likely to, have a material adverse effect on the realisable price of the Units if the information were publicly available.
 - a)
- The right to acquire, or require the Responsible Entity to issue, Units will be offered to all investors of the same class, other than those resident outside New Zealand who are excluded so as to avoid breaching overseas laws.
 - b)
- Units will be issued on the terms disclosed to you, and will be subject to the same rights as Units issued to all investors of the same class as you.

There is available from the Responsible Entity, on request and free of charge, a copy of the most recent annual report of the Fund, the most recent financial statements of the Fund, the auditor’s reports on those financial statements, and the IM and the Constitution for the Fund (including any amendments). These documents (excluding the Constitution) may be obtained by electronic means by contacting Equity Trustees or by visiting www.eqt.com.au/insto.

Unit pricing discretions policy

Equity Trustees has developed a formal written policy in relation to the guidelines and relevant factors taken into account when exercising any discretion in calculating Unit prices (including determining the value of assets and liabilities). A copy of the policy and, where applicable and to the extent required, any other relevant documents in relation to the policy (such as records of any discretions which are outside the scope of, or inconsistent with, the Unit pricing policy) will be made available to Unit holders free of charge on request.

Appointment of authorised nominee to operate account

Unit holders may elect to appoint an authorised nominee to operate their account. The relevant sections on the Application Form need to be completed, including the name and signature of the authorised nominee, the signature of the Unit holder and the date. Only Unit holders can appoint authorised nominees. If you appoint an authorised nominee we suggest that you ensure that:

- they cannot appoint another nominee; and
- the appointment lasts until cancelled by you in writing or by the Responsible Entity.

If the Responsible Entity determines that the circumstances require, the Responsible Entity may cancel an appointment by giving the Unit holder 14 days notice in writing. If an appointment is cancelled, the Responsible Entity will not be obliged to act on the instructions of the authorised nominee. If the instructions are varied, the Responsible Entity will act only in accordance with the varied instructions. By completing and lodging the relevant sections on authorised nominees on the Application Form you release, discharge and agree to indemnify the Responsible Entity from and against any and all losses, liabilities, actions, proceedings, account claims and demands arising from the Responsible Entity acting on the instructions of your authorised nominee.

You also agree that any instructions of your authorised nominee to the Responsible Entity, which are followed by the Responsible Entity, shall be a complete satisfaction of the obligations of the Responsible Entity, notwithstanding any fact or circumstance, including that the instructions were made without your knowledge or authority. You agree that if the authorised nominee’s instructions are followed by the Responsible Entity, you and any person claiming through or under you shall have no claim against the Responsible Entity in relation to the instructions.

Powers of an authorised nominee

An authorised nominee can, among other things:

- apply for additional investment Units;
- request that Distribution instructions be altered;
- change bank account details,
- withdraw all or part of your investment; and

- enquire as to the status of your investment and obtain copies of statements.

Withdrawal payments will not be made to third parties. If a company is appointed as an authorised nominee, the powers will extend to any director and authorised officer of the company. If a partnership, the powers will extend to all partners.

Keeping track of your investments

Regular, simple to read reports are provided to Unit holders in the Fund. These reports comprise:

- **Annual Report** including financial statements and auditor's report will be made available on the Equity Trustees website at www.eqt.com.au/insto from 30 September each year (you may elect to receive a hard copy of this report by indicating this in the appropriate place on the Application Form).
- **Transaction Reports** confirming all additional investments, withdrawals, and payments (issued following transactions and on request).
- **Distribution Statements** - issued in line with Distribution frequency, notifying you of the value of your investment, income from investments and confirming the reinvestment or payment to your nominated account.
- **Tax Statements** issued annually, providing Unit holders with taxation information including a detailed summary of the components of any Distributions.

The Fund is not currently a disclosing entity as defined by the Corporations Act. If the Fund becomes a disclosing entity, it will be subject to regular reporting and disclosure obligations. Copies of documents lodged with ASIC in relation to the Fund may be obtained from ASIC through ASIC's website. Unit holders will have a right to obtain a copy of any of the following documents:

- the most recent annual financial report;
- any half yearly financial report lodged with ASIC; and
- any continuous disclosure notices lodged with ASIC.

Fees and other costs

Management costs

The management costs (which include investment management fees, Responsible Entity fees, custody fees, administration fees, audit fees and other ordinary expenses related to the establishment and operation of the Fund) are calculated weekly and accrued on a daily basis on the NAV of the Fund. The management costs are reflected in the NAV and Unit price of the Fund. Management costs do not include transaction costs and abnormal expenses.

The management costs applicable to Units in the Fund are currently capped at 0.65% p.a. of the average NAV of the Fund. If the management costs exceed the cap, a portion of the fees paid to the Investment Manager will be deferred so the management costs do not exceed this cap. In this situation, the Investment Manager will have the right, for a period of three (3) years following the relevant month, to be paid the deferred amount by the Fund, provided the management costs will not exceed the cap.

Further information regarding fees and other costs

Differential fees

From time to time the Investment Manager may negotiate fees with investors that differ from those above. This will generally relate to the size of the investment in the Fund. Please contact VAMAUS if you wish to discuss the fees that may apply to your investment.

Transaction and other costs

All government taxes such as stamp duty and GST will be deducted from the Fund as appropriate. Relevant tax information is provided in the 'Taxation' section. RITCs will also be claimed by the Fund where appropriate to reduce the cost of GST to the Fund.

The Fund may incur transaction costs. These transaction costs include brokerage, settlement costs (including custody costs), clearing costs and stamp duty. Transaction costs include costs incurred by the Fund when investors invest in or withdraw from the Fund and when transacting to meet investment objectives. These costs are an additional cost to the investor but are generally reflected in the Unit price (through the Buy/Sell Spread) and not charged separately to the investor. Transaction costs which are not recovered through the Buy/Sell Spread are deducted from the assets of the Fund from time to time

as they are incurred and are reflected in the Unit price of the Fund.

The exact amount of transaction costs is dependent on a number of different variables, including the level of trading undertaken by the Fund.

If the Fund invests in a pooled vehicle, the underlying fund may incur operating costs and expenses and the Fund will bear a pro-rata share of these.

Buy/Sell Spread

The Buy/Sell Spread reflects the estimated transaction costs associated with buying and selling the assets of the Fund when investors invest in, or withdraw from, the Fund. The Buy/Sell Spread is an additional cost to the investor but is included in the Unit price and incurred when an investor invests in or withdraws from the Fund and is not charged as an additional fee. The Buy/Sell Spread is paid into the Fund and not retained by Equity Trustees or the Investment Manager. At the date of this IM, the Buy/Sell Spread for the Fund is 0.15% (which equates to \$1,500 for an investment or withdrawal of \$1,000,000).

Abnormal expenses

We may additionally recover abnormal expenses (such as the costs of Unit holders meetings, legal advice/proceedings and other irregular expenses). The Constitution does not place any limit on the amount of the abnormal expenses that can be paid from the Fund.

Can the fees change?

All fees can change without Unit holder consent, subject to the maximum fee amounts specified in the Constitution of the Fund. Reasons might include changing economic conditions and changes in regulation. We have the right to recover all proper expenses incurred in managing the Fund and as such these expenses may increase or decrease accordingly. Expense recoveries and Buy/Sell Spreads may change without notice, for example, when it is necessary to protect the interests of existing Unit holders and if permitted by law. The Constitution in some circumstances defines the maximum fees that can be charged for some fees described in this IM.

Under the Constitution, the maximum contribution fee the Fund can charge is 6% (including GST) of application monies and the maximum Responsible Entity fee is 2% per annum (including GST) of the gross asset value of the Fund. There are no maximum fee amounts defined for the other fee components which make up the management costs of the Fund.

Taxation

Investing in a registered managed investment scheme (such as this Fund) is likely to have tax consequences. You are strongly advised to seek your own professional tax advice about the applicable Australian tax (including income tax, GST and duty) consequences and, if appropriate, foreign tax consequences which may apply to you based on your particular circumstances before investing in the Fund.

The Fund is an Australian resident for tax purposes and does not pay tax on behalf of its members. Australian resident investors are assessed for tax on income and capital gains generated by the Fund to which they become entitled.

Other important information

Cooling off period

No cooling off period applies to Units offered under this IM as you must be a Wholesale Client or a Wholesale Investor to invest in the Fund.

Unit holder's liability

The Constitution for the Fund provides that unless there is a separate agreement with a Unit holder, no Unit holder can be called on to contribute to the assets of the Fund or to its creditors if the Fund is liquidated or becomes insolvent. Therefore it is expected that Unit holders will not be under any obligation if a deficiency in the assets of the Fund was to occur. However, this view has not been fully tested and so it is not possible to give an absolute assurance that a Unit holder's liability will be limited in all circumstances.

In general, the liability of a Unit holder is limited to the amount (if any) which remains unpaid in relation to their subscription for Units in the Fund and certain amounts in respect of tax. The Responsible Entity is permitted to deduct certain amounts owed to the Responsible Entity from amounts payable to Unit holders.

Non-listing of Units

The Units of the Fund are not listed on any stock exchange and no application will be made to list the Units of the Fund on any stock exchange.

Termination of the Fund

The Responsible Entity may resolve at any time to terminate, liquidate and wind up the Fund in accordance with the Fund's Constitution and the Corporations Act. The Fund may otherwise terminate if required by law. A notice will be provided to Unit holders advising of the Fund's termination. Upon termination and after conversion of Fund assets into cash and payment of, or provision for, all costs and liabilities (actual and anticipated), the net proceeds will be distributed pro-rata amongst all Unit holders

according to the number of Units they hold in the Fund.

Our legal relationship with you

You will receive Units in the Fund when you invest. Subject to the rights, obligations and liabilities of a class, each Unit represents an equal proportionate beneficial interest in the assets of the Fund as a whole subject to liabilities, but does not give you an interest in any particular assets or property of the Fund.

Equity Trustees' responsibilities and obligations, as the Responsible Entity of the Fund, are governed by the Constitution of the Fund as well as the Corporations Act and general trust law. The Constitution contains a number of provisions relating to the rights, terms, conditions and obligations imposed on both Equity Trustees, as the Responsible Entity, and Unit holders. Some of the provisions of the Constitution are discussed elsewhere in this IM. Other provisions relate to a Unit holder's rights under the Constitution, and include:

- a Unit holder's right to share in any Fund income, and how we calculate it;
- what you are entitled to receive when you withdraw or if the Fund is wound up;
- a Unit holder's right to withdraw from the Fund - subject to the times when we can cease processing withdrawals - such as if the Fund becomes 'illiquid';
- the nature of the Units - identical rights attach to all Units within a class; and
- a Unit holder's rights to attend and vote at meetings - these provisions are mainly contained in the Corporations Act.

There are also provisions governing our powers and duties, including:

- how we calculate Unit prices, the maximum amount of fees we can charge and expenses we can recover;
- when we can amend the Constitution - generally we can only amend the Constitution where we reasonably believe that the changes will not adversely affect Unit holders' rights. Otherwise

the Constitution can only be amended if approved at a meeting of Unit holders;

- when we can retire as the Responsible Entity of the Fund - when permitted by law;
- when we can be removed as the Responsible Entity of the Fund - which is when required by law; and
- our broad powers to invest, borrow money and generally manage the Fund - we do not currently intend to borrow funds to acquire assets for the Fund, although this is permitted under the Constitution of the Fund.

The Constitution also deals with our liabilities in relation to the Fund and when we can be reimbursed out of the Fund's assets, for example:

- subject to the Corporations Act, we are not liable for acting in reliance and good faith on professional advice;
- subject to the Corporations Act, we are not liable for any loss unless we fail to act in good faith or we act negligently; and
- we can be reimbursed for any liabilities we incur in connection with the proper performance of our powers and duties in respect of the Fund.

As mentioned above, Equity Trustees' responsibilities and obligations as the Responsible Entity of the Fund are governed by the Constitution as well as the Corporations Act and general trust law, which generally require that we:

- act in the best interests of Unit holders and, if there is a conflict between Unit holders' interests and our own, give priority to Unit holders;
- ensure the property of the Fund is clearly identified, held separately from other funds and our assets, and is valued regularly;
- ensure payments from the Fund's property are made in accordance with the Constitution and the Corporations Act; and
- report to ASIC any breach of the Corporations Act in relation to the Fund which has had, or is likely to have, a materially adverse effect on Unit holders' interests.

Copies of the Constitution are available, free of charge, on request from Equity Trustees.

Compliance Plan

Equity Trustees has prepared and lodged a compliance plan for the Fund with ASIC. The compliance plan describes the procedures used by Equity Trustees to comply with the Corporations Act and the Constitution of the Fund. Each year the compliance plan for the Fund is audited and the audit report is lodged with ASIC.

Indemnity

Equity Trustees, as the Responsible Entity of the Fund, is indemnified out of the Fund against all liabilities incurred by it in properly performing or exercising any of its powers or duties in relation to the Fund. To the extent permitted by the Corporations Act, this indemnity includes any liability incurred as a result of any act or omission of a delegate or agent appointed by the Responsible Entity. Equity Trustees may retain and pay out any monies in its hands all sums necessary to effect such an indemnity.

Related party transactions

The Responsible Entity and its associates are entitled to enter into or be interested on their own account in any transactions entered into on behalf of the Fund or with any company or body in which the Fund is invested or who provides services to the Fund. Any such transactions will be on arms length commercial terms. The Responsible Entity and its associates are also permitted to hold Units in the Fund in any capacity.

Anti-Money Laundering and Counter Terrorism Financing ("AML/CTF")

Australia's AML/CTF laws require Equity Trustees to adopt and maintain an AML/CTF Program. A fundamental part of the AML/CTF Program is that Equity Trustees knows certain information about investors in the Fund.

To meet this legal requirement, we need to collect certain identification information and documentation ("KYC Documents") from new investors. Existing investors may also be asked to provide KYC Documents as part of a re-identification process to comply with AML/CTF laws. Processing of applications will be delayed or refused if investors do not provide the applicable KYC Documents when requested.

Under the AML/CTF laws, Equity Trustees is required to submit regulatory reports to AUSTRAC. This may include the disclosure of your personal information. Equity Trustees may not be able to tell you when this occurs.

The Responsible Entity shall not be liable for any loss you may suffer because of compliance with the AML/CTF laws.

Information on underlying investments

Information regarding the underlying investments of the Fund will be provided to an investor of the Fund on request, to the extent Equity Trustees is satisfied that such information is required to enable the investor to comply with its statutory reporting obligations. This information will be supplied within a reasonable timeframe having regard to these obligations.

Foreign Account Tax Compliance Act ("FATCA")

In April 2014, the Australian Government signed an intergovernmental agreement ("IGA") with the United States of America ("U.S."), which requires all Australian financial institutions to comply with the FATCA Act enacted by the U.S. in 2010.

Under FATCA, Australian financial institutions are required to collect and review their information to identify U.S. residents that invest in assets through non-U.S. entities. This information is reported to the

Australian Taxation Office (“ATO”). The ATO may then pass that information onto the U.S. Internal Revenue Service.

In order to comply with the FATCA obligations, we may request certain information from you. Failure to comply with FATCA obligations may result in the Fund, to the extent relevant, being subject to a 30% withholding tax on payment of U.S. income or gross proceeds from the sale of certain U.S. investments. If the Fund suffers any amount of FATCA withholding and is unable to obtain a refund for the amounts withheld, we will not be required to compensate investors for any such withholding and the effect of the amounts withheld will be reflected in the returns of the Fund.

Common Reporting Standards (“CRS”)

The CRS is a standardised set of rules developed by the Organisation of Economic Co-operation and Development that requires certain financial institutions resident in a participating jurisdiction to document and identify reportable accounts and implement due diligence procedures. These financial institutions will also be required to report certain information on reportable accounts to their relevant local tax authorities.

Australia signed the CRS Multilateral Competent Authority Agreement and has enacted provisions within the domestic tax legislation to implement CRS in Australia. Australian financial institutions need to document and identify reportable accounts, implement due diligence procedures and report certain information with respect to reportable accounts to the ATO. The ATO may then exchange this information with foreign tax authorities in the relevant signatory countries.

In order to comply with the CRS obligations, we may request certain information from you. Unlike FATCA, there is no withholding tax that is applicable under CRS. However, penalties may apply for failing to comply with the CRS obligations.
