

Mission-critical technologies and services supporting high-tech industries

Welcome to Exentec, shaping safer, smarter, and more connected facilities

Exentec is a global leader in the design, manufacturing, and delivery of mission-critical and integrated solutions for high-tech industries.

Turnkey
technologies
and services

We empower our customers through turnkey technologies and services that drive performance, sustainability, and growth across the entire facility lifecycle. With a focus on reliability, risk-management, and innovation, Exentec embraces energy-efficient designs, automation, and advanced production.

The business is dedicated to excellence, expertise, and experience through cutting-edge technology which meets the growing demands of tomorrow's industries.

Exentec is committed to shaping a safer, smarter, and more connected future - powered by the passion, expertise, and dedication of our people.

Our Vision

To be the global leader in mission-critical, integrated solutions for high-tech industries - uniting innovation, safety, and operational excellence under one trusted brand.

We empower our customers through turnkey technologies and services that drive

performance, sustainability, and growth across the entire facility lifecycle.

As Exentec, we are committed to shaping a safer, smarter, and more connected future - powered by the passion, expertise, and dedication of our people.

Exentec
in figures

- 1,000+ clients worldwide
- €1+ billion sales*
- 6,000+ employees*
- 40+ nationalities
- Operations in 10+ countries
- 0.45 TRIR*

*Based on 2024 figures

Combining a global reach with local expertise

Our mission is to shape the future of high-tech industries by setting the standard for innovation, reliability, and performance.

Installation
Services

Our business lines worldwide

Cleanroom & Dryroom

- Development, production and maintenance of cleanroom products.
- Unique product range delivers technical climate-controlled production environments for our clients.
- Storied track record in critical semiconductor and life-science industries.
- Recent innovations introduced Mini Environments for cost-competitive, energy-reduced, high-quality, next level battery production.

Media Supply

- Distribution and blending systems for ultra high-purity gases, chemicals, slurry supply systems and wet benches.
- Ampoules and bubblers for liquid and solid precursor delivery, featuring advanced ultrasonic liquid level sensors and control boxes.

Installation Services

- Installing complex process piping, mechanical and electrical systems.
- Offering the most economical solution to meet budget, schedule, and performance targets for projects that require renovation, expansion or turnkey construction of new facilities.

Exhaust & Abatement

- Safe and reliable corrosive fume exhaust duct systems
- Reduced total installed cost.
- Point-of-Use gas abatement solutions for deposition, etch and diffusion process tools
 - Unrivalled uptime
 - Low maintenance
 - Industry-leading sustained destructive rate (DRE) efficiency.

Facility Services

- Facility Services for high-tech industries
- A combination of intelligent automation and in-depth knowledge which goes beyond general maintenance and simple security protocols.

Modular Solutions

- Prefabrication, off-site manufacturing, and modularization
- Including on-site modular rigging and installation.
- Experience in:
 - Various semiconductor facility applications
 - Manufacture of complex biopharmaceutical processing skids.

Modular
Solutions

A future defined by best-in-class technologies and services

Exentec stands at the forefront of technological advancement, leading the way with pioneering solutions that address the most demanding challenges.

Technological
excellence and
exceeding the limits.

Exentec is a turnkey solution
provider and a trusted
partner in your journey
towards excellence.

Part of the Exyte Group

Exyte Group is a global leader in the design, engineering, and construction of high-tech facilities, specializing in controlled and regulated environments. Headquartered in Stuttgart, Germany, the company serves the semiconductor, biopharma life sciences and data center industries.

With a legacy dating back to 1912, Exyte combines deep technical expertise with innovative solutions to deliver complex projects worldwide. Its commitment to excellence and precision makes it a trusted partner for clients navigating the most demanding technological challenges.
