LogMeIn Resolve

Mobile Device Management (MDM) Feature Spotlight

Enable your customers to work more efficiently and securely

LogMeIn Resolve MDM makes it easy to manage the diverse mix of smartphones, tablets, and laptops used in your customers' businesses. It has all the right features for effective Android, Apple, and Windows management in a single, easy-to-use platform that scales to your needs.

Empower your customers' mobile workforce

Allow your customers to use the devices they prefer to work with while supporting the growth of your company with faster device setups and a smoother device user experience.

Secure everything

Protect your customers against financial and reputational risks by preventing human errors and keeping their devices and data safe.

- Cloud-based MDM/UEM solution
- For mobile devices and workstations
- For Android, iOS, macOS, Windows

Manage devices smarter

Expand your managed service offerings to include mobile device management - you will keep customer devices healthy and up to date, while also growing your revenue. Additionally, improve internal work efficiency through centralization and automation. Everyone wins!

Efficient device management has never been easier.
