

## PRODUCT OVERVIEW

# ENTERPRISE-GRADE REMOTE SUPPORT FOR SEAMLESS RESOLUTIONS

With powerful remote support features, advanced security capabilities, and ample customization options, LogMeIn Rescue has everything large enterprises need to deliver fast, frictionless support to customers and employees.

### Easy to use

Provide fast ad-hoc support that reduces IT complexity. Connect to any device in seconds and have everything you need to solve issues at your fingertips.

### Unrelenting security

LogMeIn Rescue boasts bulletproof security measures, including protected connection methods, government-approved TLS 1.3 transport security and AES-256-bit encryption, and two-step authentication that makes credential attacks extremely difficult.

### Simple administration

Admin and management tools let you centrally manage tasks such as creating and assigning technicians and groups, monitor technicians in real time and easily track key performance indicators to identify productivity issues quickly.

### Purpose-built for:

Organizations with advanced needs and workflows

Customer care and support organizations

Large business and enterprise help desks

### At a glance:

- Easy to deploy
- Desktop and mobile remote support
- Highly customizable UI
- Advanced administration
- Built-in integrations and APIs
- Localized support
- 99.99% uptime

## Trust LogMeIn Rescue to make seamless support simple.
