

HAEMONETICS®

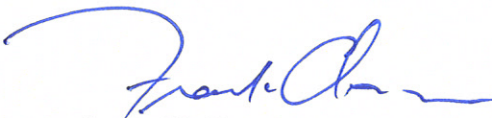

Global Environment Policy

At Haemonetics, we are dedicated to high standards of environmental performance. We strive to embed environmental considerations in our key business decisions and seek solutions that will promote a positive effect on the environment.

Our commitment to the environment is established by top management and extends to our employees, our customers and the communities in which we operate and serve. As such, we seek to foster a culture of environmental excellence by delivering on the following:

- We ensure compliance with all applicable environmental legislations, regulations and other obligations.
- We seek to protect the environment and prevent pollution.
- We manage and seek opportunities to improve our environmental performance.
- We design and produce products by considering their life cycle perspective while minimizing or eliminating their adverse environmental impacts.
- We manage our operations in a socially responsible manner and seek sustainable partnerships with our supply chain strategy, stakeholders, and customers.
- We educate, train and motivate our employees to be environmentally conscious and play an active role in our process.
- We pursue a program of continual improvement through our Environmental Management System (EMS) and related objective and targets, policies and practices.
- We integrate our environmental aspirations with our overall business strategy by reporting on our performance and progress to our internal and external stakeholders.

Our employees are responsible for understanding this policy and incorporating its intent into their day-to-day activities to promote environmental sustainability within the company.
