

Improve patient outcomes with our Kidney Disease Education Suite

Our innovative education suite is the only CKD patient education program to combine video content, one-on-one physician educator-patient sessions, printed materials, and more—developed by nephrologists, for nephrologists.

SUCCESS STARTS WITH EDUCATION AND COORDINATION

Delivering results for patients*

- 35% decrease in CVC starts
- 138% increase in home starts
- 24% increase in starts outside the hospital
- 98% “excellent” rating for patient satisfaction

Promoting growth for providers

- Gain an additional revenue source with this reimbursable program
- Attract new referrals by offering innovative support and education
- Improved patient outcomes, practice profitability, and optimal starts—the most important measure in renal value-based care

*Results based on Dallas Nephrology Associates experience.

Eastern Nephrology has been using Raenali for more than a year and we are extremely pleased with our patients’ response to this new education platform. Our advanced practitioners deliver the education and ensure all patients have educational opportunities. Raenali has standardized our KDE with an appropriate literacy level that is engaging for our patients and their families, further empowering them to participate more actively in their care.

We also use Raenali as an onboarding educational tool for our new employees. This has been a tremendous success and our staff now have a deeper understanding of the kidneys and the challenges kidney disease presents to our patients.”

—Susan Bynum, MSN, RN, CPC,
Vice President, Clinical Operations
Eastern Nephrology Associates, PLLC
