The Art of Care. The Legacy of Crozier.

The global leader in fine art logistics and services.

Crozier was founded on a commitment to innovation, client-focused service, and specialized knowledge that meets evolving needs.

More than 40 years later, we remain loyal to that legacy, expanding our global reach through strategic partnerships and continued growth. Today, Crozier offers 1.8 million square feet of fine art storage and personalized, best-in-class care across 38 locations in 12 international markets.

Our Priorities

Sustainability

Advancing a more sustainable future for art logistics is only possible with the close collaboration of our clients and partners. Through ongoing investment in green infrastructure and the expansion of efficient transport solutions, including the integration of electric vehicles in our fleet, we're driving responsible growth across our global operations, and setting a higher standard for the industry.

Innovation

Within our broader suite of digital services, we use ultra-high resolution imaging to capture exceptional detail. This technology supports cataloging, condition reporting, and immersive viewing across physical and virtual platforms.

Transportation Services

We operate an international network of over 180 specialized vehicles that deliver safe, reliable, and efficient transportation across North America, Europe, and Asia.

Serving 100+ cities weekly, Crozier's extensive shuttle networks offer secure, dependable transport for collections across local and international destinations. Every vehicle in our fleet is equipped with advanced Diesel Particulate Filter (DPF) systems, reflecting our ongoing commitment to sustainable, high-standard delivery. Our expertly trained teams, combined with high-security standards, ensure every move meets the precision and care your collection deserves.

What is the difference between exclusive use and local transport?

Exclusive-use transport means the entire truck is dedicated just to your shipment—you don't have to share the space with anyone, whether your art is moving across town or cross-country. Local and shuttle transport consolidates several clients' art onto one truck that is already running on a planned route. This saves you money and reduces the environmental impact.

What is Crozier's sea freight shipping service, and how is it different from other sea freight art shipping services?

Crozier partnered with Christie's to minimize the environmental impact of art shipping. By choosing to ship artwork via sea containers versus air freight, we can reduce carbon emissions by 80% and reduce shipping costs. Crozier's door-to-door exclusive artwork custodianship means we are the only organization that handles, secures, and monitors your art throughout its journey. Our prototype, bespoke, art-centric refrigerated containers allow for various interior ratchet and bracing options. A range of load-bearing flooring tiles eliminate damage caused by container movement and vibration. Crozier's array of recyclable, reusable crating and casing options means you get to choose your packing option and can be confident that your property is secure. Finally, this service

ties into our North American and European shuttle services, enhancing our ability to get your art where it needs to go safely and sustainably.

Is sea freight safe? What has Crozier done to mitigate risks?

We designed the Crozier Fine Arts shipping container solution to meet insurance industry recommendations for art shipment by sea. These recommendations include:

Full Container Load (FCL) service: This means that only art will be shipped in the container. Crozier procures the entire container; there is no other cargo in it.

Request below-deck stowage: While we do ask that the container be loaded below deck, most ships only load non-containerized cargo below deck. Nevertheless, we use a climate-controlled container that must be plugged into ship power, which means it is always located near the deck.

Container must be inspected before loading: Crozier inspects each container using the Gallery Climate Coalition checklist.

Request Grade A/Food Grade Containers: This is the Crozier standard.

Discuss with your fine art shipper how the artworks should be packed for sea shipments and make sure that this is followed: Crozier specialists will pack your art according to your and Crozier's exacting standards.

All artworks must be crated and elevated four inches from the floor, ideally on forklift runners:

This is standard for Crozier crates and cases for sea container shipments.

Ask your shipper or connect your shipper with the receiving agent: Shipper and receiver are the same. Crozier loads and unloads the container. The container is locked and sealed with tamper-proof seals before being sent to the port.

Are there any optional but advisable suggestions?

Container tracking rather than vessel tracking:

We include a tracker on each container that tracks its location, temperature, humidity, shock, and tip and notes whether the container has been opened. The tracker uses cell data networks to communicate, meaning there is no reception at sea, but the data is nevertheless logged and uploaded when communications are restored. Our International Shipping Manager also tracks and updates estimated times of arrival. Due to security concerns, most shipping lines do not give exact geo locations for their vessels.

Where appropriate consider inserting tracker devices in the container and higher value crates:

Container trackers are standard on all shipments. We can insert trackers into individual crates for an additional cost.

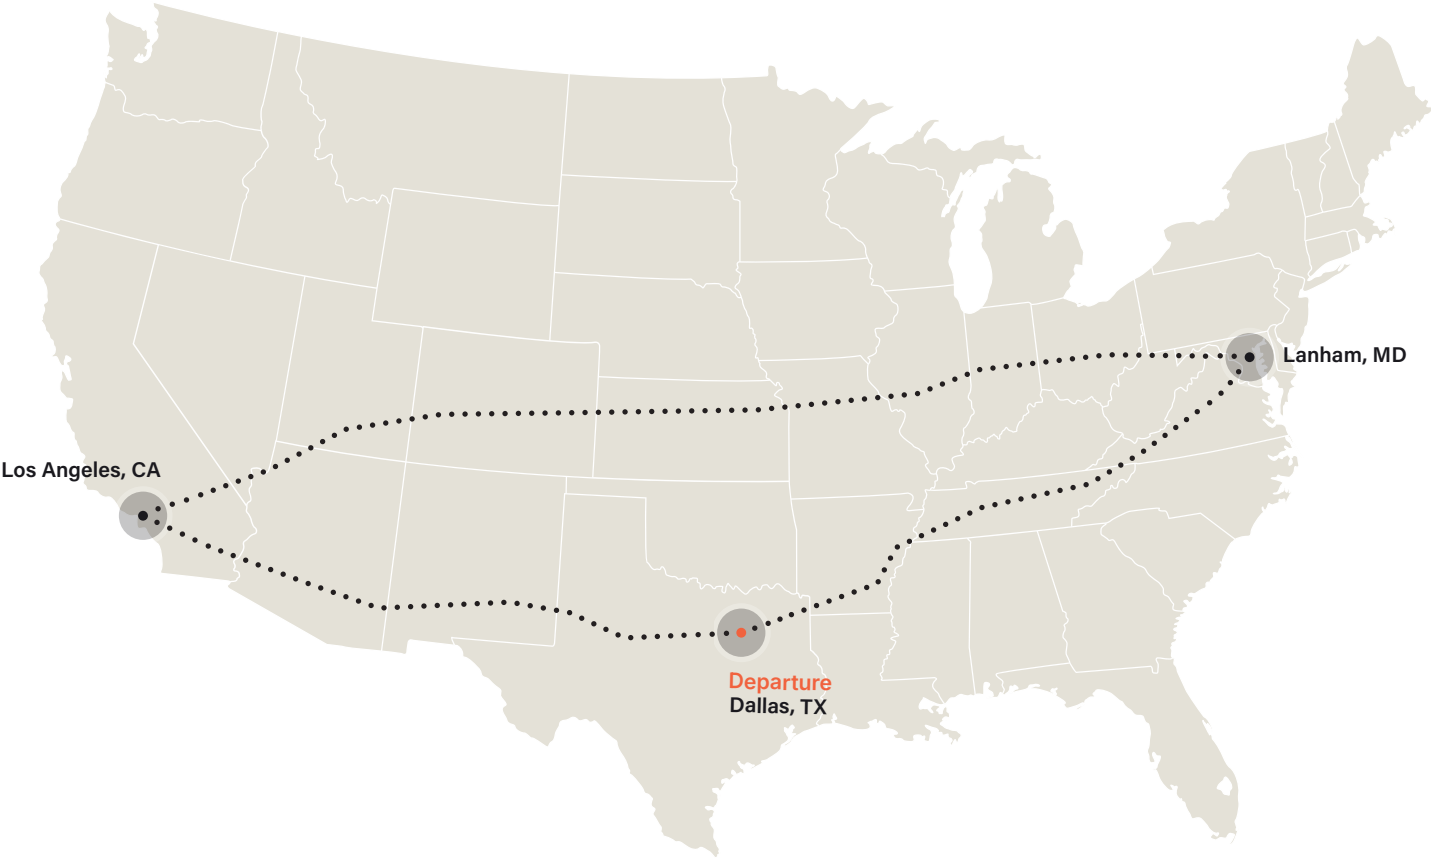

Combating humidity: Containers will be shipped with humidity-controlling measures in addition to the integral climate control in the container.

How does sea freight compare in cost with air freight?

While sea freight is much more sustainable than air (representing an 80% reduction in carbon dioxide emissions), it does take longer. Expect six weeks door-to-door from New York to London and 10 weeks from New York or London to Hong Kong. Note that these time estimates depend on factors such as weather, port congestion, and ship availability. Your Crozier contact can help you plan the shipment so it arrives within the timelines expected. For shipments requiring shorter timelines, we still offer air freight options.

How does sea freight compare in cost with air freight?

Generally, sea freight on Crozier's consolidated container service will be significantly lower than air freight, generally by about half. Each shipment is different, so this may vary.
