The Challenges

- *Stringent compliance requirements of DCGI (Drug Controller General of India)*
- *FDA (Food & Drug Administration) & EMA (European Medicines Agency) Regulations for storage of records.*
- *Challenges in Indexing and streamlining of records, easy accessibility, Quick Retrievals and high standards of offsite storage.*

The Solution

Iron Mountain’s Records and Information Management Solution

The Value

- *Easy accessibility*
- *Quick Retrievals*
- *High standard offsite storage*
- *Meeting stringent Industry compliances.*

The Solution

The Principal Investigator has primary responsibility for achieving the technical success of the project, while also complying with the policies and regulations associated with the research.

Records Management is one of the essential areas of responsible conduct of research. It is important for researchers to understand how data management issues relate to the responsible conduct of research.

Additionally, Compliance to DCGI (Drug Controller General of India), FDA (Food & Drug Administration) & EMA (European Medicines Agency) Regulations for storage of records affects all researchers and deserves extra attention and diligence.

Iron Mountain’s efficient process of managing records facilitating the Customer meeting all the challenges related to stringent industry compliances.

Also, easy accessibility and Quick Retrievals is possible with Iron Mountain’s complete records and information management program.

“Oversight of data management represents a significant investment of time and effort by the Principal Investigator and now Iron Mountain is taking care of it”, says Dr Suresh Attili.
