

Case study

Supporting a secure office closure and move

A global pharmaceutical company needed to close and move from a 125K sq.ft. office building during the start of the pandemic. With only three months to vacate the space, limited facility access due to local restrictions, and a significant amount of dated records, IT assets, and employee belongings, the company turned to Iron Mountain Clean Start for help.

Clean start walkthrough and assessment performed and identified:

- 22m+ documents in filing cabinets, shelves, and boxes
- Over 1,700 pieces of equipment, furniture, and IT assets needing temporary storage, relocation, or disposal
- Opportunity to digitize and destroy documents and transition to a paperless future at the new location
