

PROTECT.

UNLOCK.

RETHINK

how you do
business

TRANSFORM.

OUR PURPOSE IS TO BE YOUR MOST TRUSTED PARTNER.

TO HELP YOU PROTECT AND UNLOCK THE VALUE OF WHAT MATTERS MOST TO YOU IN INNOVATIVE AND RESPONSIBLE WAYS.

WHAT MATTERS MOST TO YOU, MATTERS MOST TO US.

As a service provider for 70 years, we continue to evolve alongside you. Together, we're solving a broader range of problems and protecting a broader range of assets. We're collaborating with you to drive workflow improvements across paper, digital and media files. We're automating business processes that allow you to mine your data, so you can uncover new revenue stream opportunities and cost savings. And we're giving you the ability to claim green electricity consumption from our 100% renewable energy powered data centres. Our focus is innovation. Our outcome is transformative. It's a powerful partnership that's really just getting started.

Today, we partner with over
225,000
CUSTOMERS

PROTECT.

From protecting critical business information to preserving valuable artefacts and crucial moments in history, safeguarding physical and digital assets throughout their lifecycle is our foundation. Iron Mountain has the resources and expertise you need to effectively manage your inventory and make it easily accessible when needed. Plus, our protection extends further downstream. As items are no longer needed or useful, we offer environmentally responsible shredding and IT disposition services.

UNLOCK.

Tackling and resolving the complexities that come with distributed content and information is one of the things we do best. With proven information governance practices, we make it easier for you to adhere to policies and better manage risk. And with business process and workflow automation practices, you're able to gather and analyse the right set of information at the right time—regardless of format type. Unlocking value through improved information management practices across the lifecycle has proven to be a competitive edge to our customers.

TRANSFORM.

Helping customers like you transform in meaningful ways is at the heart of what we do. For some, this may be guidance on best-fit infrastructure options that could include green-powered data centres, cost-effective multi-tier cloud-storage, and scanning services to bring appropriate paper storage into the digital realm. For others, this may be working together on next-generation technology and methodologies to maximise the value of existing Enterprise Content Management (ECM) infrastructure and legacy applications. In these cases and more, we're reshaping processes to drive business intelligence, faster.

PROTECT. UNLOCK. TRANSFORM.

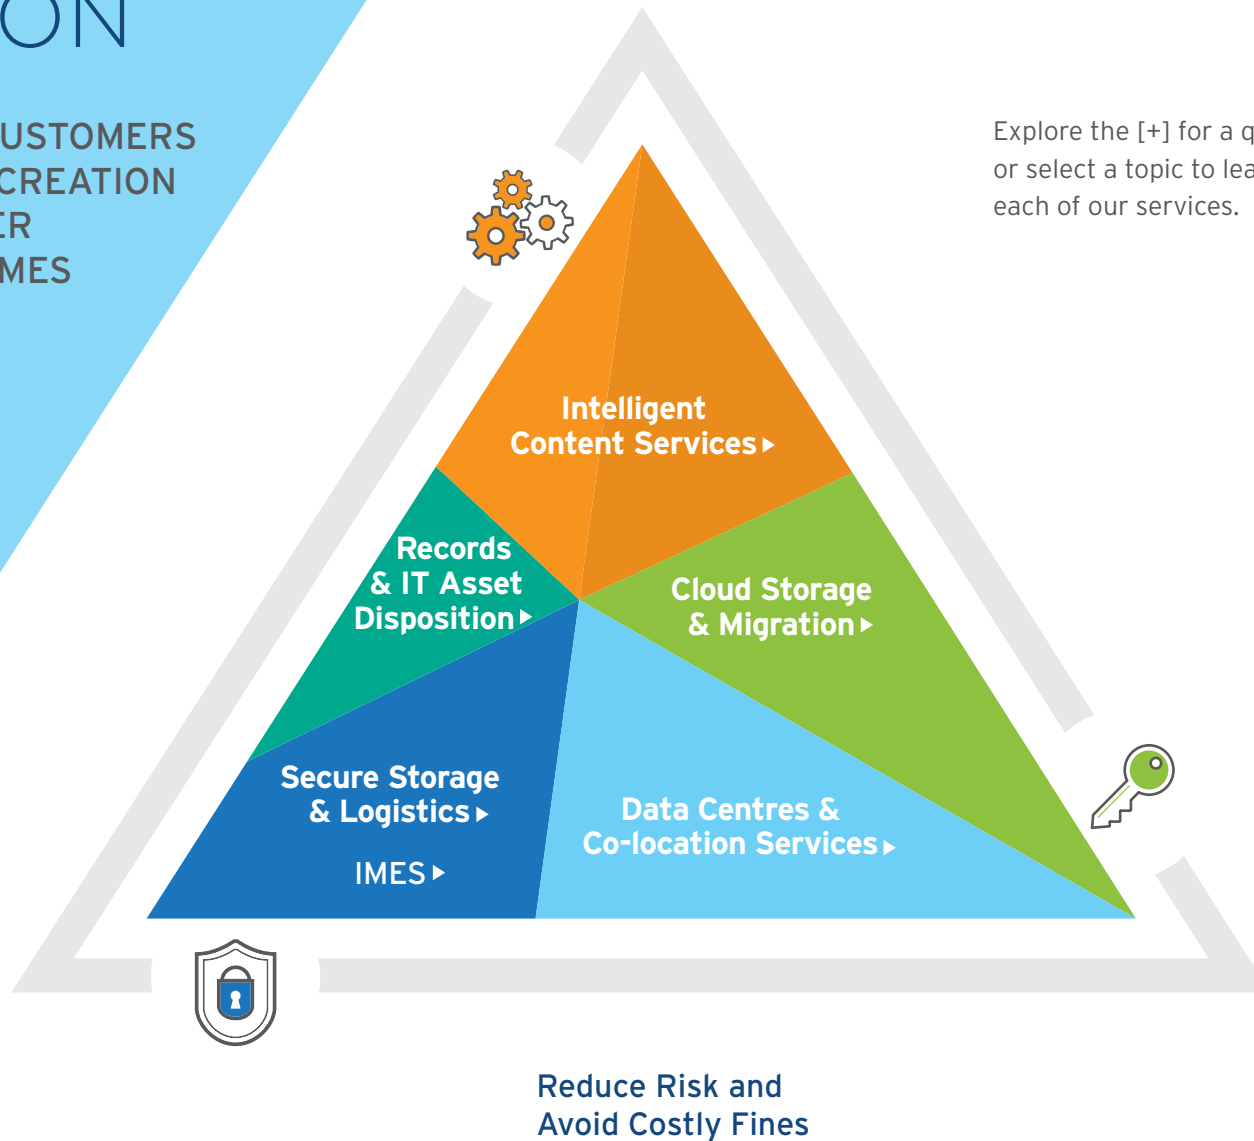

The interconnectivity of these attributes creates a unique and powerful combination. It's an intentional evolution to better serve and stay ahead of our customers' needs.

INTELLIGENT CONTENT SERVICES

SPEED TIME
TO VALUE

IS THIS YOUR REALITY?

Information Overload and Chaos

- Difficulty managing large volumes of unstructured content such as documents, audio, videos, and photos
- Teams unable to intelligently view and interpret information to initiate appropriate actions
- Information sprawl making one version of truth impossible across teams and your organisation

READY FOR CHANGE?

Remove Information Silos

Rapidly connect next-generation technologies to existing content sources to establish a consistent foundation for modernisation.

Enhance your Business Intelligence

Using innovative AI/ML for advanced classification and entity extraction, you can capture, classify, search, and analyse your content in days instead of months.

Unite Physical and Digital Data

Unlock valuable insights that can help your organisation's strategic objectives.

Enable Information Governance

Reduce risk by automatically applying and enacting retention, privacy and security policies.

SHRED AND IT ASSET DISPOSITION SERVICES

PRIORITISE SECURITY AND SUSTAINABILITY

IS THIS YOUR REALITY?

Risk Exposure

- Lack of clarity and confidence about how secure your items are after they leave your facilities
- Unable to securely destroy paper records and documents putting your organisation at risk
- No visibility or understanding of environmental risks that may occur at the end of life of your IT assets

READY FOR CHANGE?

Track assets through a comprehensive, secure chain-of-custody

Ability to track assets as they are processed through secure checkpoints including trucks that are equipped with alarms and GPS tracking.

Scale with a broad national & global footprint

Global coverage model that operates across five continents.

Protect your reputation through adherence to environmental guidelines

Adhere to the strictest environmental sustainability guidelines including a no-overseas and no landfill policy.

SECURE STORAGE AND LOGISTICS

RETHINK YOUR
WORKSPACE

IS THIS YOUR REALITY?

Storage and Resource Limitations

- Non-essential assets are consuming valuable space, making it hard for you to consolidate your real estate footprint and reduce costs
- You need to safeguard records and other valuable assets so they are protected from theft, damage and inadvertent disclosure
- You want help managing your inventory and need quick access and delivery of what you need when you need it

READY FOR CHANGE?

Transform your workplace to improve real estate efficiency and reduce costs

Maximise your real estate by clearing out materials that are occupying valuable space, including paper records, servers, PCs and IT assets, artwork, and more. Iron Mountain can manage the clean-out process and provide services to facilitate the secure destruction of the items you don't need and the temporary or permanent storage of the ones you do.

Keep valuable assets safe

Iron Mountain facilities are reputed for security: perimeter, entry, and interior. Only authorised users will ever have access to your inventory, and proven fire safety and environmental safeguards ensure their continued viability. We are governed by strict, industry-leading chain-of-custody procedures and our proven workflows and technology-enabled tagging means you'll have complete visibility to your inventory.

Access is just a click away

Iron Mountain Connect™ provides online management of your inventory. With just a few clicks, you can search through your inventory, locate what's required and arrange for delivery.

CLOUD STORAGE AND MIGRATION SERVICES

MODERNISE YOUR APPROACH TO DATA MANAGEMENT

IS THIS YOUR REALITY?

Data Storage and Migration Challenges

- Non-existent or immature data tiering strategy; no process to manage active and inactive data long-term, resulting in expensive storage costs
- Unable to scale up or down with ease
- Lack of planning for different data storage events, such as archive, backup, disaster recovery, and ransomware protection

READY FOR CHANGE?

Apply data management and information governance across both physical and digital assets through one supplier

All with full transparency and auditable chain of custody throughout the data lifecycle.

Know that data is protected, both locally and globally

Hyperscale-ready, strategic edge, underground data centres in 15 locations across APAC, EMEA and NA.

Save IT dollars with smarter data access, disaster recovery and storage options

Protect your data by placing it on the right tier, at the right time. Apply different tiers for archive, backup, and disaster recovery. Safeguard data against ransomware with offline, air-gapped cold storage options.

DATA CENTRES & CO-LOCATION SERVICES

ACHIEVE HYBRID
IT SUCCESS

IS THIS YOUR REALITY?

Accountability for up-time. All the time.

- Accountable to securely maintain and scale infrastructure, clouds and network availability required for the uptime of your business
- Increased audit and compliance requirements
- Need to build, maintain and report on environmental sustainability in your information management initiatives

READY FOR CHANGE?

Connected Communities

Connect and scale your infrastructure easily and efficiently with the top global and local carriers, cloud, network and managed service providers within our robust ecosystems.

Compliance

Have confidence that your business critical infrastructure is protected through our multi-faceted approach to compliance which covers: information security, quality, energy, environmental and health & safety. A few of our certifications include: HIPAA, FISMA High, PCI-DSS, ISO 27001, and SOC 2/3.

Proven Track Record

Rest easy knowing you have the stability of an S&P 500 REIT with 1,400+ locations in 56 countries around the globe. Our footprint includes Interconnectivity hubs, hyperscale, enterprise, underground and strategic edge facilities.

Certified Sustainability

Take advantage of our 100% renewable energy powered data centres & receive credits through our Green Power Pass programme, which includes 3rd party audits & certification.

IRON MOUNTAIN ENTERTAINMENT SERVICES

ACTIVATE YOUR ARCHIVE

IS THIS YOUR REALITY?

Protecting and Preserving Irreplaceable Content

- Too much on your plate, including researching formats, transferring media, and budget challenges for never ending migrations
- Involved in asset protection, preservation, and distribution, including monetisation of assets
- Need to curate content across physical storage and digital storage
- Satisfy stakeholder requests, including restoring older or damaged tapes and reels of original films and recordings

READY FOR CHANGE?

Expertise that Meets Your Diverse Range of Challenges

We get it. We get it done. We'll keep your media from becoming obsolete, expertly migrate your work, and manage it in an ever-evolving digital world.

Climate-Controlled, Secure Storage Facilities and Private Vaults

From tapes, hard drives, film and other media formats—store it with us. Private storage options protect other high value assets—including costumes, props, sets, instruments and more.

Breadth of Media Preservation and Restoration Methods

We take pride in the care we place on your archive. Through premium archival services, risk assessments, and preservation and restoration remediation options, we have the expertise and equipment to restore any asset of value to you.

Long-Term Asset Preservation and Management

On-premise approach to file storage and access. AI/ML meta-data enrichment, high-resolution 2-D and 3-D image capture, and visual curation capabilities.

BUILDING A BETTER FUTURE

ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG)

Iron Mountain incorporates Environmental, Social and Governance (ESG) principles into the core of how we do business as a purpose-driven organisation. We deliver solutions that enable our organisation and yours to manage information in an environmentally conscious and socially responsible manner.

RE100

As a member of the RE100, our goal is to become **powered by 100% renewable energy** by or before 2050

100% Score

from the Human Rights Campaign Foundation's Annual Scorecard on Workplace Equality

61% Reduction

of Greenhouse Gas (GHG) emissions from a 2016 baseline

58,595 MWh

of renewable energy used in 2020, accounting for 81% of our global electricity use

ACHIEVE YOUR RENEWABLE ENERGY AND CARBON REDUCTION GOALS

Take advantage of our 100% renewable energy powered data centres, and receive credits through our Green Power Pass Programme, which includes 3rd party audits and certification.

A GAME CHANGER FOR YOUR SUSTAINABILITY PROGRAMME

Green Power Pass adds a significant amount of renewable energy to our customers' overall power consumption mix. With significantly more green power to report, GPP customers achieve their sustainability objectives faster and with minimal effort. This can mean big savings for hyperscale data centre customers.
