

PHOENIX

DATA CENTER (AZP-1)

Situated in a 39-acre campus just 10 minutes east of downtown Phoenix, AZP-1 is a 588,669 ft², 41 MW data center, purpose-built on Arizona's primary hub for east-west internet traffic. The data center offers exceptional levels of energy-efficiency with PUE as low as 1.2 and is connected via a 100 Gbit/s dark fiber ring with two other Iron Mountain facilities – AZP-2 (on the same campus) and AZS-1 in Scottsdale. This creates a huge and easily accessible ecosystem of cloud, network and other service providers for customers.

WHY CHOOSE AZP-1?

- > **CONNECTIVITY**
Huge selection of carriers and other cloud on-ramps for easy interconnection
- > **EFFICIENCY**
High-density configurations up to 30 kw/rack, and extreme energy efficiency.
- > **INCENTIVES**
Qualifying Arizona data center customers may reduce costs by taking advantage of lucrative tax incentives.
