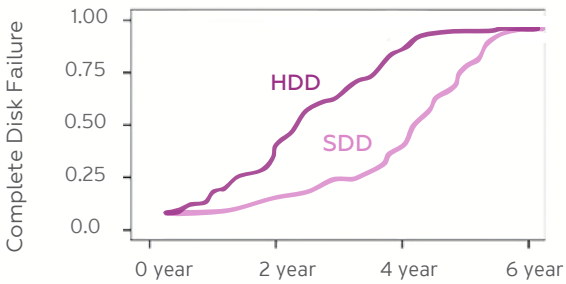
Long-term storage: Hard Drives aren't the answer

Likelihood of Hard Drive Failure within 6 Years



Source: arxiv.org - The Life and Death of SSDs and HDDs

Iron Mountain Media & Archival Services: Your music industry archival experts

At Iron Mountain Media & Archival Services, we understand the challenge facing labels, publishers, and artists who rely on hard drives for long-term storage of their valuable digital assets. Our staff of award-winning engineers have a history of working with companies in the music industry to ensure that hard drive archives are professionally inspected, restored, organized and preserved across multiple storage locations.

Hard Drives are prone to fail within the first 6 years

It's hard to believe, but that hard drive you're storing all your valuable media on might not be as safe as you think. Did you know that hard drives often fail within the first six years? In an industry where every bit of data is a valuable asset, this is a risk you can't afford to take.

Our service offerings include

- Chain of Custody
- Inbound/Outbound
- Health Check Restoration/Spin Up
- Data Entry and Data Augmentation
- LTO8 LTFS Back-up of master hard drive
- Extensive Metadata Collection Process
- Access hard drive catalog and extract searchable details, seamlessly migrated to your inventory database or provided via electronic database
- Customized to your organization's needs

Don't wait for disaster to strike

Contact us for a no-cost, no-obligation test evaluation of your hard drive archives.
