

Streamline the IT asset refresh process

The IT asset refresh process is essential for businesses to ensure their technology is up-to-date and secure when collecting and disposing of retired equipment. By establishing reliable asset refresh processes, businesses can maximize their IT asset investment, guarantee data security, and support sustainability goals.

Your objectives

With a focus on creating operational efficiencies, you want to maximize the value and ROI of IT assets and reduce maintenance costs, all while ensuring data security with your devices. You also want to improve the reliability and performance of IT assets by ensuring hardware is always up to date. Lastly, sustainability is a business priority, and you need a sustainable process to reduce the environmental impact of your IT assets.

Iron Mountain's IT asset refresh service can support these objectives while also helping you optimize business efficiency. We provide a comprehensive approach to asset management, from the secure disposal of outdated equipment to the deployment of new hardware. Our IT asset disposition (ITAD) service ensures the security of your data through our industry-leading secure chain of custody. Additionally, we provide data sanitization and destruction capabilities that are supported by a certificate of destruction, providing evidence that all data-bearing media has been destroyed.

We also help you reduce your environmental footprint by using sustainable best practices, proven in your Environmental Benefits Report, which shows the reduction in greenhouse gasses and landfill waste. With Iron Mountain, you can optimize your IT investment while ensuring a seamless deployment of new IT assets while replacing retired assets.

Our services

Iron Mountain's IT asset refresh service is an integrated program management solution that provides end-to-end support for IT asset refresh projects. Our service includes retired hardware removal, new hardware deployment, and IT asset disposition. Our team of experts can help you plan, manage, and execute your IT asset refresh project—on time and on budget—and we provide detailed reporting and tracking to ensure that all assets are properly accounted for. With Iron Mountain, you can trust that professionals are handling your IT asset refresh project.

IT asset refresh service provides:

- Managed service to refresh assets
- Centralized process to ensure technology is up-to-date and supports worker productivity
- A process to reduce IT costs and increase efficiency

Hardware asset management overview
