

The Cultural Imperative

4 tools of the trade

1. Physical asset protection

Store objects to protect over a long lifespan with minimal damage or degradation.

2. Digitisation

Scanning documents and works of art not created digitally renders them storable and retrievable online, so they can be viewed and enjoyed by generations to come.

3. Asset protection

Electronic media types change over time. Preserve and protect for the future with records and information management, data migration and restoration.

4. Reconstruction technologies

Robotics, 3D scanning, machine learning and artificial intelligence can help reconstruct.
