IRON MOUNTAIN®

THE INFORMATION MANAGEMENT SYSTEM CHECKLIST

If you're considering a flexible Information Management system that adapts to your needs — you're not alone. But choosing the right software can be a daunting mission.

We've created a quick checklist that you can use to understand a vendor's ability to meet modern requirements with their platform offering.

CORE CAPABILITIES

Can the platform manage...

☐ Documents and data

☐ Video content

☐ 3D files

☐ Internet of Things (IoT) data

Does the platform support...

☐ Large-scale bulk ingestion

☐ Global access to information

☐ Basic and advanced search <50 ms

☐ Run in the cloud environment you prefer

☐ AI and metadata-based system

FLEXIBILITY

Is the platform flexible enough to...

☐ Allow different core systems to "talk to" each other

☐ Ensuring information access for internal and external parties.

☐ Integrate seamlessly with a wide range of services and apps

☐ Run in the cloud environment you prefer

☐ Scale aggressively without performance impacts

☐ Continuously improve instead of requiring expensive upgrades

ADVANCED CAPABILITIES

Does your platform offer...

☐ Business-specific artificial intelligence (AI) and machine learning (ML)

☐ Open architecture to allow quick, easy integrations

☐ A low-code development tool to develop apps faster

☐ Advanced capabilities for information governance

☐ A forward-thinking vision for the future of information

IF THE PLATFORM YOU'RE CONSIDERING DOESN'T TICK ALL THE BOXES- WE'RE HERE TO SHOW YOU A BETTER WAY FORWARD.
