

# Data centre ITAD & decommissioning services

Champion circular data centre excellence with secure ITAD and scalable decommissioning services. Our integrated solution ensures strict security and audit compliance in decommissioning, while maximising value recovery from retired hardware. Iron Mountain ensures unmatched data security through a secure chain of custody that tracks IT assets at every stage of their journey.

No matter how large or varied your operational footprint is Iron Mountain has the experience, physical resources, and global presence to support it. We operate in the most complex environments all over the world across owned sites, co-location facilities, and small points of presence.

## Common use cases

Providing IT departments with a secure and efficient way to manage data centre asset disposition, regardless of the size of the project.

# Data centre ITAD & decommissioning services

**Data destruction**

- › Teraware: Data sanitisation built for the enterprise
- › Wipes all storage types, onsite or remotely, within days instead of weeks
- › Ensures compliance with certified audit trails for each asset
- › Fully traceable process from wiping to final disposition
- › Shredding on-site or off-site for hard drives, tapes, and other storage media

**Decommissioning**

- › Onsite physical inventory audit of equipment
- › Equipment de-rack
- › Rack removal
- › Scalable, efficient, fast end-to-end reverse logistics
- › Assets that can be processed include:
  - › Servers
  - › Storage systems and devices
  - › Networking gear
  - › Computer tapes
  - › Racking

**Packing**

- › Customised packing for diverse equipment
- › Protective padding for safe transport
- › Clear item labeling for easy tracking
- › Eco-friendly materials for sustainability

**Transportation & shipping**

- › Timely pickup and delivery scheduling for seamless logistics
- › Secure handling protocols during transportation to safeguard equipment
- › Detailed tracking and documentation of all items in transit
- › Flexible options for pickup and delivery tailored to client needs

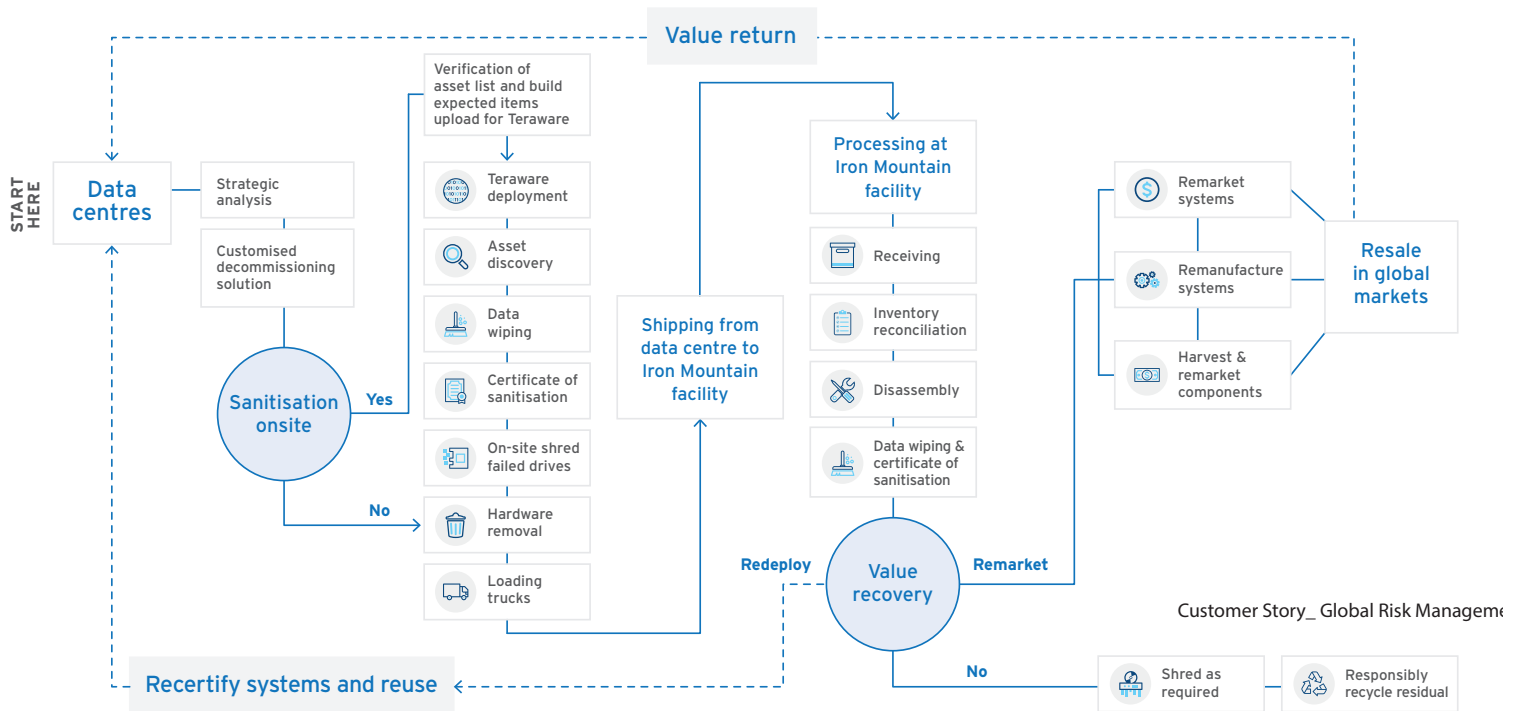

**Asset processing & value recovery**

- › Component harvesting
- › IT asset remarketing:
  - › Sanitise data
  - › Test, grade, refurbish
  - › Resale
- › e-Waste recycling
  - › Any data-bearing assets are destroyed
  - › Adherence to environmental best practices

## Decommissioning step-by-step

Our robust process ensures data security & maximises circularity best practices

# Maximising security, compliance and value

## Security

Protecting confidential data

- > **Sanitise or destroy assets containing confidential information**
- > **Secure chain of custody**
  - > Using proven logistics and asset tracking, we manage equipment through every stage of decommissioning and disposition
  - > We directly own and operate a global fleet of alarmed, locked, and GPS-tracked vehicles
  - > Verify chain of custody has been maintained through central portal, including certification of destruction (COD)

## Value optimisation

Minimise total ownership cost

- > **We help you recuperate maximum market value from end-of-life IT assets**
- > We can safely remarket decommissioned assets, lowering your total cost of ownership

## Sustainability

Reduce footprint

- > **Work with a certified organisation to securely recycle IT assets with little or no resale value**
- > Ensure your e-waste is never landfilled, and minimise the carbon footprint of your end-of-life equipment

## Compliance

Legal & industry standards

- > **Have your assets processed in accordance with all federal, state, and local regulations and industry best practices**
- > Tailored processes in line with your specific industry and corporate commitments
