

Introducing Managed Firewall By Check Point

Empowering Data Center Security

Managed Firewall, Powered by Check Point* is a cutting-edge cyber security solution. Directly hosted in our data centers, Managed Firewall ensures cloud scalability while having best-in-class hardware security and low latency, all under one roof. The service safeguards your critical IT infrastructure, applications, and sensitive data from cyber threats, without the need for hardware installations or maintenance.

Why You Need Managed Firewall

Enhanced Security: Robust physical and cyber security measures to prevent your data center infrastructure from malicious activities, including unauthorized access, malware and data breaches.

Scalability: As you grow, you can dynamically increase your protection capacity. With Managed Firewall, your security infrastructure can easily scale up or down to meet your changing needs.

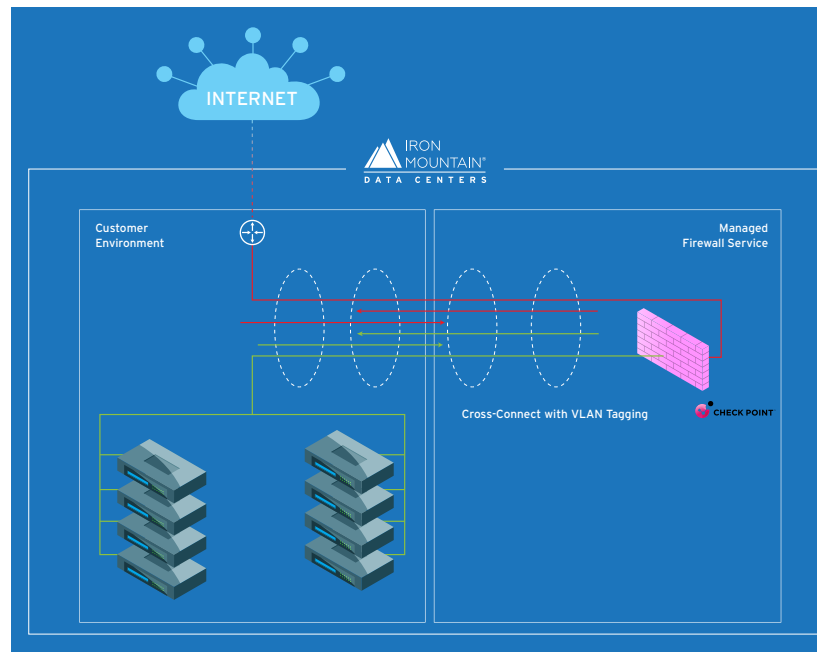

Cost Efficiency: With Managed Firewall, you eliminate the need for expensive hardware and maintenance. This service reduces upfront operational expenditures. Managed Firewall Powered by Check Point is less expensive than buying Managed Firewall through other vendors.

Simplified Management: With Managed Firewall, you can leave the ongoing maintenance, upgrades and complex integrations to Check Point. This reduces the burden on your IT team, allowing them to focus on other critical tasks.

Rapid Deployment: Managed Firewall Powered by Check Point provides quick deployment of firewall services without the need for physical hardware installations.

24x7x365 Monitoring and Alerts: Managed Firewall Powered by Check Point provides continuous monitoring of your data center's network traffic and security events. You'll receive alerts on any high and critical events. Check Points' experienced support teams are available round the clock to assist you with any security incidents.

Regulatory Compliance: Managed Firewall ensures compliance by implementing security controls, monitoring and auditing network activity..

With Managed Firewall Powered by Check Point, you'll receive:

Initial Management & Gateway Service set-up

Up to 8 policy installs per month

Only 1 Cross Connect needed to connect

1G Throughput

Monitoring and Alerts

Full NGTX Protection

24x7x365 Fully Managed by Check Point

On-demand security

Superior Security Gateways and Highest-Caliber Threat Prevention Including:

- > Firewall
- > VPN
- > IPS
- > Application Control
- > Content Awareness
- > URL Filtering
- > Anti-bot
- > Anti-Virus
- > Anti-Spam
- > SandBlast Threat Emulation
- > SandBlast Threat Extraction
