SECURE ITAD PROGRAM

THE CONVENIENT WAY TO STANDARDISE ITAD

Iron Mountain's Secure ITAD Program provides IT departments with a reliable and efficient way to manage IT asset disposition, regardless of the size of the project. With decades of experience ensuring data security, we serve 95% of Fortune 500 companies. Our IT asset tracking capabilities are unparalleled, thanks to our secure chain of custody. Your IT assets are tagged and tracked at the time of pickup, and our world-class logistics are made possible by our experienced team and 3,600 purpose-built Iron Mountain trucks. We can support large projects or smaller ongoing ad-hoc ITAD needs for one office, multiple offices, or many offices globally.

Iron Mountain provides a dedicated account manager who will service your account and ensure prompt responsiveness to your needs and requests. An online portal allows for online ordering, asset tracking, and reporting, providing you with what you need when you need it.

The Secure ITAD Program was designed with you in mind so you can focus on your core business while leaving the ITAD process to Iron Mountain.

BENEFITS OF THE SECURE ITAD PROGRAM

Iron Mountain's Secure ITAD Program makes standardising your program easy.

ACCEPTED ITEMS:

> Desktops
> Notebooks
> Network Devices
> Telephones: Desk & Mobile
> Teleconference Systems
> Tablets
> Laptops
> Hard Drives: Normal & SSD
> Tapes
> Docking Stations
> Monitors: CRT, LCD, LED, etc.

...and more

HERE'S HOW IT WORKS:

Consistency across all sites and a dedicated program manager. Whether you have one location or dozens of locations around the world, Iron Mountain's online portal provides an easy way to request a pickup, view pricing, track orders, and view documentation, such as certificates of recycling and data destruction.*

Pre-approved and preferred rates. With the Secure ITAD Program, you'll know in advance exactly what you'll spend on projects and receive preferred pricing. Convenient online scheduling through our online portal provides an easy way for you to place an order any time, without having to speak with someone over the phone.

Real-time tracking. Experience real-time tracking and gain the advantage of our secure chain of custody, which provides auditable evidence of the whereabouts of your devices from pickup to completed disposition.
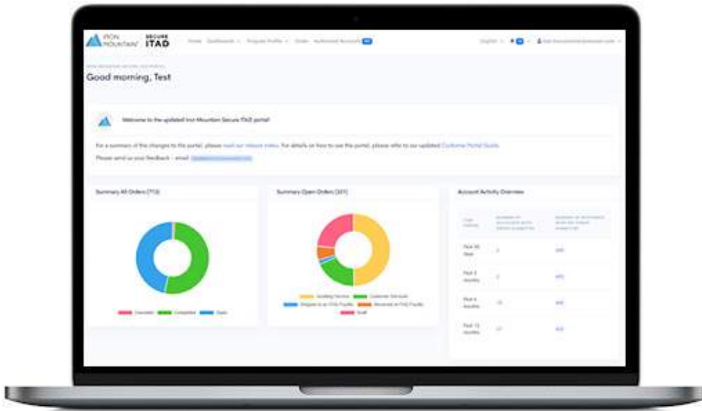

Certificate of destruction. A certificate of recycling and data destruction provides evidence that your IT assets have been securely destroyed and disposed of in accordance with industry regulations. This helps to protect your organization's reputation and reduces the risk of a data breach.

World-class logistics and processing. Your information stays safe with our fleet of 3,600 locked, alarmed, and GPS-monitored vehicles and Iron Mountain–badged employees, along with secure processing that fully complies with all applicable laws, regulations, and industry best practices.
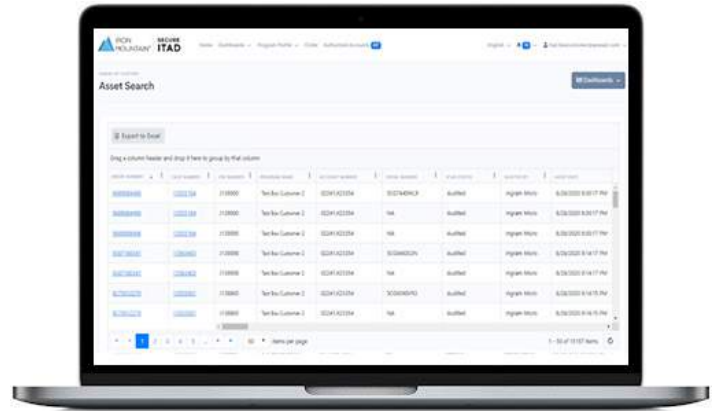

Access your information through the Secure ITAD Portal

Schedule pickups online and track assets

The Audit Report lists make, model, serial number, and more

The secure online portal is available in select countries.
