

# Secure & sustainable IT asset disposition

Your destination for  
retiring IT assets in  
a circular economy.

# Your IT asset disposition (ITAD) program

---

Iron Mountain's ITAD program offers IT departments a secure and consistent solution for managing IT asset disposition. Drawing upon decades of experience in ensuring data security, we proudly serve more than 90% of Fortune 1000 companies.

Our unmatched data security is provided through a secure chain of custody that starts with vetted personnel and secure transport and extends to our controlled facilities. From the moment of pickup, your IT assets are tagged and tracked. This meticulous process is facilitated by our world-class logistics and supported by an experienced team.

Whether you're managing extensive projects or handling smaller, ad-hoc ITAD needs, we have the solution for you. Our program offers flexibility and scalability, capable of accommodating the needs of various setups - be it a remote workforce, a single office, multiple offices, or even global operations spanning across numerous locations.

Experience the convenience of our user-friendly online portal, enabling seamless online ordering, asset tracking, and reporting, including the ability to retrieve your certificate of data destruction (COD), supporting compliance requirements. Ensure seamless workflows with IT service management (ITSM) system integration, such as ServiceNow, for an integrated process.

Delivering a high level of service, Iron Mountain's customer care and service delivery teams ensure prompt response to your needs and requests

# Items accepted for ITAD

Data destruction + recycling.

Accepted items	Offsite	Onsite

- > Assets are demanufactured into commodity categories
- > Recycled in eco-friendly manner

## Additional services

- > Onsite audit
- > Data centre decommissioning services
- > Data erasure
- > Deinstallation & removal
- > Short term asset storage
- > Box program
- > Donations
- > Media console program
- > Deployment & redeployment
- > Lease return services

# Comprehensive ITAD reporting

Support compliance requirements and receive reporting that quantifies progress toward your organisation's sustainability goals.

Iron Mountain's ITAD program offers comprehensive reporting to ensure documentation requirements are met and compliance is achieved. Reports can be conveniently accessed through an online portal, giving users the flexibility to get the specific documentation they need. Iron Mountain's industry-leading secure chain of custody provides complete tracking and visibility, along with the reporting to support it.

## Reporting includes:

### > Settlement Report

Provides a consolidated wrap-up of the audit report, detailing the equipment collected, including its weight, make and model. It also outlines how each item was reviewed and disposed of, including the date.

### > Audit Report

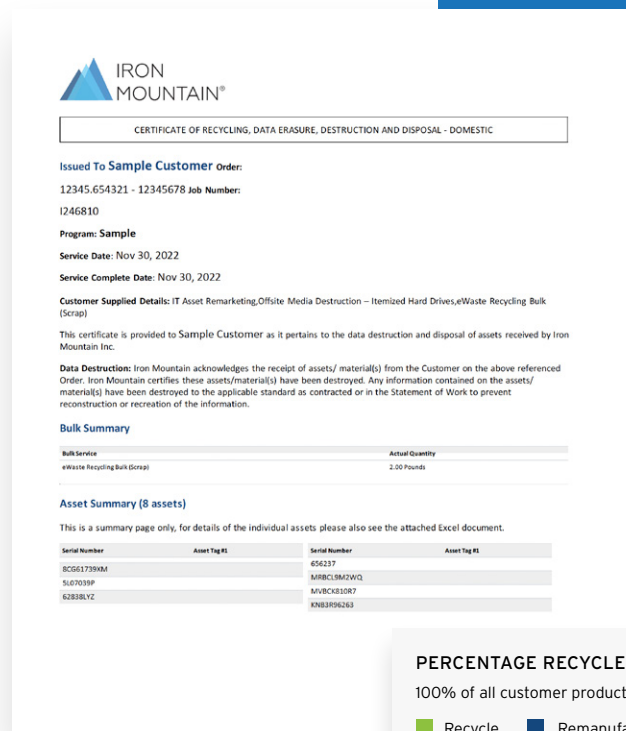

This itemised processing provides a summary of the assets processed, including the make, model, and serial number of each item.

### > Certificate of Destruction (COD)

Documentation and confirmation of the destruction of data-bearing media in compliance with all relevant laws and industry standards.

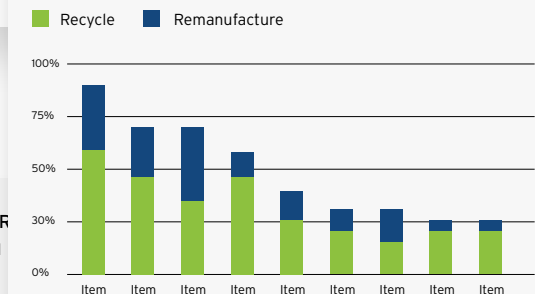

### > The Environmental Benefits Report

Highlights the beneficial environmental impact of your ITAD program on the environment.

### PERCENTAGE RECYCLED VERSUS REMANUFACTURE

100% of all customer products were recycled

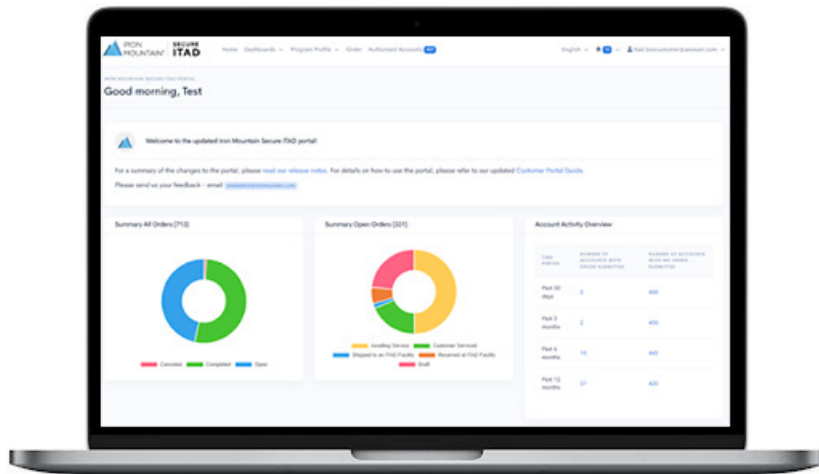

### PERCENTAGE WEIGHT BY PR Categories from EPA WARM model

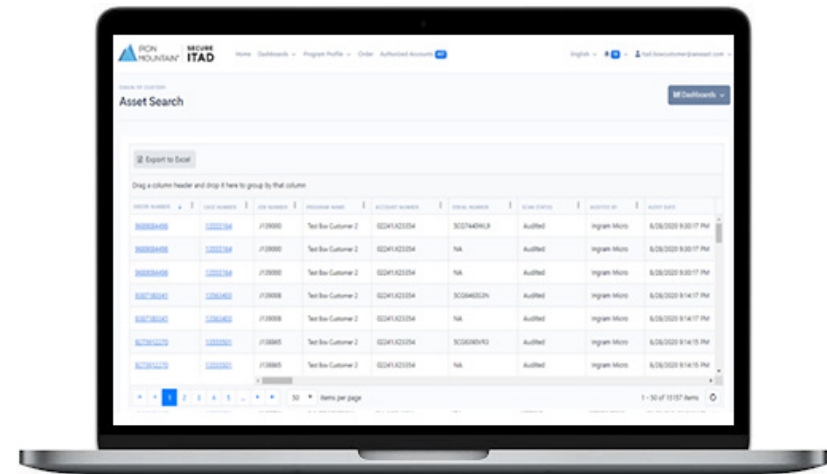

# Secure ITAD portal: access reporting and place orders with ease

Streamline your workflow by integrating your IT service management (ITSM) system, such as ServiceNow, with our online portal.\*

Schedule pickups online and track assets

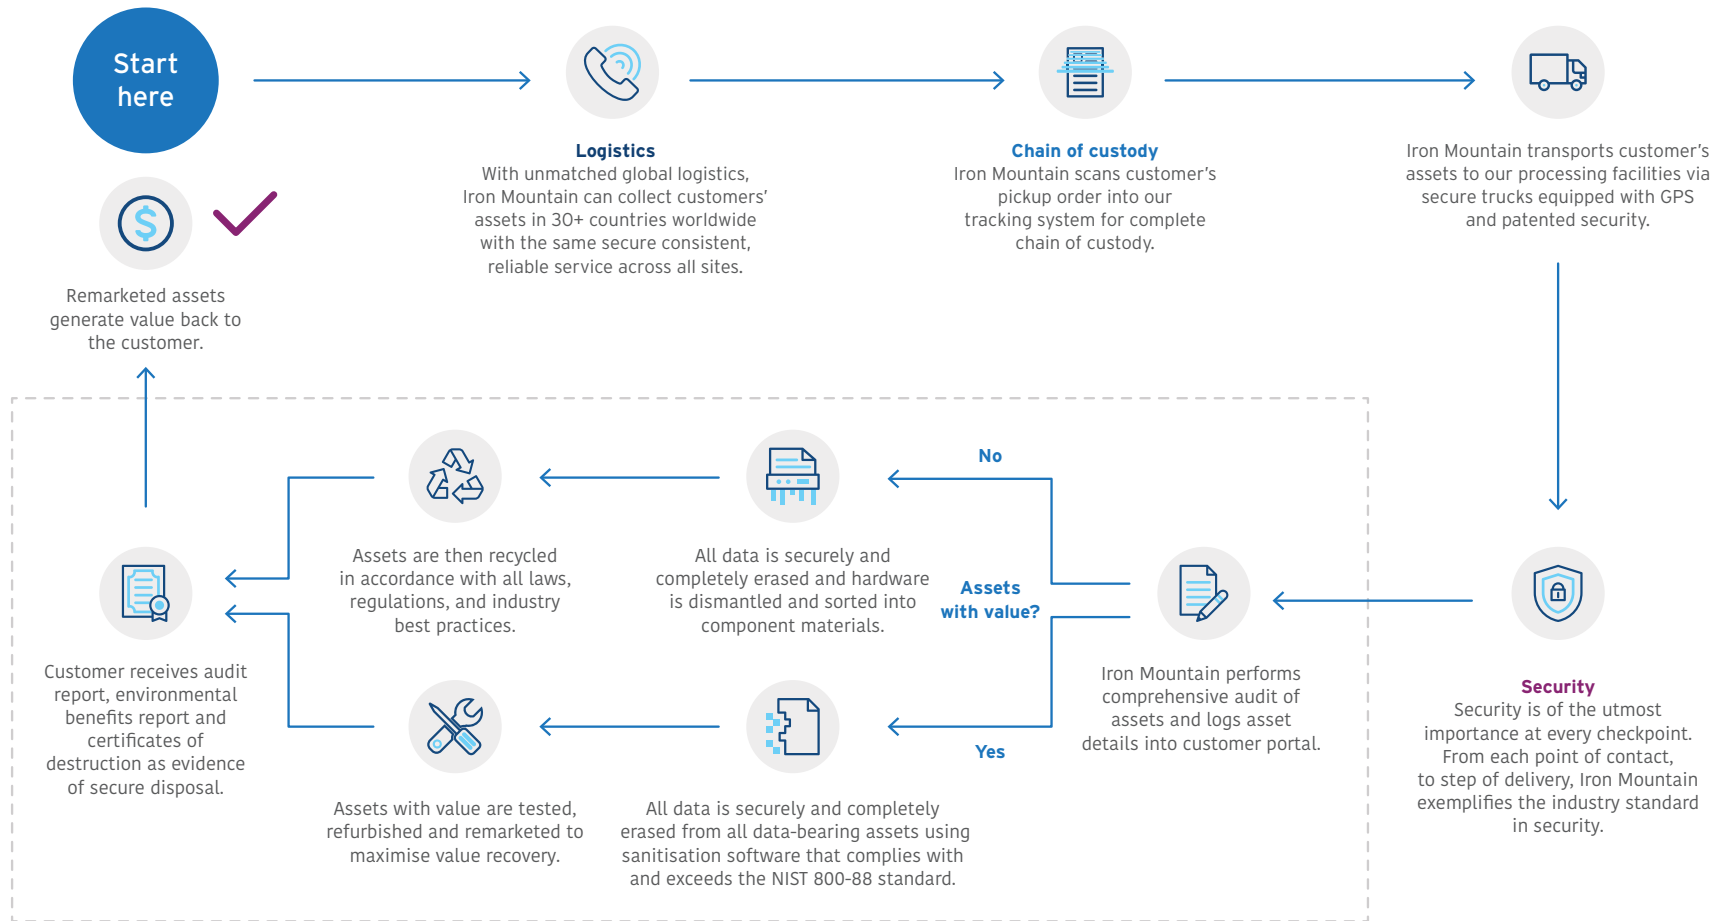

The audit report lists make, model, serial number, and more

- Consistency across all sites supported by a dedicated program manager
- Pre-approved and preferred rates
- Real-time tracking
- Certificate of destruction
- World-class logistics and processing

\*Secure ITAD portal not available in all regions.

# ITAD workflow for corporate IT assets

**Logistics**

- › Broadest service footprint
- › Consistent reliable service across all sites
- › No need for local or regional vendors
- › GPS pings at set intervals
