

Transform digital and physical data into intelligence with Iron Mountain InSight® DXP on AWS®¹

Business challenge

While digital transformation is a critical priority, companies face significant challenges in harnessing their data for a competitive edge. Vast, unstructured data is often fragmented across disparate physical and digital systems, which prevents unlocking its value and blocks the use of modern AI.

This data chaos is compounded by slow, manual processes that bog down daily operations, increase costs, and frustrate employees, especially in hybrid workforces. On top of this, navigating complex and evolving data security regulations is a costly compliance struggle. Together, these challenges of data fragmentation, manual inefficiency, and regulatory pressure stifle enterprise growth and innovation.

From challenge to opportunity **Iron Mountain InSight DXP**

What if you could:

- Support data integrity, proactively meet complex regulatory obligations and significantly mitigate compliance and security risks and costs
- Boost operational efficiency and dramatically reduce costs, errors, and risks associated with manual processes
- Activate the hidden value and insights in your data that fuel strategic decisions and new growth opportunities, while building a solid foundation for higher-quality data to feed into AI models

Iron Mountain InSight DXP on AWS, is a scalable, modular AI-powered data platform that transforms your information into your competitive advantage. By unifying your digital and physical information and integrating with your core business systems, InSight DXP delivers the single pane of glass view needed for strategic oversight. The platform utilizes the latest advances in AI, like Amazon Bedrock®, to activate the wealth of information within your documents, adding critical context to your data. This leads to improved information governance and fuels better, more informed decisions. With customizable workflows and insightful dashboards, InSight DXP delivers the process transparency and actionable insights that power your business.

The power of partnership

Iron Mountain and AWS work together to bring you AI-powered solutions with a cloud-native, cloud-first approach that bolsters your ability to achieve strategic goals.

 Available in AWS Marketplace

¹ AWS, Amazon Bedrock, Amazon Comprehend, Amazon S3 Glacier, AWS Marketplace and Amazon Textract are trademarks of Amazon Web Services, Inc. or its affiliates.

InSight DXP enables you to:

- **Govern information intelligently and compliantly:** Systematically supply and apply retention and data privacy policies to all your information, whether it's digital or physical. AI-driven workflows clean up data in line with your retention policies, and the platform detects and redacts sensitive information. Manage your information lifecycle with built-in tools for legal holds, version control, audit trails, and destruction approvals.
- **Streamline manual document and data processes:** Automate document processing at scale using templated or customizable workflows with Amazon Comprehend® and case management in our unified platform. Pre-built connectors and APIs make it easy to integrate enriched data directly into your core business systems and workflows. AI agents act as your digital workforce, automating manual tasks, while the platform automatically flags data discrepancies and exceptions for human-in-the-loop review.
- **Unlock actionable insights from unstructured data:** Leverage a single, AI-driven hub to search and discover information across all your systems including Amazon S3 Glacier®. Using powerful intelligent document processing and advanced AI, like Amazon Textract® and Amazon Bedrock, our platform rapidly discovers, structures, and enriches your information at speed. Specialized AI agents automate information gathering and analysis, and smart, automated workflows remove unnecessary files.

The power of partnership: Iron Mountain InSight DXP on AWS

InSight DXP on AWS provides a single, holistic platform for your entire information lifecycle, providing AI-powered insights and workflow automation across all digital and physical content.

Built on a foundation of trust, Iron Mountain's expertise is relied upon by 95% of the Fortune 1000 for complex information management. A core tenet of our platform is data integrity; we provide you flexibility and control to manage how your data is utilized for training the models used in your instance of InSight DXP and such data remains distinct from the data sets of other customers, which maintains the confidentiality of your intellectual property. With over 70 years of governance expertise and a ranking as #9 in the Everest Group Business Process Services Global Top 50, Iron Mountain brings unparalleled experience and a global infrastructure.

This powerful platform offers:

- **Seamless transition from physical to digital:** Iron Mountain's expertise in secure handling and digitization of physical records across our digitization sites in 45 countries provides the essential foundation for moving to a fully digital and AI-powered environment.
- **End-to-end information lifecycle management:** From secure ingestion and storage to advanced analytics and compliant disposition, InSight DXP provides comprehensive control over your information.
- **Accelerated innovation with AI:** By leveraging AWS's cutting-edge AI services, InSight DXP empowers organizations to move beyond basic data management to truly intelligent insights and automated workflows, driving new opportunities and competitive advantage.

Unlock the full potential of your organization's data
