

Section for privacy policy for customers

We have made the following statement in italic below- to help you add a section to your Privacy Policy about Kamstrup's role as a data processor. This template is designed to ensure you meet data protection laws. It's a standard template to use in your Privacy Policy and is meant to help you comply with data protection regulations. It is important to note that this template is not a part of the Data Processing Agreement, but only to be used as a help and inspiration.

Below, you will find some fields highlighted with yellow. These must be completed before putting the following statement into your privacy policy. You will need to specify the purpose and legal basis for which we process data on your behalf in these fields.

“When processing your personal data in relation to meter readings, we engage our data processor, Kamstrup. Kamstrup specializes in intelligent metering solutions for energy, heat, and water utilities worldwide. As part of the processing, the following personal data will be processed: Meter number, address, Postal code, City, Phone number, GPS coordinates for the installed equipment, consumption data, Meter ID, Usage type.

The legal basis for processing your personal data in relation to meter readings of consumption data for [purpose] is GDPR article 6(1) [a-f depending on the purpose] “
