EARTHMOVING & COMPACTION SOLUTIONS TACKLE YOUR HEAVY-DUTY EARTHWORKS

Large-scale infrastructure projects demand certainty - equipment that performs, partners who deliver, and support that holds up under pressure.

We deliver earthmoving and compaction solutions tailored for complex, multi-site operations. With an extensive fleet and deep specialist expertise, we ensure consistent performance, dependable delivery and the confidence to keep projects moving at scale.

CAPABILITY YOU CAN RELY ON

EXTENSIVE EARTHMOVING & COMPACTION EQUIPMENT RANGE

To get a project site prepared with clearing, digging, demolishing or relocating we have the right equipment and solutions for both complex project challenges and one-off problems.

From site preparation and trench work through to road-base preparation and large-scale civil works, our earthmoving and compaction range is built to support projects of every scale.

Backed by experienced earthmoving experts, our fleet includes compact 1-tonne machines through to large 35-tonne excavators, along with dumpers, skid steers, wheel loaders and a wide range of attachments to suit the task at hand. Our compactors and rollers help create solid foundations, deliver consistent finishes and achieve reliable ground conditions across every stage of your project.

INDUSTRY APPLICATIONS

- > CONSTRUCTION & INFRASTRUCTURE
- > CIVIL ENGINEERING & EARTHWORKS
- > LANDSCAPING & GENERAL EARTHWORKS
- > BULK MATERIAL HANDLING & EARTHWORKS
- > QUARRYING
- > DEMOLITION & REMEDIATION WORKS
- > RESIDENTIAL
- > MAINTENANCE

BIG EARTHMOVING & COMPACTION CAPABILITY - THAT'S A KENNARDS HIRE JOB.

"We're seeing growing demand from civil contractors for a partner who can support across multiple project requirements. That's where we deliver - combining scale, capability, and expertise to meet the needs of complex projects."

Craig McMahon
General Manager, Specialist Operations
Earthmoving & Compaction

OUR COMMITMENT

We are a service-led partner, focused on practical delivery, operational reliability and compliance across earthmoving and compaction projects. Our teams combine quality equipment with technical expertise, giving you confidence your site is supported from day one.

We approach every project with a service-first mindset, helping plan and manage equipment safely and efficiently, in line with site and regulatory requirements.

OUR EXPERTISE

Our earthmoving and compaction experienced experts work alongside you to plan and support your equipment requirements from start to finish.

With over 75 years of industry experience across civil construction, infrastructure and complex ground conditions, our team provide practical guidance to help you prepare, move and compact ground efficiently. From bulk earthworks and trenching through to achieving consistent compaction outcomes, we focus on getting the right result on site.

Hiring with us gives you a flexible and cost-effective way to access well-maintained, site-compliant equipment. Backed by expert advice and ongoing support, we help keep your project moving safely and on schedule.

SAFETY, QUALITY AND COMPLIANCE WITH INDUSTRY STANDARDS

All equipment is maintained in line with state and national regulatory requirements, serviced after every hire, and backed by support from our team when needed.

We support safe operation on site by ensuring equipment is fit for purpose and ready to perform. Operators must be appropriately trained, assess ground conditions and underground services before excavation, use correct PPE, and follow site controls including signage, barricades and attachment procedures.

EARTHMOVING

EXCAVATORS

EXPLORE THE FULL RANGE 

We offer a large range of excavator hire for projects of all sizes. Whether you are operating on large-scale construction sites, delivering civil projects, or undertaking general earthmoving, our extensive range is designed to meet your specific needs.

RANGE																	
EXCAVATOR	1T	1.5T	1.7T	1.8T	2.5T	3.5T	4T	5.5T	7T	8T	14T	14.5T	21T	23.5T	25T	30T	35T

- TILT BUCKET

VACUUM EXCAVATORS

EXPLORE THE FULL RANGE 

Digging doesn't need to be destructive. Vacuum excavators provide a precise, low-impact excavation solution that helps minimise disturbance to surrounding areas. Using high-pressure water to break up soil and debris, combined with a powerful vacuum system for removal, vacuum excavators are ideal for quickly excavating small or deep precision holes. They are particularly effective for exposing buried utilities while reducing the risk of damage. Our vacuum excavator range includes trailer-mounted and truck-mounted models to suit projects of all sizes.

MINI LOADERS & WHEEL LOADERS

EXPLORE THE FULL RANGE

We offer a versatile range of mini loaders and wheel loaders to suit a wide range of job sites. These compact machines are designed to operate in tight-access areas while delivering the performance required for demanding site conditions.

SKID-STEER LOADERS

EXPLORE THE FULL RANGE

Skid steer loaders are a reliable choice for a wide range of earthmoving and construction projects. With their compact size and maneuverability, they're well suited to working in tight-access and confined job sites across building, landscaping and renovation projects. Skid steers support efficient site operations, from excavation and grading through to material handling and debris removal.

TRENCHERS

EXPLORE THE FULL RANGE

Our trenchers are built to handle a variety of ground conditions. Whether you need a ride-on or propelled trencher, our range delivers the stability and traction needed to perform on rough and uneven terrain. With durable tracks or wheels, they provide reliable digging performance across challenging site conditions. We also offer specialised trencher attachments to suit a range of excavation tasks.

RANGE

SPECIALIST PRODUCTS AND KNOWLEDGE

Our specialist team have the expertise and knowledge, backed up with an extensive product range, to provide technical guidance and complete end-to-end solutions.

Kennards Major Projects (KMP): specialist project management skills dedicated to supporting your commercial projects by taking over the burden of admin and logistics, freeing you to focus on project delivery.

Pumps & Power Solutions: comprehensive range of commercial pumps, power generators and accessories ideal for all sectors and industry.

Shoring Solutions: Our range of shoring equipment is engineered for the safest and most economical solutions to ensure compliance with safety standards.

Access Solutions: an extensive range of solutions when it comes to accessing high or awkward positions above ground, without putting the safety of your team at risk.

Site Solutions: end-to-end support and equipment for site establishment, routine maintenance, temporary shutdowns and unplanned outages.

Lifting Solutions: an extensive range of material handling equipment, engineering tools, relocation machinery, and hauling and torque equipment.

Concrete Care Solutions: equipment and advice to deliver professional concrete surface preparation, finishing, repair and maintenance including: concrete cutting and drilling, surface preparation and cleaning, placement, demolition and diamond products.

Traffic Management Solutions: extensive range of compliant, high quality traffic guidance and control equipment to ensure safe, efficient workplace traffic zones.

Test & Measure Solutions: innovative and leading edge testing, safety and measurement equipment suitable for applications in data analysis, electronics, pipe and sewer and general instrumentation. Our on-site Calibration Lab is the first of its kind in Australia and New Zealand.

Rail Solutions: specialist knowledge, reliable specialist equipment, strong safety compliance and experience with rail maintenance contractors, infrastructure owners.

END-TO-END PROJECT PARTNER

It's more than the equipment on site – it's how every element connects, complies, and operates together.

From design and installation to monitoring and ongoing support, our solutions are delivered as a fully managed professional service.

Water Management: Our experts work onsite with project and environmental teams to design a fit-for-purpose solution from installation to demobilisation.

Temporary Fencing: Our service goes beyond supply, providing specialist assessment and technical guidance to ensure fencing systems are fit for purpose.

Site Compounds: Fully compliant site compound solutions to support projects of all sizes – from space-constrained metro sites through to large, fully serviced project compounds.

Power & Renewables: End-to-end power solutions to support emergency, temporary, and permanent power requirements.

WATER TRUCKS

Water trucks provide reliable water delivery for dust suppression, moisture conditioning, soil compaction and site safety. Designed for tough worksite conditions, these units feature large-capacity tanks, spray bars, hose reels and easy-to-use controls to support efficient water distribution across construction, roadworks, and bulk earthworks applications.
