

CONSTRUCTION TEAM EFFORT

WHY CHOOSE KENNARDS HIRE AS YOUR CONSTRUCTION PROJECT PARTNER?

TRUSTED PARTNER

We work closely with you to understand and contribute to improving your equipment hire experience including project goals, timing and compliance requirements, resulting in better commercial outcomes.

RELIABILITY & RESPONSIVENESS

As a large and independent, nimble family business, we're flexible, able to make quick decisions and respond to the changing needs of your construction projects - at any stage from beginning to end.

EFFICIENCY

EasyTrak, our proprietary equipment tracking and management platform, provides visibility over your hire equipment usage, enabling us to identify and recommend utilisation improvements resulting in reduced hire costs.

SUPPORT

We understand that time is money. And when things go wrong on-site, you need a partner that understands the importance of service recovery. We have the expertise, team and equipment to help keep your construction project moving.

COVERAGE

With over 190 branches and sites throughout Australia and New Zealand, we're sure to have people and assets close to your construction projects no matter where they are located.

EQUIPMENT

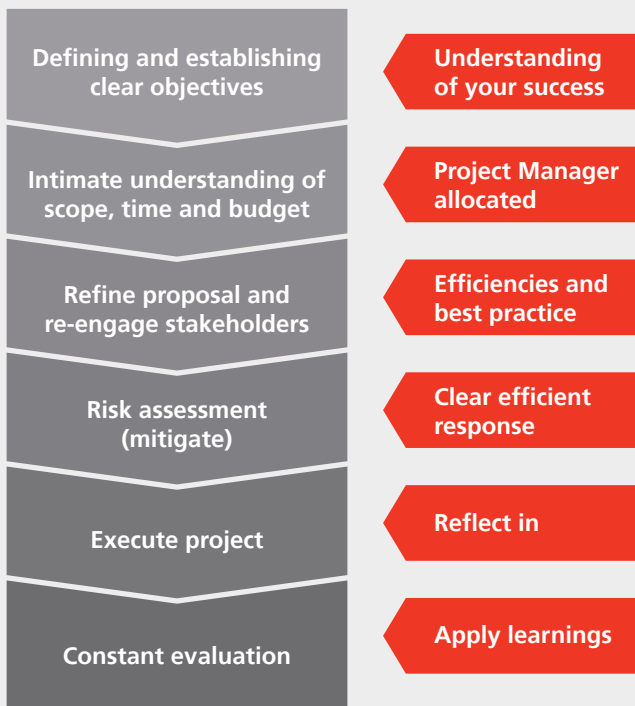

We offer quality brands and a broad product range to ensure you only need a single source of equipment hire. Typical equipment for construction projects include project site offices, generators, earthmoving, traffic management, access and trade tools.

KEEP YOUR PROJECT MOVING WITH A SINGLE POINT OF CONTACT

Your allocated construction project partner, whether that be a local Branch Manager, dedicated Account Manager or even an on-site Project Manager, will take full responsibility of our assets on-site to ensure we keep you moving with:

- Sourcing of equipment.
- Co-ordination of equipment deliveries and logistics.
- Equipment servicing, maintenance and breakdown response.
- Co-ordination of running maintenance such as refueling and water refills, fluid and effluent pump outs, etc.
- Utilisation reporting and future recommendations.
- Accounts and invoicing.

CONSTRUCTION PROJECT DELIVERY

10 YEAR PARTNERSHIP WITH MAINBRACE CONSTRUCTIONS

Mainbrace Constructions is Australia's leading and most experienced retail builder operating from northern Queensland all the way down the eastern seaboard to Victoria. Often working on several major projects at once means they need an equipment supplier they can rely on and trust.

The nature of their work often requires needing a lot of gear at short notice, sometimes within a couple of hours. This can be anything from the largest of generators, access equipment and demolition saws, down to small items like wheelbarrows and other bits and pieces.

For a 10-month project in Gregory Hills, NSW Mainbrace needed equipment at short notice including sheds, power and other essential items for site setup. Kennards Hire made it happen, through deep relationships with our suppliers, many that go back decades, we have the ability to respond when others may struggle. We understand our service is critical and needs to save our customer time and money, freeing up the Mainbrace Team to concentrate on what they are experts at, construction.

COMPLIANCE

SAFETY

Through our Plant Portal, anyone on-site can access critical information that optimises the site and equipment, including:

- Instant Access via QR Code
- Service History
- Risk Assessments
- Instructional Videos
- Operators Manuals

In addition to understanding and adhering to your specific site safety requirements and protocols, Kennards Hire can also undertake a site assessment to ensure:

- Our operations eliminate risks to people, equipment and environment where possible.
- Our servicing and maintenance staff are equipped with all appropriate accreditations and safety PPE gear when visiting your project sites.
- We provide you with the right equipment to suit site requirements and operating conditions.

ENVIRONMENT & SUSTAINABILITY

Our operational activities contribute to decarbonising the supply chain through:

- Project site testing and monitoring equipment.
- Noise and site pollution mitigation advice and equipment.
- Decarbonising the supply chain through:
 - » Utilising hybrid technologies where practical and possible.
 - » Young equipment fleet for optimum emissions efficiencies.
 - » Timely water, fuel and waste management with reporting from EasyTrak.
 - » Efficient fleet scheduling enabling our delivery vehicles to spend less time on the road helping to minimise carbon emission output.
