

The background of the top half of the page is a black and white photograph of a mining site with large piles of rock and some industrial equipment in the distance. A large red diagonal shape is overlaid on the right side of the image.

MINING & RESOURCES UNLOCKING POTENTIAL

WHY CHOOSE KENNARDS HIRE AS YOUR MINING AND RESOURCES PROJECT PARTNER?

EQUIPMENT

We offer quality brands and a complete equipment range to ensure you only need a single source of equipment hire. Our specialist solutions for mining and resources include shutdown maintenance equipment, generators, pumps, welders, materials handling, access, specialist lifting and traffic management.

TRUSTED PARTNER

We work closely with you to improve your hire experience. We take time to understand your challenges, timing and compliance requirements so you can achieve your production goals safely.

EFFICIENCY

EasyTrak, our proprietary equipment tracking and management platform provides visibility over your hire equipment usage, enabling us to identify and recommend utilisation improvements and safer operations, resulting in reduced hire costs.

RESPONSIVENESS

As a large and independent, nimble family business, we're flexible, able to make quick decisions and respond to the changing needs of your mining and resources operation.

COVERAGE

With over 190 branches and sites throughout Australia and New Zealand, we're sure to have the right people and assets close to your mining and resources operation no matter where they are located.

SUPPORT

We understand that time is money. And when things go wrong on-site, you need a partner that understands the importance of service recovery. We have the expertise, network and equipment to help keep your project moving.

SINGLE POINT OF CONTACT

Your allocated resources and mining project partner, whether that be a local Branch Manager, dedicated Account Manager or even an on-site Project Manager, will take full responsibility of our assets on-site to ensure you don't need to be concerned with:

- Sourcing of equipment.
- Co-ordination of equipment deliveries and logistics.
- Equipment servicing, maintenance and breakdown response.
- Co-ordination of running maintenance such as refueling and water refills, fluid and effluent pump outs, etc.
- Utilisation reporting and future recommendations.
- Accounts and invoicing.

MINING & RESOURCES EXPERTISE

COMMITTED TO A 30-YEAR MINING PROJECT

Supporting a \$3.6M mining project in the Pilbara cannot be done by just anyone. That's why Kennards Hire was engaged to supply over 150 pieces of plant on-site. Requiring routine maintenance, our field service capability was fully inducted and available 24/7 for any emergencies.

With its development staged over several years, Kennards Hire was engaged to provide equipment at phase 1 of the project. With over 150 pieces of plant on-site that required routine maintenance, we provided mechanics/fitters that were fully inducted onsite and available 24/7 for any emergency breakdowns.

Direct access for the client to dedicated Kennards Hire resources guaranteed critical project milestones were achieved with reliable service and minimal downtime during phase one.

DEDICATED SHUTDOWN MAINTENANCE

Our core business in both Karratha and Port Hedland, Western Australia is providing equipment for the shutdown maintenance of the mining and gas industry.

We understand these shutdowns are critical in keeping mining facilities running safely and effectively. We understand our role in providing the necessary equipment to ensure shut down works stay on schedule. When time is money we've got your back.

Our dedicated mechanics/fitters are inducted on-site, and accessibility for customers to local Kennards Hire account staff and resources are provided to continue to plan and support shutdown maintenance operations around the client's schedule.

SPECIALIST SOLUTIONS

Our specialist teams have the expertise and knowledge, backed up with an extensive product range, to provide technical guidance and complete end-to-end solutions for the mining and resources industry.

- Site Solutions: end-to-end support and equipment for routine maintenance, temporary shutdowns and unplanned outages.
- Pumps & Power: comprehensive range of commercial size pumps, generators and accessories ideal for the mining and resources industry.
- Lifting: an extensive range of material handling equipment, engineering tools, relocation machinery, and hauling and torque equipment.

COMPLIANCE

SAFETY

Through our Plant Portal, anyone on-site can access critical information that optimises the site and equipment, including:

- Instant Access via QR Code
- Service History
- Risk Assessments
- Instructional Videos
- Operators Manuals

In addition to understanding and adhering to your specific site safety requirements and protocols, Kennards Hire can also undertake a site assessment to ensure:

- Our operations eliminate risks to people, equipment and environment where possible.
- Our servicing and maintenance staff are equipped with all appropriate accreditations and safety gear when visiting your project sites.

ENVIRONMENT & SUSTAINABILITY

We understand the need to conduct business in an environmentally responsible and sustainable way to reduce carbon emissions and minimise environmental impact.

- Project site testing and monitoring equipment.
- Noise and site pollution mitigation advice and equipment.
- Decarbonising the supply chain through:
 - » Utilising hybrid technologies where practical and possible.
 - » Young equipment fleet for optimum emissions efficiencies.
 - » Timely water, fuel and waste management with reporting from EasyTrak.
 - » Efficient fleet scheduling enabling our delivery vehicles to spend less time on the road helping to minimise carbon emission output.
