

RAIL KEEPING YOU ON TRACK

WHY CHOOSE KENNARDS HIRE AS YOUR RAIL PROJECT PARTNER?

TRUSTED PARTNER

We work closely with you to understand and contribute to improving your equipment hire experience including project goals, timing and compliance requirements, resulting in better commercial outcomes.

RELIABILITY & RESPONSIVENESS

As a large and independent, nimble family business, we're flexible, able to make quick decisions and respond to the changing needs of your rail projects - at any stage from beginning to end.

EFFICIENCY

EasyTrak, our proprietary equipment tracking and management platform, provides visibility over your hire equipment usage, enabling us to identify and recommend utilisation improvements resulting in reduced hire costs.

SUPPORT

We understand that time is money. And when things go wrong on-site, you need a partner that understands the importance of service recovery. We have the expertise, team and equipment to help get your rail project back on track.

COVERAGE

With over 190 branches and sites throughout Australia and New Zealand, we're sure to have people and assets close to your rail projects no matter where they are located.

EQUIPMENT

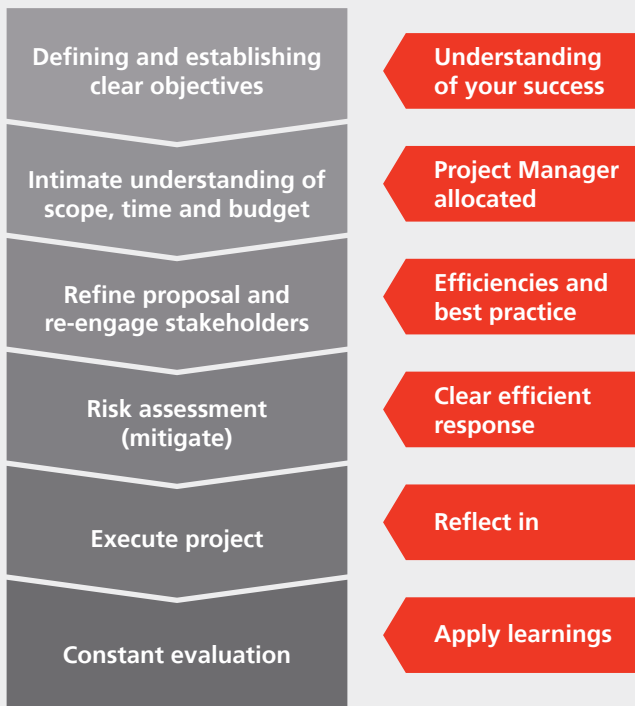

We offer quality brands and a broad product range to ensure you only need a single source of equipment hire. Typical equipment for rail projects include site equipment, clipping equipment, materials handling, tampers, tensors, welding, grinding, trolleys, jacks, traffic management and lighting.

KEEP YOUR PROJECT MOVING WITH A SINGLE POINT OF CONTACT

Your allocated rail project partner, whether that be a Specialist Rail Branch Manager, dedicated Account Manager or even an on-site Project Manager, will take full responsibility of our assets on-site to ensure we keep you moving with:

- Sourcing of equipment.
- Co-ordination of equipment deliveries and logistics.
- Equipment servicing, maintenance and breakdown response.
- Co-ordination of running maintenance such as refueling and water refills, fluid and effluent pump outs, etc.
- Utilisation reporting and future recommendations.
- Accounts and invoicing.

PROVEN PROJECT DELIVERY

RELATIONSHIP

Our customers and the service we provide are important to us. We understand that rail operations and infrastructure projects can be in remote locations and will vary project to project. They can also be inherently unpredictable. Kennards Hire's structures and systems enable project specific solutions and allow us to respond quickly to issues as they arise to keep projects moving. Our Specialist Rail branches are industry certified and carry an extensive range of rail maintenance equipment. Our people are industry experts and understand the nature of rail shutdowns and critical compliance aspects of the work.

Customers we support include:

- Affective Rail
- Aurizon
- Australian Rail Track Corporation
- Coleman Rail
- CPB Contractors
- Department for Infrastructure and Transport
- Genesee Wyoming
- John Holland CRN
- Martinus Rail
- McConnell Dowell
- Metro Trains
- Queensland Rail
- Select Plant Hire /Laing O'Rourke
- Sydney Trains
- V/Line

COMPLIANCE

SAFETY

Through our Plant Portal, anyone on-site can access critical information that optimises the site and equipment, including:

- Instant Access via QR Code
- Risk Assessments
- Operators Manuals
- Service History
- Instructional Videos

In addition to understanding and adhering to your specific site safety requirements and protocols, Kennards Hire can also undertake a site assessment to ensure:

- Our operations eliminate risks to people, equipment and environment where possible.
- Our servicing and maintenance staff are equipped with all appropriate accreditations and safety PPE gear when visiting your rail sites.
- We provide you with the right equipment to suit site requirements and operating conditions.

ENVIRONMENT & SUSTAINABILITY

Our operational activities contribute to decarbonising the supply chain through:

- Project site testing and monitoring equipment.
- Noise and site pollution mitigation advice and equipment.
- Decarbonising the supply chain through:
 - » Utilising hybrid technologies where practical and possible.
 - » Young equipment fleet for optimum emissions efficiencies.
 - » Timely water, fuel and waste management with reporting from EasyTrak.
 - » Efficient fleet scheduling enabling our delivery vehicles to spend less time on the road helping to minimise carbon emission output.
