Productivity

OUR EXPERTISE EXTENDS ON-SITE

As the experts in concrete care, we know exactly what you need when working with concrete. We can guide you through selecting the right equipment to achieve the outcome you want and supply the consumables - whether that's additional diamond blades, plugs or discs and dust shrouds - to achieve a professional finish.

AN ERGONOMIC APPROACH

We value the safety, health and well-being of our customers and people, so we invest in ergonomic equipment with a sustainable focus. Our large concrete grinders are equipped with remote control, allowing you to grind without physical strain. We can provide systems such as dust extraction units, vacuum cleaners, dust separators or air purifiers, all of which facilitate low-dust or even dust-free conditions to protect both your health and the environment.

ENABLE YOUR PEOPLE

We understand concrete machinery and tools can be complex for users, especially if they contain advanced operating instructions that may be new to your staff. Our concrete care team have the training, knowledge and experience to ensure you are provided the right equipment and instruction to achieve the best results safely and efficiently.

CONCRETE CARE PRODUCTS

Operating from branches throughout Australia and New Zealand, Kennards Hire is dedicated to delivering state-of-the-art equipment, technical advice, on-site consulting and troubleshooting - a total concrete solution - from specification through to performance and delivery. Every piece of equipment is compliant with relevant Australian or New Zealand standards and regulations.
