MAJOR PROJECTS END-TO-END PROJECT MANAGEMENT EXPERTISE

DEDICATED TO YOUR PROJECT DELIVERY

Our Kennards Major Projects team understand the critical success factors required to keep major project builds moving safely and efficiently. Across all industry verticals, we take into consideration time management of your project plan across safety, environment, unexpected equipment challenges and budgets. This is combined with end-to-end project management from our experienced team to keep your project moving.

SPECIALIST PROJECT MANAGEMENT SKILLS ACROSS INDUSTRIES

The critical success factors of most major projects include cost, time, quality, satisfaction, management, safety, technology, organisation, environment and resources.

Considering the complexity of major builds, it can be difficult for teams to manage these factors effectively and safely.

With more infrastructure projects in Australia and New Zealand than ever before, we understand the challenges of finding the right team to help ensure major development projects run on time, on budget and without incident.

CASE STUDY

Fulton Hogan and Albion Park Rail Bypass

Funded by the NSW Government, Fulton Hogan was commissioned to deliver the Albion Park Rail bypass - Princes Highway upgrade building the 'missing link' between Sydney and Bomaderry. Fulton Hogan engaged Kennards Hire to provide a team of dedicated project management experts for the duration of the project.

"The major projects team were invaluable. With a project of this magnitude, we needed to ensure we had a team with the best and broadest set of skills to support on the ground and around the clock, but who were also capable of providing equipment at the drop of a hat. No doubt without them we would have struggled to deliver on-time and on budget."

- Matthew Saviana, Project Director, Fulton Hogan
