KROLL™

CROWDSTRIKE

# Kroll + CrowdStrike Proactive Cyber Risk Reduction Portfolio

Problem centric cyber risk reduction aligned to how attacks unfold — from initial access, through privilege abuse, to detection and downstream impact.

## Threat-Informed Proactive Cyber Risk Reduction

Modern cyber attacks exploit preventable, real-world weaknesses by chaining failures across environments.

Kroll's incident response experience and CrowdStrike's adversary intelligence show that reducing risk based on how attackers actually operate, before an incident begins, materially lowers impact.

## A Portfolio Built Around Real-World Risk

Kroll and CrowdStrike help organizations identify likely attacker entry points, understand how impact escalates, and prioritize the risks that matter most.

The portfolio is organized across six critical domains to drive practical, attacker-informed risk reduction.

### 1. Governance, Strategy & Quantified Cyber Risk

Aligning leadership, operating models, and decision making to real incident conditions so organizations can manage incidents under pressure and reduce confusion, delay, and business impact.

### 2. Exploit & Exposure Management

Reducing risk by prioritizing the exposures attackers are most likely to exploit, cutting through vulnerability noise to identify and eliminate critical attack paths that materially increase breach likelihood.

### 3. Identity & Privilege Attack Path Reduction

Limiting attacker access by addressing identity driven exposure, including excessive privilege, admin sprawl, legacy auth and trusted access, to prevent intrusion, privilege escalation and lateral movement.

### 4. Cloud & SaaS Data Theft Defense

Reducing cloud and SaaS data exposure caused by misconfigurations, excessive access, and entitlement misuse to limit blast radius and downstream impact of cloud service compromise and cloud data theft.

### 5. Third Party & Supply Chain Privilege

Managing risk introduced through partners and suppliers by assessing access, dependency concentration, and ecosystem exposure to prevent third party weaknesses from becoming first party incidents.

### 6. Threat Detection & Response

Ensuring security operations translates into effective response and active threat containment by designing, implementing and validating controls for observability, detection, and response, to make certain processes operate under real attacker pressure.

## Who This Is For

- Security and risk leaders reducing real world cyber risk
- Organizations with large or complex attack surfaces across identity, cloud, and third parties
- Teams needing clearer prioritization across prevention, detection, and response
- Executives and boards requiring business impact risk visibility

## What Clients Gain

- **Clear prioritization** of attacker validated risk
- **Reduced likelihood** of attacker entry
- **Faster detection** and containment during active compromise
- **Reduced blast radius** and downstream business impact
- **Executive ready insight** into exposure and response readiness

## What's Included (At a Glance)

- Threat informed assessment across six risk domains
- Prioritized findings based on exploitability and impact
- Practical remediation guidance
- Optional use of CrowdStrike intelligence for prioritization

## Why Kroll + CrowdStrike

Kroll and CrowdStrike combine **global threat intelligence and telemetry** with **real world breach and response expertise**. CrowdStrike provides visibility into how adversaries operate at scale, while Kroll applies frontline investigative and incident response insight to translate that intelligence into practical, risk reducing action. Together, this partnership reflects how attacks actually unfold — not how they're modeled in theory.

## Kroll is a Leader in Cyber and Data Resilience

World's largest incident response provider, handling **thousands** of cyber incidents annually

**140k+ hours** of penetration testing and red teaming annually

Trusted by leading **enterprises, insurers and regulated organizations** worldwide

Experience from **Govt. & Law Enforcement, Industry & Consulting** backgrounds

EUROPOL

**700+** experts across 19 countries

**100+** certifications

CISM CREST ISO 27001

Expertise in **AI, IAM, Cloud, Data Analytics, OT Security** and **Cyber Risk**

**700k+** actively monitored endpoints

Rated as an **industry leader**

FORRESTER

2021 Computing Security Awards WINNER

computing Security Excellence Awards 2023 WINNER

SC 2022 awards WINNER

**About Kroll**

As the leading independent provider of financial and risk advisory solutions, Kroll leverages our unique insights, data and technology to help clients stay ahead of complex demands. Kroll's global team continues the firm's nearly 100-year history of trusted expertise spanning risk, governance, transactions and valuation. Our advanced solutions and intelligence provide clients the foresight they need to create an enduring competitive advantage. At Kroll, our values define who we are and how we partner with clients and communities. Learn more at Kroll.com.
