

30% Lower Cyber Costs. Stronger Security.

How a Global Food and Beverage Company Modernized Cyber Operations with Kroll and CrowdStrike

Executive Summary

Facing intense cost pressures and a dramatically reduced cybersecurity team, a global food and beverage company partnered with **Kroll** to transform its cyber operations. By consolidating legacy tools onto the **CrowdStrike Falcon® platform** and adopting a right-sized managed operating model, the organization reduced total cybersecurity costs by **30%**, accelerated time to value and strengthened threat detection, without increasing risk.

Key Impact at a Glance

30% reduction in TCO

<30 days to fully deploy and migrate

4,500 high-risk endpoints detected

8 weeks faster than alternative migration timelines

6,000 endpoints secured globally

2 FTEs supported by enterprise-grade cyber operations

The Challenge

The company operates more than **6,000 endpoints globally** across food, beverage and retail environments. Widespread cost reductions across the business resulted in the cybersecurity function shrinking to **just two full time employees**, creating critical gaps across:

Security Operations Center (SOC)

Data Protection

Third-Party Risk Management

Governance, Risk, and Compliance (GRC)

At the same time, the organization needed to maintain cyber maturity and regulatory compliance and avoid taking on additional risk, all while controlling escalating technology and operational costs.

The company had been a longtime user of **SentinelOne** for endpoint protection and was satisfied with the product. It also used **LogRhythm** and was completing a migration to **Microsoft Sentinel** when newly announced Microsoft pricing increases threatened to drive SIEM costs up by **18% in 2026**, making the existing model unsustainable.

Our Approach

As the organization's cyber operations partner, Kroll designed and executed a transformation focused on simplicity, cost efficiency and rapid impact.

Platform Consolidation

Kroll replaced fragmented endpoint and SIEM technologies with the **CrowdStrike Falcon® platform**, including:

- **CrowdStrike Falcon Endpoint Protection**
- **CrowdStrike Next Gen SIEM**, powered by **Onum** to optimize data ingestion and retention costs

This consolidated architecture eliminated overlapping tools, reduced complexity and improved visibility across the environment.

Right Sized Operating Model

Kroll paired the platform with a tailored operating model that combined:

- **CrowdStrike Falcon Complete™** for managed detection and response
- **Kroll Responder Services** spanning SOC operations, incident response and compliance

This approach delivered enterprise grade protection while materially lowering operational overhead, aligned to a lean internal team.

Rapid Time to Value

With key software renewals approaching in 60 days, speed was critical.

Kroll successfully

- Deployed CrowdStrike across all **6,000 global endpoints**
- Fully removed the legacy endpoint solution
- Migrated security data from Microsoft Sentinel to CrowdStrike Next Gen SIEM using **Onum**
- Routed compliance and retention data to long term cloud storage to meet regulatory requirements at lower cost

The complete transformation was delivered in under **30 days, eight weeks faster** than comparable provider timelines, allowing the organization to realize immediate improvements in detection and response.

The Outcome

The partnership with Kroll and CrowdStrike enabled the company to modernize cyber operations while meeting aggressive cost and time constraints:

- 30% reduction in total cost of ownership across endpoint, SIEM, and SOC services
- Faster time to value with full operational capability in weeks, not months
- Simplified, scalable security operations aligned to minimal internal resources
- Maintained regulatory compliance and cyber maturity despite reduced headcount

What's Next

Over the next three years, Kroll will continue to operate and optimize the client's end to end cyber program, driving continuous improvement, service maturity and sustained risk reduction.

About Kroll

As the leading independent provider of financial and risk advisory solutions, Kroll leverages our unique insights, data and technology to help clients stay ahead of complex demands. Kroll's global team continues the firm's nearly 100-year history of trusted expertise spanning risk, governance, transactions and valuation. Our advanced solutions and intelligence provide clients the foresight they need to create an enduring competitive advantage. At Kroll, our values define who we are and how we partner with clients and communities. Learn more at [Kroll.com](https://kroll.com).
