1 Energy Policy

Kroll is a leading global financial and risk advisory organization. With our global footprint also comes the need to optimize our use of energy in operating our facilities. We are committed to continual improvement of the Energy Performance in all our areas of facility operations

- Utilizing energy efficiently through good operational and maintenance practices.
- Incorporating energy efficient technologies.
- Pursuing the adoption of renewable energy.
- Complying with applicable legal and other requirements.
- Building awareness amongst employees and contractors for energy conservation.
- Supporting the purchase of energy efficient products and services and design for energy performance improvement.
- Ensuring the availability of information and of necessary resources to achieve energy objectives and targets.
- Setting up an energy management team to monitor energy management programs and energy performance with regular audits.

This policy would be reviewed periodically and communicated to all our employees and made available to all our stakeholders.
