**Stock Exchange Announcement
LIONTRUST ASSET MANAGEMENT PLC
Trading Update**

Liontrust Asset Management Plc (“**Liontrust**” or the “**Company**”), the specialist independent fund management group, today issues its trading update for the three months ended 30 September 2025 (the “**Period**”).

- Net outflows of £1.2 billion in the Period (2024: £1.1 billion).
- Assets under management and advice (“**AuMA**”) were £22.0 billion as at 30 September 2025, a decrease over the Period of 2.7%.
- AuMA as at 3 October 2025 were £22.2 billion.

Commenting, John Ions, Chief Executive Officer, said:

“Over the past few quarters, we have written about our belief that the market environment going forward will be more favourable for active managers. We are now seeing clients seeking to diversify away from the US and towards active management, and this is shown in an acceleration of interest in Liontrust strategies.

We are having success among institutional investors and wealth managers, notably internationally. This includes new mandates as yet unfunded and being added to clients’ buy lists. This progress has been slower than as we had hoped, however, leading to £1.2 billion of net outflows in the last quarter, which were spread across wealth manager, adviser and retail clients in the UK.

In spite of this challenging period for flows, the outlook is becoming more positive for active management and Liontrust.

Active management

The Magnificent 7 are still heavily influencing market performance; their earnings and valuations dominate the S&P, exposing the market to volatility. But, at the same time, we have seen increased dispersion among these mega cap stocks and currency movements have been a positive tailwind this year for investors in non-US markets such as the DAX, Nikkei and FTSE 100.

Geographical diversification, therefore, is becoming more important, as is stock selection outside the very biggest companies in the world. We expect to see greater dispersion of returns generally going forward highlighting the value that active management brings to client portfolios.

Broadening demand

We are confident we are making progress in distribution, both in the UK and internationally, which is reflected in greater client engagement and the potential pipeline of flows. This is

shown by the fact that we now have clients in South America, Australia, South Africa and the Middle East, in addition to the UK and Europe.

The increased interest in Liontrust strategies, notably European and global equities, also reflects our differentiated, rigorous and repeatable investment processes and long-term performance.

With strong adherence to investment process and active management, along with broadening distribution, the power of the brand and strengthening infrastructure, we are confident about the outlook for Liontrust.”
