

COMPANY BACKGROUND

LOVE'S ALTERNATIVE ENERGY FUELS THE VEHICLES THAT DRIVE THE U.S. ECONOMY

Transportation fuel is the lifeblood of the U.S. economy. It powers the trucks and delivery vans that transport 70% of all retail and manufactured goods to our homes and businesses. It enables our communities to keep moving – whether by transit bus, school bus or shuttle. Love's Alternative Energy is proud to do our part to bring sustainable transportation solutions to this great nation. We've been driving innovation on U.S. roadways for more than 30 years, partnering with customers from coast to coast to maximize efficiency, cost savings and operating performance.

Our team—headquartered in Houston—designs, builds and maintains clean fuel stations for fleet operators, offering renewable natural gas, compressed natural gas, hydrogen, electric vehicle charging solutions, on-site power generation and energy storage.

LOVE'S ALTERNATIVE ENERGY IS PROUD TO BE PART OF THE LOVE'S FAMILY OF COMPANIES

Founded: 1964

Headquarters: Oklahoma City

Overview: Love's operates 650+ travel stops in 42 states, offering 24-hour access to fuel, convenience store products offerings, DEF, and fuel — including diesel, gasoline, biodiesel, ethanol, renewable diesel, compressed natural gas, and electric vehicle charging. The company also manages a network of truck service stations, hotels and storage locations.
