

The **Medical Career** is an engagement-based research project mentored by Dr. Carolina Restini at MSUCOM. Through this project, medical students with different journeys to medical school present at various high schools in the SE MI area to teach students about the pathway to medicine, explain different healthcare careers, highlight personal experiences, and share tips/advice. You will conduct pre- and post-surveys as part of a research project to analyze the presentation's effectiveness. From this, various characteristics can be studied, and data that yield meaningful results will enable students to present at conferences and/or in publications. This is a student-led project that requires students passionate about medical education, services, and mentorship.

Students may have to drive 1 hour+ to schools throughout the school year.

All expenses, including travel/mileage, will be reimbursed.

Please fill out this form if you are interested in being a part of this project.
