MEDICAL TREATMENT OF MINOR STUDENTS

MSU Campus Health Services (CHS) provides medical care for students during their enrollment at Michigan State University. CHS offers preventive health care, treatment for illness or injury, and health education – all on an outpatient basis. Occasionally, CHS's health care staff refers students for specialty services with other providers within MSU Health Care, Inc. (medical school faculty), also on an outpatient basis.

When a student under 18 years of age seeks treatment at CHS, we generally seek parental consent before providing that treatment. (In certain circumstances, like medical emergencies, Michigan law does not require parental consent before treatment is provided.) It is sometimes difficult to reach the student's parent/ guardian to obtain consent to treatment, which can be frustrating for the student waiting for care. For this reason, **MSU recommends that the following authorization be signed by a parent/guardian of students who will begin their studies at MSU before they turn 18.**

AUTHORIZATION FOR TREATMENT

1. I authorize medical treatment for the student named above from MSU Campus Health Services and other MSU outpatient health care facilities. I will be financially responsible for the treatment provided.
2. I authorize that the student named above may complete all forms required for treatment.
3. I understand that this authorization will be in effect until the student reaches the age of 18.
