

LET'S CELEBRATE!

SELFIE PROP SIGN

one prop per sheet

SUPPLIES:

X-acto knife • spray glue • foam board (foamcore) • liquid glue • something to use for the prop stick (like wooden grill skewers or thin dowel rods sharpened with a pencil sharpener)

DIRECTIONS:

- Use the spray glue to adhere the prop art onto a piece of foam board and let it dry.
- With your X-acto knife, cut along the dotted line through both the prop art and foam board. (Pro-tip: You can use fine sandpaper or a nail file to smooth out any uneven edges.)
- Dip the sharp end of your prop stick into some liquid glue and push it into the inner foam of the prop's foam board along the bottom edge. Let the glue dry before use.

Sparty's tip: Use these photo props in social media posts to celebrate your new Spartan! They're also great for photos with guests at graduation parties. Short on time or tools? Print multiple designs, trim them out, and tape them to a wall for a fun selfie background.
