Action

**Resolution:**

BE IT RESOLVED, that the Board of Trustees of Michigan State University hereby authorizes the Administration to plan for the project titled, “Transportation Services Garage”

**Recommendation:**

The Trustee Committee on Budget & Finance recommends that the Board of Trustees authorize the Administration to plan for the construction of a new Transportation Services Garage.

**Prior Action by BOT:** On December 13, 2024, the board approved the Administration to proceed with the “Spartan Stadium Improvements” project which included demolition of Central Services building. This resolution also included authorization to plan for the project titled, “Spartan Stadium Modernization project,” which requires relocation of the Transportation Service garage.

**Responsible Officers:**

Daniel Bollman, Vice President for Strategic Infrastructure Planning and Facilities

Barbara Kranz, Assistant Provost and Executive Director, Institutional Space  
Planning and Management

**Summary:** The Spartan Stadium Modernization project required demolition of the Central Services building, displacing the Transportation Services motor pool business functions. The Spartan Stadium Modernization project requires relocation of the motor pool service garage that is currently housed in Spartan Stadium east concourse. Constructing a new building for the Transportation Services garage will improve vehicle repair capabilities which are currently limited due to ceiling heights and building constraints of the Spartan Stadium east concourse.

**Background Information:**

The Vision 2050: Integrated Facilities and Land Use Plan serves as the guiding framework for enhancements across campus, including the Athletic District. As part of the Spartan Stadium Improvements project, the Central Services building was demolished in the summer of 2025. Transportation Services offices previously located there were moved to Service District, specifically to the University Services building on Service Road.

While the Transportation Services garage remains in the Spartan Stadium east concourse, it will be displaced by the Spartan Stadium Modernization project, currently in the planning phase.

**Source of Funds:**

The planning phase will involve expenditures for consultants, design services, and cost estimation. A planning budget of \$2,400,000 has been allocated and will be incorporated into the overall project budget. Preliminary project cost estimate is \$24,000,000. The Administration will bring forward a funding plan for full project costs when seeking authorization to proceed.

**Resource Impact:**

The creation of a new Transportation Services building will clear the way for the Spartan Stadium Modernization project by relocating a service function out of the Athletic District to the Service District.

The Service District already houses complimentary functions such as fuel station, car wash, motor pool, and parking for Transportation Services users, making it a strategic location for centralizing services that support the MSU community.
