

MILLIMAN REPORT

An analysis of supplemental benefit prevalence in Medicare Advantage plans – April 2021 update

With a focus on home-delivered meals

May 2021

1. Results

Medicare Advantage (MA) plan supplemental benefits have significantly increased in prevalence between 2017 and 2021. Some of the benefits that have been common for many years, such as dental, vision, and hearing are nearing 80% to 90% prevalence and are almost ubiquitous in the market. A number of other benefits, such as home-delivered meals, have only recently been introduced and have significantly increased in prevalence. Meal benefit prevalence among all enrollees has increased by 10% from 2020 to 2021. Mom’s Meals, a vendor providing home-delivered meals as a service for MA plans has engaged Milliman to conduct this analysis.

Using the 2021 Milliman Medicare Advantage Competitive Value Added Tool (Milliman MACVAT®), we conducted an analysis of supplemental benefit offerings by year. The results of that analysis are presented as line graphs showing the percentage of MA beneficiaries who are enrolled in plans that offer select supplemental benefits.

We divided the benefits in this analysis into multiple charts to enhance readability. Figure 1 shows the prevalence of meals, dental, vision, and hearing benefits. Figure 2 shows the prevalence of meals, non-emergency medical transportation, over-the-counter (OTC) benefits, acupuncture, chiropractic services, podiatry services, and visitor / travel benefits. These charts represent the nationwide MA individual market, excluding the Program of All-Inclusive Care for the Elderly (PACE), Medicare-Medicaid plans, Medical Savings Account (MSA) plans, and Cost plans.

FIGURE 1: PREVALENCE OF SELECT BENEFITS

FIGURE 2: PREVALENCE OF SELECT BENEFITS

Meal benefit prevalence increased significantly in 2019 and continues to grow in 2021 nationwide. While dental, vision, and hearing benefits remain very popular, meals saw the largest increase of any benefit from 2020 to 2021 in the number of members in a plan with the benefit. Other benefits recently increasing in popularity include comprehensive dental and OTC. Over the last five years, only meals, OTC, and comprehensive dental have seen year-over-year double-digit increases in the percentage of members enrolled in plans with coverage.

We also provide a series of attached charts in the Appendix that show the same information by plan cohorts, plan type, plan size, state, Medicare star rating, and for-profit status. Generally the trends across cohorts are similar to the nationwide results, though some groups of plans have greater or lesser overall prevalence of supplemental benefits. For some cohorts (such as plans with a 5.0 Medicare star rating) there is a large change in the hearing exam benefit, which is driven by a change in the composition of the cohort for that year.

2021 MEMBERSHIP AND BENEFIT UPDATES

We updated our results from the prior report published on January 26, 2021, to use publicly available February 2021 enrollment from the Centers for Medicare and Medicaid Services (CMS), as well as to include an analysis on special supplemental benefits for the chronically ill (SSBCI). Supplemental benefit prevalence for 2021 changed minimally when updating enrollment weights from September 2020 to February 2021. Meal benefits across all enrollees remained at 59% prevalence in 2021, up from 49% in 2020. Comprehensive dental, preventive dental, and OTC saw increased prevalence of 2% when comparing the February 2021 enrollment to September 2020 enrollment.

Meals are the most prevalent benefit included in 2021 SSBCI packages. Among the 926 plans offering SSBCI in 2021, 52% (481 plans) offered meals as an additional SSBCI benefit. Additionally, benefits related to food and produce, grocery delivery, and nutrition were the most prevalent benefits offered under SSBCI in 2021. SSBCI benefits offerings have grown significantly, especially since SSBCI was first offered in 2020, with about 4.1M members enrolled in a 2021 plan that offers SSBCI compared to 1.4M in 2020.

The table below shows the plan count and MA members enrolled in a plan that offers SSBCI. We provide a series of charts that show the same information split by plan type, plan size, state, star rating, business model, and premium offering (premium plans and zero-dollar premium plans) in Appendix B.

TABLE 1: MOMS MEALS - ENROLLMENT AND PLAN COUNTS FOR SELECT SSBCI BENEFITS - ALL ENROLLEES

Benefit	Enrollees		Plan Count	
	2020	2021	2020	2021
All SSBCI	1,371,591	4,061,539	267	926
Meals	375,768	2,112,397	116	481
Food	709,523	1,946,259	101	347
Groceries	0	137,173	0	76
Nutrition	19,031	26,252	7	8

2. Methodology

In performing this analysis, we relied on the 2021 Milliman MACVAT. The MACVAT contains comprehensive MA plan details and benefit offerings for 2017 through 2021. The MACVAT uses publicly available data released by the CMS that is summarized into a user-friendly format. We used the February membership from each applicable year (2017 through 2021). The SSBCI results focused on meal-related benefits in which we only summarized benefits relating to meal service, grocery delivery, food and produce, and nutritional therapy.

Figure 1, Figure 2, and Table 1 are contained in the Appendix, along with additional charts with different population and plan data underlying the charts. These population / plan splits include the following groupings:

- All plans (as displayed above)
- Split by plan type: Non-special needs plan (SNP) health maintenance organization (HMO), non-SNP preferred provider organization (PPO), non-SNP private fee-for-service (PFFS), and SNP
- Split by plan size:
 - Small (up to 20,000 members)
 - Medium (above 20,000 members, but below 250,000 members)
 - Large (above 250,000 members)
- Split by state (excluding Alaska, including the District of Columbia and Puerto Rico)
- Split by Medicare star rating
 - Below 2.5
 - 3.0 to 5.0, by 0.5 increments
 - Low enrollment and new contract
- Split by business model (for profit and nonprofit)
- Split by beneficiary premium (zero dollar and non-zero dollar)

Each cohort is independent of the others. For example, the split by plan size includes all plan types.

3. Caveats and limitations

This report was prepared on behalf of Purfoods LLC (dba Mom's Meals). The information in this report is designed to provide insights into supplemental benefit prevalence to benchmark meal benefits against other supplemental benefits in the MA market. It may not be appropriate, and should not be used, for other purposes.

In completing this analysis, we relied on published information from CMS. We did not audit this information, but we did review this information for general reasonableness.

The material in this report represents the opinion of the author and is not representative of the views of Milliman. As such, Milliman is not advocating for, or endorsing, any specific views in this report related to meal benefits or other supplemental benefits.

Guidelines issued by the American Academy of Actuaries require actuaries to include their professional qualifications in all actuarial communications. Adam Barnhart is a consulting actuary for Milliman. He is a member of the American Academy of Actuaries, and meets the Qualification Standards to render the actuarial opinion contained herein.

Milliman is among the world's largest providers of actuarial and related products and services. The firm has consulting practices in life insurance and financial services, property & casualty insurance, healthcare, and employee benefits. Founded in 1947, Milliman is an independent firm with offices in major cities around the globe.
