

What COVID-19 hospital costs could look like for patients

Although it is too early to analyze actual healthcare cost data for patients treated for COVID-19 in the United States, historical data for influenza or pneumonia hospitalizations can shed light on the out-of-pocket costs patients might face. The infographic below uses healthcare claims data from three large, national research databases to examine how pneumonia and influenza patient costs vary geographically and by type of insurance.

AVERAGE OUT-OF-POCKET COSTS FOR HOSPITALIZATIONS INVOLVING INFLUENZA OR PNEUMONIA, 2017

AVERAGE OUT-OF-POCKET COSTS FOR PATIENTS WITH GROUP MARKET COVERAGE, 2017

AVERAGE OUT-OF-POCKET COSTS BY AGE FOR PATIENTS WITH GROUP MARKET COVERAGE, 2017
