Current Responsibility

Austin Barrington is a principal and consulting actuary specializing in healthcare in Milliman's Seattle office. He joined the firm in 2020.

Professional Work Experience

Austin's experience as a healthcare consultant includes:

- Case-control studies and intervention impact estimation
- Provider reimbursement benchmarking
- Claims and membership analytics
- Data warehousing and visualization
- Pricing and underwriting of innovative products
- Custom risk scoring and identification models
- Methodology reviews
- Automation and tool development

Austin has experience working with care management organizations, digital health companies, health plans, and providers. He is an expert in designing and implementing predictive models and root cause analysis. He enjoys optimizing clinical programs, data processes, models, and tools to help his clients be more successful.

Austin worked in various teaching and IT roles before beginning his actuarial career at Health Care Service Corporation. There he spent eight years leading care management program evaluations; developing clinical identification models, risk adjustment code capture initiatives, and other predictive analytics efforts before joining Milliman.

Professional Designations

- Fellow, Society of Actuaries
- Member, American Academy of Actuaries

Education

- BS (magna cum laude), Applied Mathematics, Texas State University
- Predictive Analytics Certificate, Society of Actuaries
