

MARJAN BAZRAFSHAN

Consultant

marjan.bazrafshan@milliman.com

Current Responsibility

Marjan is a non-life actuarial consultant in Milliman's Zürich office. She joined the firm in September 2012.

Professional Work Experience

Within Milliman, Marjan works on several non-life reserving projects, gaining experience in reviewing claims and stochastic reserves of non-life reinsurers and captives. She reviews the reserves of (re)insurance companies regularly and calculates best estimate technical provisions and Solvency II capital requirements. She is also experienced in using loss reserve analysis software Arius™ and ReservePro®.

Marjan has also been involved in projects on motor pricing, modelling the annual expected loss caused by all natural catastrophe events, and providing actuarial services in mergers and acquisitions and insurance-linked securities for online lottery companies.

Marjan speaks Persian, English, and German.

Education

- PhD, Mathematics, University of Essen, Germany
- MS, Mathematics, Isfahan University of Technology, Isfahan, Iran
- BS, Mathematics, Shahid Beheshti University, Tehran, Iran

Presentations and Publications

Marjan has published several mathematical research papers.
