PIERRE CORNELL

Healthcare Analytics Director

pierre.cornell@milliman.com

Current Responsibility

Pierre Cornell is a healthcare data analyst with the New York office of Milliman. He joined the firm in 2017.

Professional Work Experience

Pierre has a diverse range of data analytics experience within the healthcare industry. At Milliman, he is involved in the development of a business intelligence platform designed for participants of CMMI's Medicare Shared Savings Program. He has worked on projects that focus on analyzing provider costs and utilization.

Pierre is experienced using SAS, SQL, Python, Github, and other data analysis tools designed to process and analyze large data sets. He has worked with large claims databases such as Truven Health Analytics MarketScan® Research and CMS' Standard Analytic Files (Medicare 5% and 100% samples).

Prior to joining Milliman, Pierre worked on developing and improving the efficiency of Athenahealth's population health analytics product. He has also worked on analyzing data for fraud and abuse on the payer side of the healthcare industry and as a quality improvement analyst at Boston Medical Center.

Education

- MPH, Biostatistics and Epidemiology, Boston University
- BS, Cellular and Molecular Biology, University of Michigan
