Current Responsibility

Aatman Dattani is an actuarial consultant with extensive experience in valuation, financial reporting, cluster modelling, model governance, and mergers and acquisitions.

Professional Work Experience

Aatman has assisted with model reviews and consulted with companies in areas of model validation, model governance and industry best practices. He has led annuity model development, including implementation of NAIC regulations such as VM-21. He has advised clients on model efficiency methodologies and trained clients on clustering.

Aatman is an advanced MG-ALFA and Integrate user and has assisted in developing models and providing due diligence for several mergers and acquisitions.

Additionally, Aatman leads a team focused on microinsurance initiatives.

Relevant skills

- Model development and governance
- Research development and analysis
- MG-ALFA, Integrate, MS Office, and R

Education

University of Texas at Austin, dual degrees in Mathematics and Economics

Presentations and Publications

Aatman is a co-author and coordinator of the quarterly Milliman Variable Annuity Market Update report and a frequent speaker on the annuity market at industry conferences.

Aatman has co-authored articles published in the Future Actuary magazine.
